 important territory showing how firms can generate and nurture ideas by using the concepts introduced in the first book

Weaving together lessons from such international leaders as Siemens Unilever Skandia and Sony along with their own first hand consulting experiences the authors introduce knowledge enabling the overall set of organizational activities that promote knowledge creation and demonstrate its power to transform an organization s knowledge into value creating actions They describe the five key knowledge enablers and outline what it takes to instill a knowledge vision manage conversations mobilize knowledge activists create the right context for knowledge creation and globalize local knowledge The authors stress that knowledge creation must be more than the exclusive purview of one individual or designated knowledge officer Indeed it demands new roles and responsibilities for everyone in the organization from the elite in the executive suite to the frontline workers on the shop floor Whether an activist a caring expert or a corporate epistemologist who focuses on the theory of knowledge itself everyone in an organization has a vital role to play in making care an integral part of the everyday experience in supporting nurturing and encouraging microcommunities of innovation and fun and in creating a shared space where knowledge is created exchanged and used for sustained competitive advantage This much anticipated sequel puts practical tools into the hands of managers and executives who are struggling to unleash the power of knowledge in their organization
