New Methods In Social Science Research Policy Sciences And Futures Research:

New Methods in Social Science Research Thomas Harrell Allen, 1978 The Rush to Policy Peter William House, Roger Roger Don Shull, Rush to Policy explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including The Art of Public Policy Analysis and with Roger D Shull Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation *Personnel Literature*, 1979 Rethinking Economics Stuart Birks, 2014-08-27 This brief responds to the criticism that mainstream economics is currently facing due to its heavy reliance on models and narrow range of quantitative research techniques It takes a broader view identifying issues that are also relevant for heterodox and pluralist approaches to economics By acknowledging that the world of theory is not the same as the reality that we are trying to understand the brief focuses on three paths that generally receive little attention These are from theory to the real world from theory to empirical analysis and from empirical results to policy application Each path highlights a range of related concerns and qualifications and the focus on these transitions provides a strong basis for critical evaluation of analyses and potentially more realistic results and recommendations It also provides a framework for synthesizing information from alternative schools of thought and across disciplines In addition the importance of framing and rhetoric is demonstrated The brief addresses philosophical and methodological issues using a clear non technical approach that can be easily understood by a non specialist audience **Public Policy Analysis** William N. Dunn, 2017-08-04 Public Policy Analysis the most widely cited book on the subject provides students with a comprehensive

The Management of Multilateral Organizations Dennis Dijkzeul, 2023-09-14 In which ways do UN organizations carry out their multilateral development cooperation individually as well as in cooperation with other organizations This study answers this question from a public management perspective Such a perspective has rarely been used in the study of international organizations In particular the theoretical topics of governance program management and coordination in and among UN organizations are reviewed More research on management may lead to adaptations within the UN system or information which will neutralize ill founded criticism An improved understanding of the internal functioning of UN organizations may enhance their efficiency and impact Moreover sometimes member states have such high expectations that the UN system cannot live up to them In this way UN members regulate their own disappointments with the UN system A critical assessment of the limitations under which the UN organizations operate may prevent some of these high hopes and thus forestall some member state dissatisfaction This study deals in particular with the United Nations Populations Fund UNFPA and the United Nations Children s Fund UNICEF and their coordinated behaviour in the Joint Consultative Group on Policy JCGP This work will interest and be useful for managers in multilateral organizations and academics studying the functioning of these organizations

Policymaking Under Adversity Yehezkel Dror, 2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he

believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's *Public Policymaking Reexamined* by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners

Planning in the Public Domain John Friedmann, 1987-10-21 John Friedmann addresses a central question of Western political theory how and to what extent history can be guided by reason In this comprehensive treatment of the relation of knowledge to action which he calls planning he traces the major intellectual traditions of planning thought and practice Three of these social reform policy analysis and social learning are primarily concerned with public management The fourth social mobilization draws on utopianism anarchism historical materialism and other radical thought and looks to the structural transformation of society from below After developing a basic vocabulary in Part One the author proceeds in Part Two to a critical history of each of the four planning traditions The story begins with the prophetic visions of Saint Simon and assesses the contributions of such diverse thinkers as Comte Marx Dewey Mannheim Tugwell Mumford Simon and Habermas It is carried forward in Part Three by Friedmann's own nontechnocratic dialectical approach to planning as a method for recovering political community

Library of Congress Catalogs Library of Congress, 1980 *The Study of the Future*, 1977 Encyclopedia of Policy Studies, Second Edition Stuart Nagel, 2020-08-18 This entirely updated and enlarged Second Edition of a landmark reference text continues to provide comprehensive coverage of every important aspect of policy studies discussing concepts methods utilization formation and implementation both internationally and across each level of government Social Sciences and Space Exploration, 1984

Social Sciences and Modern States Peter Wagner, 1991-03-28 Modern social sciences have over the past forty years been committed to the improvement of public policy More recently however doubts have arisen about the possibility and desirability of a policy oriented social science In this book leading specialists in the field analyze both the development and failings of policy oriented social science In contrast to other writings on the subject this volume presents a distinctively historical and comparative approach By looking at earlier periods the contributors demonstrate how policy orientation has been central to the emergence and evolution of the social sciences as a form of professional activity Case studies of rarely examined societies such as Poland Brazil and Japan further demonstrate the various ways in which intellectual developments have been shaped by the societal contexts in which they have emerged and how they have taken part in the shaping of these societies

Handbook of Research Design and Social Measurement Delbert Charles Miller, 1983 **Future Survey Annual 1986** Michael Marien, 1987-01-01 **Transdisciplinary Sustainability Studies** Katri Huutoniemi, Petri

Tapio, 2014-06-05 Arising out of human environment interaction sustainability problems resist disciplinary categories and simple solutions This book offers a fresh approach to practical and methodological concerns in transdisciplinary environmental and sustainability studies It illustrates methodological means by which researchers professionals and decision makers can address complex environmental issues While scientific reasoning is mostly guided by disciplinary traditions transdisciplinary research rests on other cognitive strategies As it does not have a ready made stance toward problems figuring out what the puzzle is and what the answer might look like are crucial aspects of transdisciplinary inquiry Through examples from environment and sustainability studies the volume discusses heuristic schemes that can give structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work
