higher fourth dimension of space were central to the development of modern art. The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence. That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists, Italian Futurists and Marcel Duchamp to Max Weber, Kazimir Malevich and the artists of De Stijl and Surrealism. In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000. Although largely eclipsed by relativity theory beginning in the 1920s, the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s. In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics. Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller, Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak.

Essays on the Evolutionary-Synthetic Theory of Language Alexey

Koshelev, 2020-04-14 This book implements a multidisciplinary approach in describing language both in its ontogenetic development and in its close interrelationship with other human subsystems such as thought, memory and activity with a focus on the semantic component of the evolutionary synthetic theory. The volume analyzes among others the mechanisms for grammatical polysemy and brings to light the structural unity of artefact and natural concepts such as CHAIR, ROAD, LAKE, RIVER, TREE. Additionally, object and motor concepts are defined in terms of the language of thought and their representation in neurobiological memory codes is discussed. Finally, the hierarchic structure of basic meanings of concrete nouns is shown to arise as a result of their step by step development in ontogeny.

The Kaleidoscopic Vision of Malcolm Lowry Nigel H.

Foxcroft, 2019-10-28 The Kaleidoscopic Vision of Malcolm Lowry: Souls and Shamans is an interdisciplinary investigation of the multifaceted intuitive insight of international modernist writer Malcolm Lowry through an analysis of a selection of works and correspondence. Nigel H. Foxcroft analyzes his psychogeographic perception of the interconnectedness of East-West cultures and civilizations in terms of pre-Columbian Mesoamerican customs, the Mexican Day of the Dead festival, the Atlantis myth, surrealism and Russian literary, filmic and political influences. He traces his intellectual efforts in pursuing philosophical and cosmic knowledge to bridge the gap between the natural sciences and the humanities. This monograph identifies Lowry's attempts to reintegrate modernism with primitivism in his quest for an elixir of life for the survival of humanity on the brink of global catastrophe as indicated in *In Ballast to the White Sea* and *Under the Volcano*. It also examines his sustained endeavors to attain psychoanalytical atonement with himself and his environment in *Ultramarine*, *Swinging the Maelstrom*, *The Forest Path to the Spring* and *October Ferry to Gabriola*. It also discusses the odyssey on which Lowry and his literary protagonists embark to connect with the past and to gain a deeper insight into human nature in *Dark as the Grave Wherein My Friend is Laid*, *La Mordida* and *Through the Panama*. Scholars of cultural studies, history, humanities, Latin American

Joseph Brodsky and the Creation of Exile David M. Bethea,2014-07-14 Joseph Brodsky one of the most prominent contemporary American poets is also among the finest living poets in the Russian language Nevertheless his poetry and the crucial bilingual dimension of his poetic world are still insufficiently understood by Western audiences How did the Russian born Brodsky arrive at his present status as an international man of letters and American poet laureate Has he been created by his bilingual experience or has he fashioned the bilingual self as a necessary precondition for writing poetry in the first place Here David Bethea suggests that the key to Brodsky perhaps the last of the great Russian poets in the bardic mode is in his relation to others or the Other Brodsky s master trope turns out to be triangular vision the tendency to mediate a prior model Dante with a closer model Mandelstam in the creation of a palimpsest like text in which the poet is implicated as a triangulated hybrid of these earlier incarnations In pursuing this theme Bethea compares and contrasts Brodsky to the poet s favorite models Donne Auden Mandelstam and Tsvetaeva and analyzes his fundamental differences with Nabokov the only Russian exile of Brodsky s stature to rival him as a bilingual phenomenon Various critical paradigms are used throughout the study as foils to Brodsky s thinking Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the

Thomas Rice compellingly argues that James Joyce's work resists postmodernist approaches of ambiguity Joyce never abandoned his conviction that reality exists regardless of the human ability to represent it Placing Joyce in his cultural context Rice first traces the influence of Euclidean and non Euclidean geometries on *Dubliners* and *A Portrait of the Artist as a Young Man* He then demonstrates that when later innovations in science transformed entire worldviews Joyce recognized conventional literary modes of representation as offering only arbitrary constructions of this reality Joyce responded in *Ulysses* by experimenting with perspective embedding design and affirming the existence of reality Rice contends that *Ulysses* presages the multiple tensions of chaos theory likewise chaos theory can serve as a model for understanding *Ulysses* In *Finnegans Wake* Joyce consummates his vision and anticipates the theories of complexity science through a dynamic approximation of reality
