New Vernacular Architecture:

New Vernacular Architecture Vicky Richardson,2001 Considering the synthesis of modernity and tradition in contemporary architecture this book focuses on 37 buildings completed in the 1990s It examines a broad range of examples of international architecture that reinterprets rather than revives traditional forms materials and construction techniques The projects covered in this study range from better known works by renowned architects such as Michael Graves Renzo Piano and David Chipperfield to less familiar buildings in Hungary Nepal Latvia and elsewhere **New vernacular architecture** Alejandro García Hermida,2019 *Invitation to Vernacular Architecture* Thomas Carter,Elizabeth C. Cromley,2005 Review Invitation to Vernacular Architecture A Guide to the Study of Ordinary Buildings and Landscapes is a manual for exploring and interpreting vernacular architecture the common buildings of particular regions and time periods Thomas Carter and Elizabeth Collins Cromley provide a comprehensive introduction to the field Rich with illustrations and written in a clear and jargon free style Invitation to Vernacular Architecture is an ideal text for courses in architecture material culture studies historic preservation American studies and history and a useful guide for anyone interested in the built environment Jacket Built to Meet Needs: Cultural Issues in Vernacular Architecture Paul Oliver,2007-06-07 The study of vernacular architecture explores the characteristics of domestic buildings in particular regions or localities and the many social and cultural factors that have contributed to their evolution In this book vernacular architecture specialist Paul Oliver brings together a wealth of information that spans over two decades and the whole globe Some previously unpublished papers as well as those only available in hard to find conference proceedings are brought together in one volume to form a fascinating reference for students and professional architects as well as all those involved with planning housing schemes in their home countries and overseas Learning from Vernacular Pierre Frey,2010 In 1964 Bernard Rudofsky curated the exhibition Architecture Without Architects at The Museum of Modern Art in New York thereby drawing the attention of the postwar Western public to traditional architectures rescuing them from the ignominy to which they had been consigned by the national ideologies of Europe in the 1930s In the early 1980s Ivan Illich published a number of radical critiques of modernity in which he drew attention to vernacular values proposing a trenchant but hospitable definition of this term It derives from Roman law in which everything produced within the household for consumption within the household and not for sale or exchange is vernacular In order to locate this proposition within the field of architectural criticism this book borrows with ironic intent part of the title of Robert Venturi s celebrated work Learning from Las Vegas 1977 which launched the fashion for post modernism in architecture Taking advantage of a collection of maquettes of vernacular architecture the only one of its kind in the world whose special attributes he highlights and whose value he underlines the author selects contemporary realisations by architects from Africa Asia America and Europe that seem to him to constitute a new vernacular architecture The emphasis here is on materials available on the fringes of the market on the safeguarding

and development of traditional know how on the social role of the architect and on the teaching of architecture

   Vernacular Architecture Mete Turan,2024-11-07 Originally published in 1990 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction Vernacular Architecture Paradigms of Environmental Response was not meant to be collection to represent one view or approach The only unifying element among the essays is the subject matter It is clear that there are not only disagreements over the interpretation of objective facts but more essentially there is a fundamental difference in the pursuit of scientific knowledge However regardless of these differences if the present volume as an attempt to create a theoretical construct called into question the ideographic approaches which do not penetrate the surface which persistently deal with formal qualities and which are content with only simple deterministic relations then it satisfies the major criterion that this collection of essays set for itself namely to broaden the scope of discussion   **Changing Ideals in Modern Architecture, 1750-1950** Peter Collins,1998 Changing Ideals in Modern Architecture revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins s ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format

   Pluralistic Approaches to Art Criticism Douglas Emerson Blandy,Kristin G. Congdon,1991 Contributors to this anthology analyze the contemporary academic methods for critiquing art and suggest new ways that might further our understandings of art created by myriad individuals and groups The essays give readers further insight into a diverse range of artistic creators often overlooked in art world studies   **Lessons from Vernacular Architecture** Willi Weber,Simos Yannas,2013-08-15 The architectural community has had a strong and continuing interest in traditional and vernacular architecture Lessons from Vernacular Architecture takes lessons directly from traditional and vernacular architecture and offers them to the reader as guidance and inspiration for new buildings The appropriate technical and social solutions provided by vernacular and traditional architecture are analysed in detail International case studies focus on environmental design aspects of traditional architecture in a broad range of climatic conditions and building types   **The Wiley-Blackwell Encyclopedia of Urban and Regional Studies** Anthony M. Orum,2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor in Chief Anthony Orum this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world It also provides authoritative entries on the main conceptual tools used by anthropologists sociologists geographers and political scientists in the study of cities and regions Among such concepts are those of place and space geographical regions the nature of power and politics in cities urban culture and many others The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the

globe including timely entries on Latin America Africa India and China At the same time it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today such as those of Friedmann and Sassen on global cities It also includes discussions of recent economic writings on cities and regions such as those of Richard Florida Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective with entries providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for students and researchers in urban and regional studies urban sociology urban geography and urban anthropology

Architecture and Anthropology Adam Jasper,2020-05-21 Both architecture and anthropology emerged as autonomous theoretical disciplines in the 18th century enlightenment Throughout the 19th century the fields shared a common icon the primitive hut and a common concern with both routine needs and ceremonial behaviours Both could lay strong claims to a special knowledge of the everyday And yet in the 20th century notwithstanding genre classics such as Bernard Rudofsky s Architecture without Architects or Paul Oliver s Shelter and various attempts to make architecture anthropocentric such as Corbusier s Modulor disciplinary exchanges between architecture and anthropology were often disappointingly slight This book attempts to locate the various points of departure that might be taken in a contemporary discussion between architecture and anthropology The results are radical post colonial theory is here counterpoised to 19th century theories of primitivism archaeology is set against dentistry fieldwork is juxtaposed against indigenous critique and climate science is applied to questions of shelter This publication will be of interest to both architects and anthropologists The chapters in this book were originally published within two special issues of Architectural Theory Review   **Paradise Valley, Nevada** Howard W. Marshall,1995 Stonemasons from the Alpine valleys of northwestern Italy shaped the architectural face of Paradise Valley in northern Nevada in the 1860s and 1870s Drawing on their own distinctive skills they constructed the constellation of granite and sandstone buildings that are the region s most visible landmarks Marshall s analysis of this architectural legacy illustrated with 229 photographs and 70 line drawings is not only a valuable resource for scholars in vernacular architecture folklore and cultural geography but also a verbal and visual treat for all who love the American West

Advances in Passive Cooling Mat Santamouris,2012-05-16 Following a rapid increase in the use of air conditioning in buildings of all types the energy demand for powering such devices has become a significant cause for concern Passive cooling is increasingly being thought of as the best alternative to air conditioning This book offers the latest knowledge and techniques on passive cooling enabling building professionals to understand the state of the art and employ relevant new strategies With separate chapters on comfort urban microclimate solar control ventilation ground cooling and evaporative

and radiative cooling this authoritative text will also be invaluable for architects engineers and students working on building physics and low energy design Advances in Passive Cooling is part of the BEST series edited by Mat Santamouris The aim of the series is to present the most current high quality theoretical and application oriented material in the field of solar energy and energy efficient buildings Leading international experts cover the strategies and technologies that form the basis of high performance sustainable buildings crucial to enhancing our built and urban environment **Imagining Slovene Socialist Modernity** Veronica E. Aplenc,2023-03-15 After the Second World War Yugoslavia s small regional cities represented a challenge for the new socialist state These cities older buildings local historic sites and low quality housing clashed with socialism s promises and ideals How would the state transform these cities everyday neighborhoods In the Slovene republic s capital city of Ljubljana the Trnovo neighborhood embodied this challenge through its modest housing small medieval section vast gardens acclaimed interwar architecture and iconic local reputation Imagining Slovene Socialist Modernity explores how urban planners architects historic preservationists neighborhood residents and even folklorists transformed this beloved neighborhood into a Slovene socialist city district Aplenc demonstrates that this urban redesign centered on republic level interpretations of a Yugoslav socialist built environment versus a re envisioned Slovene national past or design style This interdisciplinary study sheds light on how Yugoslav state socialism operated at the republic level within a decentralized system and on the diverse forces behind success or failure With its focus on vernacular architecture small scale historic sites single family homes and illegal housing this book expands our understanding of the everyday built environment in socialist cities Technologies for Sustainable Development Jean-Claude Bolay,Silvia Hostettler,Eileen Hazboun,2013-08-04 Whilst scientific research can be crucial in guiding innovation and development throughout the world it can be too detached from real world applications particularly in developing and emerging countries Technologies for Sustainable Development brings together the best 20 papers from the 2012 Conference of the EPFL UNESCO Chair in Technologies for Development with the aim to explore and discuss ways to link scientific research with development practices to assist practitioners and reply directly to social needs In order for technologies to be adopted it is not sufficient that they are low cost and affordable but also socially culturally and environmentally accepted by the intended users Technologies for Sustainable Development aims to explore and answer the following three questions What is an appropriate technology How can we ensure a sustainable integrated development What are the conditions for co creation and transfer of such technologies Focusing on the importance of improving working relationships between stakeholders researchers and decision makers between scientists and industrial sectors between academics and the population Technologies for Sustainable Development opens a dialogue necessary to create and implement the best solutions adapted to social demands **VERSUS: Heritage for Tomorrow** Correia, Mariana,Dipasquale, Letizia,Mecca, Saverio,2014 Vernacular architecture represents a great resource that has considerable potential to define principles for sustainable design and contemporary architecture This publication is the result

of an overall aim to produce a valuable tool for analysis regarding vernacular heritage through different assessments in order to define principles to consider for sustainable development This was possible through a comprehensive reflection on the principles established and the strategies to recognise in different world contexts The present publication was the result of an in depth approach by 46 authors from 12 countries concerned with the analysis and critical assessment of vernacular heritage and its sustainable perspective The book presents 8 chapters addressing operational definitions and synopses advances regarding the main areas of vernacular heritage contribution to sustainable architecture It also presents 15 chapters and 53 case studies of vernacular and contemporary approaches in all the 5 continents regarding urban architectural technical and constructive strategies and solutions VERSUS HERITAGE FOR TOMORROW Vernacular Knowledge for Sustainable Architecture is the result of a common effort undertaken by the partners ESG Escola Superior Gallaecia Portugal as Project leader CRAterre cole Nationale Sup rieure d Architecture de Grenoble France DIDA Universit degli Studi di Firenze Italy DICAAR Universit degli Studi di Cagliari Italy and UPV Universitat Polit cnica de Val ncia Spain This is the final outcome of VerSus an European project developed from 2012 to 2014 in the framework of the Culture 2007 2013 programme   Bioclimatic Architecture in Warm Climates Manuel Correia Guedes,Gustavo Cantuaria,2019-04-30 This book provides a comprehensive hands on approach to bioclimatic building design in Africa Bioclimatic design is at the core of urban sustainability and is a critical issue in Africa where imported building typologies are being used at an increasing pace disregarding the local context and consequently causing damage to the environment to the economy and to the culture itself This book provides a concise set of sustainable design guidelines to be applied in both new buildings and the refurbishment of old buildings and integrates bioclimatic design strategies with other sustainability issues such as cultural aspects affordability and urban planning Chapters are fully illustrated with photographs and drawings and include best practice examples and strategies making it accessible to engineers architects students and a broad range of professionals in the building industry Encompasses all climatic regions in Africa Integrates bioclimatic design strategies with other sustainability issues Discusses new design to refurbishment from urban to rural including office buildings residential tourism social housing and self building   Post-Western Histories of Architecture Pilar Maria Guerrieri,Marco Biraghi,2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues

and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies **Lineament: Material, Representation and the Physical Figure in Architectural Production** Gail Peter Borden,Michael Meredith,2017-08-29 This comprehensive catalogue of contemporary work examines the renewed investment in the relationship between representation materiality and architecture It assembles a range of diverse voices across various institutions practices generations and geographies through specific case studies that collectively present a broader theoretical intention *Sustainable and Regenerative Materials for Architecture* Will McLean,Pete Silver,2025-01-30 There is a creative explosion of work taking place in architecture and design schools exploring materials such as mycelium clay earth engineered timber bio based plastics and algae This handbook of low and no carbon materials for architects and designers focuses on sustainable materials their sourcing technical properties and the processes required for their use in architecture The book showcases new and rediscovered processes for material fabrication responsible sourcing and creative material design Material properties structural thermal fire health and life safety are described and case studies from around the world illustrate the inventive ways in which these materials have been deployed in the built environment The book is designed as an introduction to the exciting and rapidly changing world of construction materials With a better understanding of the social environmental and economic sustainability of any given material alongside its technical properties students of architecture can lead the change in responsible and creative material use CONTENTS 1 Materials overview 2 Extractive materials earth and clay concrete stone metals glass 3 Grown materials timber and cork paper hemp bamboo seaweed mycelium algae biopolymers wool
