Journal ,1963 **Rethinking International Organizations** Dennis Dijkzeul,Yves Beigbeder,2003-08-01 The management of international organizations is attracting growing attention Most of this attention is highly critical of both the UN system and International NGOs Sometimes this criticism lacks depth or reflects insufficient understanding of these organizations or is based on narrow and sometimes biased internal political concerns of a particular country International relations theory has insufficiently studied the type of linkages that these organizations provide between international decision making and Northern fundraising on the one hand and practical action in the South on the other As a result current theory too rarely focuses on the inner functioning of these organizations and is unable to explain the deficiencies and negative outcomes of their work While the authors identify and describe the pathologies of international organizations in for example international diplomacy fundraising and implementation they also stress positive elements such as their intermediary role The latter in particular could form the basis of more efficient and effective policies in addition to other recent trends also described in this volume that hold hope for a stronger functioning of these organizations in the future This book presents a long overdue empirical and theoretical overview of criticism on and cures for these organizations It provides a fundamental rethinking of current approaches to the management of international organizations Social Banks and the Future of Sustainable

Finance Olaf Weber,Sven Remer,2011-03-21 Social Banking describes a way of value driven banking that has a positive social and ecological impact at its heart as well as its own economic sustainability Although it has a long and successful history it has arguably never been more topical than it is now in the aftermath of the latest financial crisis Most Social Banks came out
