New Security Challenges In Postcommunist Europe Securing Europe's East:

New Security Challenges in Postcommunist Europe Andrew Cottey, Derek Averre, 2002 Cubism was the most influential artistic movement that emerged in the twentieth century The hallmarks of its style were stamped on the art design and architecture and its aesthetic principles governed the representation of modernity across all the arts Yet just what cubism was or stood for at the time of its emergence is still in dispute while the explanations offered for its importance for twentieth century art and its legacy for the present are bewildering in their variety This fascinating book offers a way beyond this confusion a narrative of its beginnings consolidation and dissemination that takes into account not only what the style and the movement signified at the time of its emergence but also the principal writings through which cubism's significance for modernism has been established Visually stunning with over 100 illustrations this is an essential work for all students and teachers of modern art history

Where is Nato Going? Martin Smith, 2013-09-13 Since the end of the Cold War and especially since September 11 2001 the future of NATO has been the subject of intense debate This book brings together a group of international relations specialists in order to offer fresh perspectives on the Alliance's current and future purposes and roles Rather than revisiting long standing debates in areas such as NATO enlargement the contributors focus instead on relevant contemporary issues These include the prospects for NATO going global NATO's role in the US led

war on terror and the challenges posed by the transatlantic capabilities gap and the emergence of a military dimension to the European Union The paradox facing NATO today is that whilst it is busier than it has ever been before it still does not appear to many observers to have found a viable core role or roles in the contemporary international security arena By exploring key issues and debates on NATO s current agenda this book helps us to better understand the prospects for its long term survival and viability This book was previously published as a special issue of the leading journal Contemporary Security Policy

theoretical orientations that have so far dominated the literature networks multilateralism regimes and sy *The Politics of Becoming European* Maria Mälksoo, 2009-10-26 This book weaves together perspectives drawn from critical international relations anthropology and social theory in order to understand the Polish and Baltic post Cold War politics of becoming European Approaching the study of Europe's eastern enlargement through a post colonial critique author Maria Mälksoo makes a convincing case for a rethinking of European identity Drawing on the theorist Edward Said she contends that studies of the European Union are marked by a prevailing Orientalism rarely asking who has traditionally been able to define European identity and whether this identity should be presented as an historical process rather than a static category The central argument of this book is that the historical experience of being framed as simultaneously in Europe and yet not quite in Europe informs the current self understandings and security imaginaries of Poland and the Baltic States Exploring this existential condition of liminal Europeaness among foreign and security policy making elites the book considers its effects on key security policy issues including relations with Western Europe Russia and the United States Supported by solid empirical analyses this book provides an innovative and interdisciplinary approach to the post Cold War predicament of Poland and the Baltic States It will be of interest to students and scholars of International Relations European Studies Social and Political Theory and Anthropology *EU security governance* Emil Kirchner, James Sperling, 2018-07-30 EU security governance assesses the effectiveness of the EU as a security actor The book has two distinct features Firstly it is the first systematic study of the different economic political and military instruments employed by the EU in the performance of four different security functions The book demonstrates that the EU has emerged as an important security actor not only in the non traditional areas of security but increasingly as an entity with force projection capabilities Secondly the book represents an important step towards redressing conceptual gaps in the study of security governance particularly as it pertains to the European Union The book links the challenges of governing Europe's security to the changing nature of the state the evolutionary expansion of the security agenda and the growing obsolescence of the traditional forms and concepts of security cooperation
