The Professional Knowledge Base of Science Teaching Deborah Corrigan, Justin Dillon, Richard Gunstone, 2011-03-01 Over the past twenty years much has been written about the knowledge bases thought necessary to teach science Shulman has outlined seven knowledge domains needed for teaching and others such as Tamir have proposed somewhat similar domains of knowledge specifically for science teachers Aspects of this knowledge have changed because of shifts in curriculum thinking and the current trends in science education have seen a sharp increase in the significance of the knowledge bases The development

of a standards based approach to the quality of science teaching has become common in the Western world and phrases such as evidence based practice have been tossed around in the attempt to measure such quality The Professional Knowledge Base of Science Teaching explores the knowledge bases considered necessary for science teaching It brings together a number of researchers who have worked with science teachers and they address what constitutes evidence of high quality science teaching on what basis such evidence can be judged and how such evidence reflects the knowledge basis of the modern day professional science teacher This is the second book produced from the Monash University King s College London International Centre for the Study of Science and Mathematics Curriculum The first book presented a big picture of what science education might be like if values once again become central while this book explores what classroom practices may look like based on such a big picture Creating Knowledge Locations in Cities Willem van Winden,Luis de
