Polarized Sources, Targets And Polarimetry - Proceedings Of The 13th International Workshop Marco Contalbrigo, Guiseppe Ciullo, Paolo Lenisa, 2011-01-19 This book collects the most recent

experimental results new ideas and prototypes in the field of nuclear gaseous and solid polarized targets and polarimetry It contains the contribution of the biennial meeting on the topics of Polarized Sources Targets and Polarimetry Therefore includes the most recent developments and performances in the field and new proposals The contributing authors are the experts of the field The topics covered include Polarized Electron Sources Polarized Proton and Deuterium Sources Polarized Internal Targets Polarized ^3He Ion Sources and Targets Polarimetry e p d at Low and High Energy Polarized antiprotons Polarized Solid Targets br Deep Inelastic Scattering: Dis 2006 - Proceedings Of The 14th International Workshop Masahiro Kuze, Kunihiro Nagano, Katsuo Tokushuku, 2007-01-23 These proceedings present the most up to date status of deep inelastic scattering DIS physics Topics such as structure function measurements and phenomenology quantum chromodynamics QCD studies in DIS and photoproduction spin physics and diffractive interactions are reviewed in detail with emphasis on those studies that push the test of QCD and the Standard Model to the limits of their present range of validity towards both the very high and the very low four momentum transfers in lepton proton scattering Handbook of Nuclear Physics Isao Tanihata, Hiroshi Toki, Toshitaka Kajino, 2023-09-04 This handbook is a comprehensive systematic source of modern nuclear physics It aims to summarize experimental and theoretical discoveries and an understanding of unstable nuclei and their exotic structures which were opened up by the development of radioactive ion RI beam in the late 1980s The handbook comprises three major parts In the first part the experiments and measured facts are well organized and reviewed The second part summarizes recognized theories to explain the experimental facts introduced in the first part Reflecting recent synergistic progress involving both experiment and theory the chapters both parts are mutually related The last part focuses on cosmo nuclear physics one of the mainstream subjects in modern nuclear physics Those comprehensive topics are presented concisely Supported by introductory reviews all chapters are designed to present their topics in a manner accessible to readers at the graduate level The book therefore serves as a valuable source for beginners as well helping them to learn modern nuclear physics *Spin Structure of the Nucleon* Erhard Steffens, Revaz Shanidze, 2003-09-30 A comprehensive survey of the most recent results from the field of quark gluon structure of the nucleon in particular how the spin of the nucleon is shared by its constituents After very intriguing results from CERN and SLAC at the end of the 1980s the last decade has seen a set of second generation experiments at high energy accelerators that have yielded precise information on the solution of the Spin Crisis as well as opening up new questions The articles are written by experts from the leading collaboration and theory groups as well as providing an expert summary of the state of the art the book points the way to future research directions Its main focus is on semi inclusive and exclusive measurements of deep inelastic lepton scattering which enables for the first time the determination of the flavor separated quark spin distributions Future developments on generalized parton distributions and their interpretation as well as the transverse spin structure are also covered An indispensable volume for all working in hadronic physics Deep Inelastic Scattering Wesley H. Smith, Sridhara

R. Dasu, 2005-10-20 DIS 2005 is the 13th in a series of annual workshops on Deep Inelastic Scattering DIS and Quantum Chromodynamics QCD The aim of these workshops is to review the progress in the field of DIS and QCD and to discuss and lay the groundwork for the future DIS 2005 brought together 280 experimentalists and theorists to discuss the latest theoretical developments and new experimental results from HERA TeVatron SLAC CERN RHIC and Jefferson Lab **Deep Inelastic Scattering** Robin Devenish, Amanda Cooper-Sarkar, 2011-04-28 This book provides an up to date self contained account of deep inelastic scattering in high energy physics intended for graduate students and physicists new to the subject It covers the classic results which led to the quark parton model of hadrons and the establishment of quantum chromodynamics as the theory of the strong nuclear force in addition to new vistas in the subject opened up by the electron proton collider HERA The extraction of parton momentum distribution functions a key input for physics at hadron colliders such as the Tevatron at Fermi Lab and the Large Hadron Collider at CERN is described in detail The challenges of the HERA data at low x are described and possible explanations in terms of gluon dynamics and other models outlined Other chapters cover jet production at large momentum transfer and the determination of the strong coupling constant electroweak interactions at very high momentum transfers the extension of deep inelastic techniques to include hadronic probes a summary of fully polarised inelastic scattering and the spin structure of the nucleon and finally a brief account of methods in searching for signals beyond the standard model HERA 2008 : proceedings of the Ringberg Workshop New Trends in HERA Physics 2008 ; Ringberg Castle ; Tegernsee, Germany ; 5 - 10 October 2008 Ringberg Workshop New Trends in HERA Physics, 2009 **HERA 2011**, 2012 **Verzeichnis lieferbarer Bücher**, 2002 Proceedings of the Ringberg Workshop New Trends in HERA Physics 2005 Grindhammer, 2006 The purpose of this volume is to gather the latest experiment results from the H1 ZEUS and HERMES collaborations and to capture new trends in HERA phenomenology The presentations are by experts for experts but are suitable for a mixed readership of both theoreticians and experimentalists H1 members also cover ZEUS results and vice versa This is the place where discrepancies between experimental data and theoretical predictions are pointed out and ventilated and where projects to be launched in the future are identified **BOOK JACKET** **Special Issue: New Trends in HERA Physics** G.
