Old Buildings, New Forms Francoise Bollack, 2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Francoise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Francoise Astorg Bollack

Wood's firm is representative of a geographically distinct category of post war architectural and design practice that of the small private practice that flourished in Britain's expanding suburbs after the removal of wartime building restrictions. Such firms which played an important role in the development of British domestic design are currently under represented within architectural histories of the period. The private house represents an important site in which new spatial material and aesthetic parameters for modern living were defined after the Second World War. Within a British context the architect designed private house remained an important vehicle for the investigation of architectural ideas by second generation modernist architects and designers. Through a series of case study houses designed by Wood's firm the book reconsiders the progress of modern domestic architecture in Britain and demonstrates the ways in which architectural discourse and practice intersected with the experience performance and representation of domestic modernity in post war Britain **The Future of Heritage Science and Technologies: ICT and Digital Heritage** Rocco Furferi, Lapo Governi, Yary Volpe, Kate Seymour, Anna Pelagotti, Francesco Gherardini, 2022-10-29 This volume constitutes the refereed proceedings of the Third International Conference on The Future of Heritage Science and Technologies Florence Heri Tech 2022 held in Florence Italy in May 2022.
