**Minimal Architecture** Ilka Ruby,Andreas Ruby,Angeli

Sachs,Philip Ursprung,2003 What is minimalism Or more specifically what isn't In this fascinating aesthetic voyage three experts in the field of architecture and art history trace the development of minimalism as a style and offer perspectives on the directions the movement is taking as it morphs towards the future In double page spreads filled with color photographs of the most innovative minimalist projects this book illustrates three principal movements the traditional as practiced by Herzog the ambiguous in which architects not commonly associated with minimalism such as OMA or Zaha Hadid use it for specific projects and the subversive which appropriates minimalist concepts across a variety of new fields as exemplified in the architecture of Shigeru Ban or Lacaton Vassal New York Minimalism Aurora Cuito,2004-06 Minimalism in architecture has existed in New York for over fifty years While other styles have come and gone the simple perfect expression of space and form that minimalism affords have perennially informed New York spaces residential commercial and public alike Now that people's attention is again focused not only on the New York skyline but also on the history and influence of Big Apple buildings the time is right for this homage that presents twenty two of the most representative minimalist projects in New York Each featured project not only includes exquisite photography but also brief reminiscences from each architect reflecting on the spirit of the city as revealed in their works A final discussion of New York's architectural icons rounds out the book New York Minimalism is a fascinating journey through recent history's most compelling examples of residential commercial and public architecture in New York a celebration of architectural achievement in the city that never sleeps

**Frank Gehry** Jeremy Gilbert-Rolfe, Frank O. Gehry,2002 This book focuses on two projects Gehry's unrealised proposal for the rehabilitation of Berlin's Museum Island and his soon to be completed Disney Concert Hall in Los Angeles *Art and architecture of the late 20th century* Dorothea Eimert,2024-11-12 During the second half of the twentieth century in a world transformed by international tensions the centre of artistic creation shifted from Europe to the United States In a world where major countries asserted their power individualism now ruled The art world was a perfect example of this phenomenon even now the emphasis of creativity is placed on the individual instead of the trend Moreover growing globalization and the various types of media have facilitated a multiplication of means and offered artists new possibilities Now at the dawn of the twenty first century everything has the potential to be art and art more than ever is the opportunity to take risks to present and transform almost anything This work invites the reader to discover the diversity of this most recent artistic environment **Minimalism** Hartmut Obendorf,2009-06-12 The notion of Minimalism is proposed as a theoretical tool supporting a more differentiated understanding of reduction and thus forms a standpoint that allows definition of aspects of simplicity Possible uses of the notion of minimalism in the field of human computer interaction design

are examined both from a theoretical and empirical viewpoint giving a range of results Minimalism defines a radical and potentially useful perspective for design analysis The empirical examples show that it has also proven to be a useful tool for generating and modifying concrete design techniques Divided into four parts this book traces the development of minimalism defines the four types of minimalism in interaction design looks at how to apply it and finishes with some conclusions *Art of the 20th century* Dorothea Eimert,2016-03-09 The 20th century was a revolutionary period in art history In the span of a few short years Modernism exploded into being disrupting centuries of classical figurative tradition to create something entirely new This astoundingly thorough survey of art s modern era showcases all of the key artistic movements of the 20th century from Fauvism to Pop Art featuring illustrative examples of some of the most renowned works of the era along with illuminating companion essays by expert critics and art historians A vivid window into the collective psyche of the modern world s great artists *Art of the 20th Century* is a must have for any fan of contemporary art *The Fractal Dimension of Architecture* Michael J. Ostwald,Josephine Vaughan,2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design **Albert Frey, Architect** Joseph Rosa,1999-11 Lavishly illustrated with over 200 duotone plates many by noted photographer Julius Shulman **Visual Merchandising** Louisa Iarocci,2017-07-05 Situated at the crossroads of visual culture and consumerism this essay collection examines visual merchandising as both a business and an art It seeks to challenge that scholarly ambivalence that often celebrates the spectacle but denies the agenda of consumerism The volume considers strategies in the imaging of selling from the mid nineteenth century to the present in terms of the visual interaction that occurs between the commodity and the consumer and between body and space Under the categories of Promotion Product and Place contributors to the volume examine the strategies in the presentation of retail goods and environments that range from print advertising to product design to store display and architecture *Visual Merchandising The Image of Selling* is located directly at the nexus of business practice and cultural myth where the spectator never loses sight of their status as buyer and the object of desire is always still a commodity *Minimalist Sculptures* Everett Sinclair,AI,2025-02-26

Minimalist Sculptures explores the minimalist movement in art focusing on three dimensional works that strip away ornamentation to emphasize form material and space This approach challenged traditional art by shifting focus from representation to direct sensory experience For example minimalist sculptures often utilize industrial materials and serial repetition to create a sense of objectivity The book highlights how this movement prompted viewers to reconsider their perceptions of art and its surrounding environment The book examines the philosophical underpinnings key figures and lasting impact of minimalist principles It traces influences from abstract expressionism to industrial design demystifying concepts without requiring prior art knowledge Chapters are dedicated to pivotal artists like Donald Judd and Agnes Martin analyzing their philosophies and works while emphasizing the influence on movements and fields beyond art By focusing on simplicity minimalist sculpture amplifies awareness of space form and has left an indelible mark on visual culture *Modern Architecture Through Case Studies 1945 to 1990* Peter Blundell Jones, Eamonn Canniffe, 2012-08-21 Once again new interpretations are presented of some of the most famous architecture of the period Work by lesser known architects whose influence and role have been overlooked by conventional histories of the subject is discussed The case study structure allows each example to be discussed and used as a springboard to explore different theoretical approaches Filled with beautiful photographs plans and architect s drawings this is a clear and accessible discussion on a period of architecture that engages many questions still under debate in architecture today Innovations in Hospital Architecture Stephen Verderber, 2010-03-31 Captures key developments in the field of sustainable hospital architecture The Places and Spaces of Fashion, 1800-2007 John Potvin, 2013-01-11 The Places and Spaces of Fashion 1800 2007 brings together art design fashion and a much neglected concern for its spatial realities The spaces and places of fashion have often been overlooked in the writing of fashion history and visual culture More often than not however these environments mitigate control inform and enhance how fashion is experienced performed consumed seen exhibited purchased appreciated and of course displayed Space as this volume attempts to illustrate is itself a representational strategy on par with and influencing the visibility and visibility of fashion Innovative and challenging the essays in this volume explore various physical and conceptual spaces moving from physical environments to the two dimensional with paintings illustrations and photographs to chart similarities differences and complex nuanced relationships between environments fashion identities and visibility The volume also navigates various sites both permanent and temporary of production circulation exhibition consumption and promotion of fashion that define meaning and knowledge about a culture or individual by providing for a bond between embodied consumers spectators and fashion objects The Places and Spaces of Fashion 1800 2007 is a compelling project with a thematic theoretical and historiographic approach that is at once both focused yet far reaching and original in its implications The volume engages with questions attending to the modern condition by seamlessly weaving interdisciplinary discussions of the visual with material culture to explore the spatial dimension s of fashion Some of the essays explore new

and exciting spaces while others offer compelling revisionary analyses of relatively known sources     *Architecture* ,2005

**Contemporary Architecture** Marta Tobolczyk,2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools

**50 Architecture Ideas You Really Need to Know** Philip Wilkinson,2023-09-28 In a series of 50 accessible essays Philip Wilkinson introduces architectural movements and styles throughout history as well as describing some of the greatest architects most important and representative works From the Pyramids of Giza to the Guggenheim the classical orders of Vitruvius to the most recent contemporary trends today 50 Architecture Ideas You Really Need to Know is a complete introduction to the most important architectural concepts in history

**Minimalist Architecture** Franco Bertoni,2002-08 Minimalism as a concept was first used in the world of art to characterize the work of Donald Judd Sol Le Witt and several others Soon afterwards this creative approach began to take hold in architecture and the works of many contemporary architects are rooted in Minimalism to a greater or lesser degree This publication goes to the heart of this trend looking first at Loos Wittgenstein Mies van der Rohe and Asplund the definitive precursors of Minimalism Then the works of today s protagonists who include Tadao Ando Lu s Barrag n Alberto Campo Baeza A G Fronzoni Michael Gabellini John Pawson Claudio Silvestrin Eduardo Souto Moura and Peter Zumthor are covered extensively A selection of texts contributed by the featured architects conclude the volume With a clear even austere presentation this book not only reflects its contents but provides a comprehensive overview of Minimalism one of the dominant trends in contemporary architecture
