Is Dietary Knowledge Enough? Lisa Mancino, 2010-02 Poor diets and rising obesity rates among Americans have persisted despite increased awareness and publicity regarding the benefits of a healthy lifestyle This analysis of consumer food choice developed a consumer demand model to illustrate how both longterm health objectives and immediate visceral influences long intervals between meals and away from home eating can affect individuals food choices The model predicts that dietary knowledge will have less influence on food choices in the face of immediate visceral factors Longer intervals between meals and consumption of more food away from home both contribute to one s consuming more calories and more calories from solid fats alcohol and added sugars Charts and tables

Knowledge and Identity Gabrielle Iverson, Brian Davies, John Fitz, 2010-11-23 What in the digital era is knowledge Who has knowledge and whose knowledge has value Drawing on aspects of Bernstein's work that have attracted an international following for many years the international contributors to this book raise questions about knowledge production and subjectivity in times dominated by

market forces privatisation and new forms of state regulation Knowledge and the Economy Peter Meusburger, Johannes Glückler, Martina Meskioui, 2013-05-23 The broad spectrum of topics surrounding what is termed the knowledge economy has attracted increasing attention from the scientific community in recent years The nature of knowledge intensive industries the spatiality of knowledge the role of proximity and distance in generating functional knowledge the transfer of knowledge via networks and the complex interplay between knowledge location and economic development are all live academic issues This book the fifth volume in Springer's Knowledge and Space series focuses on the last of these the multiple relationships between knowledge the economy and space It reflects the conceptual and methodological multidisciplinary emerging from this scholarship yet where there has up to now been a notable lack of communication between some of the contributing disciplines resulting in lexical and other confusions this volume brings concord and to foster interdisciplinarity These complications have been especially evident in our understanding of the spatiality of knowledge the part that spatial contexts play in knowledge creation and diffusion and the relevance of face to face contacts all of which are addressed in these pages The material here is grouped into four sections knowledge creation and economy knowledge and economic development knowledge and networks and knowledge and clusters It assembles new concepts and original empirical research from geography economics sociology international business relations and management The book addresses a varied audience interested in the historical and spatial foundations of the knowledge economy and is intended to bridge some of the gaps between the differing approaches to research on knowledge the economy and space **Advanced Biosignal Processing**

Amine Nait-Ali, 2009-04-21 Generally speaking Biosignals refer to signals recorded from the human body They can be either electrical e.g. Electrocardiogram ECG Electroencephalogram EEG Electromyogram EMG etc or non electrical e.g. breathing movements etc The acquisition and processing of such signals play an important role in clinical routines They are usually considered as major indicators which provide clinicians and physicians with useful information during diagnostic and monitoring processes In some applications the purpose is not necessarily medical It may also be industrial For instance a real time EEG system analysis can be used to control and analyze the vigilance of a car driver In this case the purpose of such a system basically consists of preventing crash risks Furthermore in certain other applications a set of biosignals e.g. ECG respiratory signal EEG etc can be used to control or analyze human emotions This is the case of the famous polygraph system also known as the lie detector the efficiency of which remains open to debate Thus when one is dealing with biosignals special attention must be given to their acquisition their analysis and their processing capabilities which constitute the final stage preceding the clinical diagnosis Naturally the diagnosis is based on the information provided by the processing system
