New Technologies And Work Capitalist And Socialist Perspectives:

New Technologies and Work Arthur Francis, Peter Grootings, 2018-03-26 Originally published in 1989 this book is a valuable contribution to the development of a non technological approach in the study of technology and work The studies compare the introduction and implementation of new technology at work in similar enterprises throughout Europe The contributors share the basic assumption that the impact of technology varies greatly according to the characteristics of the country and its socioeconomic system They view changes in work as the result of the complex combinations and interactions of such conditions and technology rather than of technology per se and their focus is therefore on the mechanisms and processes which come into play when new technology is being introduced The book's international scope makes it a rich empirical source of comparative material

Labour in Transition Chris Smith, Paul Thompson, 2023-06-14 *Labour in Transition* 1992 examines the massive transformations undertaken by state socialist regimes at the end of the 1980s It traces developments in the Soviet Union Eastern Europe and China in particular the impact of changes in the labour process and broader political economy Detailed empirical analysis of reform processes is effectively combined with a broader comparative examination of capitalism socialism and the process of transition to new social formations

Technology and Organization (RLE: Organizations) Harry Scarbrough, J. Corbett, 2013-08-21 In this important MBA text the authors adopt a highly integrated approach Using the three conceptual lenses of power meaning and design they explore fully the many different ways in which technology and organizations interact They highlight the major debates within these competing perspectives and argue that the flow of knowledge and ideas within and between organizations is crucial in shaping technologies and organizations alike

Technology and Work in German Industry Norbert Altmann, Christoph Kohler, Pamela Meil, 2017-06-14 Originally published in 1992 this study includes theoretical approaches and extensive empirical studies on the manufacturing industry in Germany including comparisons to other European countries It looks at the developments of new technology identifying trends in rationalization and the influences they have on organizational behaviour

Cybernetics and Systems Theory in Management: Tools, Views, and Advancements Wallis, Steven E., 2009-12-31 *Cybernetics and Systems Theory in Management Tools Views and Advancements* provides new models and insights into how to develop test and apply more effective decision making and ethical practices in an organizational setting

Healthy Work Namir Khan, Nina Nakajima, Willem H. Vanderburg, 2004 The latest in a series focused on improving health conditions this volume addresses work environments bringing together diverse sources of literature that support preventive approaches to work design and organization This reference provides an overview of relevant literature to engineers managers accountants occupational health and safety specialists and industrial hygienists so that they and other professionals can understand what has caused our workplaces to become primary sources of physical and mental illness By focusing on diagnostic and prescriptive approaches managers can implement designs and decisions that prevent or greatly

Grayson,2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts **Values in Western Societies** Ruud de Moor,2023-12-28

The European Values Study is a large scale cross national and longitudinal survey research program on basic human values initiated by the European Value Systems Study Group EVSSG in the late 1970s at that time an informal grouping of academics Now it is carried on in the setting of a foundation using the abbreviated name of the group European Values Study EVS The EVSSG aimed at designing and conducting a major empirical study of the moral and social values underlying European social and political institutions and governing conduct A rich academic literature has now been created around the original survey and numerous other works have made use of the findings **Vienna Centre Newsletter** ,1988 The East

European Economy in Context David Turnock,2003-09-02 Since 1989 the former communist countries of Eastern Europe have witnessed a profound and dramatic upheaval The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured In The East European Economy in Context Communism and Transition David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe As well as containing an informative survey of the impact of communism The East European Economy in Context provides Political profiles of individual countries A clear study of the contrasts between northern and balkan groups Summaries of regional variations in the transition process An exploration of the new state structures and resources Discussion of political stability inter ethnic tensions and progress in economic change □□□□□□□□ ,1990 New

Technology and the Labour Process David Knights, Hugh Willmott, 1988-06-01 The papers in this volume examine the conditions and consequences of micro electronic technology within one or more of various spheres of the labour process

Work and Learning Peter Grootings, 1999-05 The training of adults in firms has become a central issue in European policy making and one of importance for public authorities and corporate planners A recent Communication by the Commission of the European Communities bears witness to this new awareness at the European level The dramatic revolution at the work place over the last decade brought about by rapidly evolving technologies and marked by structural change has forced firms to consider human resources as the main asset upon which to build their future Investment in training has thus become the new key concept by which private corporations justify their long term policies for the mobilization and improvement of human resources This report is about the need for and risks of further integration of work and learning It has been written to accompany the preparation of a future programme of activities in this field and is largely based on discussion that took place during a 3 day international workshop organised by the European Centre for Work and Society and funded by the European Cultural Foundation The first part of the report contains a general analysis of the problems of work and learning and addresses the question of why and to what extent work and learning is defined as problematic This part makes use of the discussions held during the workshop but also draws heavily on additional information The second part closely follows the workshop discussions which focused on four important dimensions of work and learning and attempts to draw up a number of relevant issues for further research or other action The third and final part of the report presents a summary of the principal open questions identified by our short survey of the problematic
