**Worlds in Motion** S.E. Wilmer,H. van Maanen,2024-04-02 Theatre Worlds in Motion aims to clarify the different theatre traditions and practices in Western Europe from a historical and sociological perspective The book grew out of a perceived need among theatre scholars who had recognised that while they understood the theatre system of their own country they often found it difficult to discover how it compared with other countries The chapters analyse the basic components and dynamics of theatre systems in seventeen Western European nations in order to elucidate how the systems function in general and how they vary in different cultures The book provides a sense of what has been happening recently in particular countries and indicates how the theatre systems have developed over time and have led to the current practices and structures Each national chapter considers the historical tradition and place of theatre within the country and analyses the role of the state in fostering theatre during the last fifty years Material from the national chapters has been used in two general chapters at the beginning and end of the book to provide an overview to developments in all Western Europe The introductory chapter on decentralisation discusses the tendency amongst governments to encourage cultural development outside the national capital by providing subsidy for regional theatre venues and theatre companies and in many cases by developing the decision making and budgetary powers for the theatre to regional and local authorities The epilogue on the

functioning of theatre examines the common structures of theatre in society as described in the seventeen national chapters and it proposes areas for future research *Text in Contemporary Theatre* Guna Zeltiņa with Sanita Reinsone,2014-08-11 This collection of articles is devoted to the relationship between text and performance in contemporary theatre In this volume nineteen theatre and drama researchers from the Baltic countries Sweden Finland Ireland Hungary Russia and China discuss the results of their research into these issues in academic articles and essays The book mainly focuses on the experience of the Baltics in the creation of theatrical texts but it also provides a wider insight into the changing processes of world drama and theatre Three sections of the volume provide numerous examples of the functionality of traditional texts in today s theatre as well as introducing the reader to new names in contemporary drama and the different models of practice in theatre companies This book with its rich collection of material and detailed analysis of different methods and experiences of contemporary theatre is recommended for both theatre and drama theoreticians and practitioners **Swedish Women's Writing 1850-1995** Helena Forsas-Scott,2000-12-01 Provides a survey of women s writing in Sweden from the beginnings of the struggle for emancipation in the 1850s to the present day These writers are seen within the political cultural and economic context of women s lives Modern critical currents are also assessed and Swedish feminist criticism is considered alongside the French and American traditions **Library of Congress Subject Headings** Library of Congress,Library of Congress. **Digital Play and Technologies in the Early Years** Christine Stephen, Liz Brooker, Pamela Oberhuemer, Rod Parker-Rees, 2020-04-24 Technologies are a pervasive feature of contemporary life for adults and children However young children's experiences with digital technologies are often the subject of polarised debate among parents educators policymakers and social commentators particularly since the advent of tablets and smartphones changed access to the Internet and the nature of interactions with digital resources Some are opposed to children's engagement with digital resources concerned that the activities they afford are not developmentally appropriate limit physical activity and restrict the development of social skills Others welcome digital technologies which they see as offering new and enhanced ways of learning and sharing knowledge Despite this level of popular and policy interest in young children's interactions with digital technologies our understanding of the influence of these technologies on playing and learning and on the role of educators has remained surprisingly limited The contributions to this book fill in the gaps of our existing understanding of the field They focus on children and families from Australia to England to Estonia the how and why of encounters with digital technologies the nature of digital play and questions about practice and practitioners The book raises critical questions and offers new understandings and theoretical insights around one of the hot topics in early years research This book was
