New Palgrave Dictionary Of Economics Volume 1:

The New Palgrave: a Dictionary of Economics, Volume 1; A to D. ed Eatwell, ed Milgate, ed Newman, Robert Harry Inglis Palgrave, 1988 **The Oxford Handbook of Post-Keynesian Economics, Volume 1** Geoffrey Colin Harcourt, Peter Kriesler, 2013-07 These two volumes cover the principal areas to which Post Keynesian economists have made distinctive contributions The contents include the significant criticism by Post Keynesians of mainstream economics but the emphasis is on positive Post Keynesian analysis of the economic problems of the modern world and of policies with which to tackle them

Handbook on the History of Economic Analysis Volume I Gilbert Faccarello, Heinz D. Kurz, 2016-07-27 Volume I contains original biographical profiles of many of the most important and influential economists from the seventeenth century to the present day These inform the reader about their lives works and impact on the further development of the discipline The emphasis is on their lasting contributions to our understanding of the complex system known as the economy The entries also shed light on the means and ways in which the functioning of this system can be improved and its dysfunction reduced **Freedom and Happiness in Economic Thought and Philosophy** Ragip Ege, Herrade Igersheim, 2012-04-27 Starting from a distinction made by the American philosopher John Rawls in 2000 between two kinds of liberalism liberalism of freedom and liberalism of happiness this book presents a range of articles by economists and philosophers debating the most fundamental aspects of the subject These include the exact significance of Rawls distinction and how it can be related to European political philosophy on the one hand and to utilitarianism on the other hand the various definitions of happiness and freedom and their implications and the informational basis of individual preferences The objectives of the book are twofold first it is devoted to a thorough analysis of the founding texts of both liberalisms It aims to determine the logic of selection of the concepts which these traditions consider as relevant The Kantian pair Reasonable Rational can be seen as the basis on which these concepts are defined our final concern being to reveal the profound relations of complementarity between them we call it reconciliation Secondly we consider a fundamental issue of welfare economics how to appraise individual preferences in light of the Rawlsian distinction It is emphasized that neither a criterion based on liberalism of freedom by itself nor an evaluation in terms of liberalism of happiness by itself exhausts the question of utility One must combine both aspects in order to cope with that issue To do so it is claimed that one can resort to the concept of metaranking of preferences All the contributions included in this book are the outcomes of a collective research project of three years The contributors come from a variety of backgrounds and yet are unified in developing a specific position about freedom and happiness This book should be of interest to those focusing on the history of economic thought as well as moral political and economic philosophy **Inequality and Stagnation** Santiago Capraro, Carlo Panico, Luis Torres-González, 2024-08-02 The book examines how the outgrowth of the financial industry has contributed to the recent tendencies towards inequality and stagnation It proposes a monetary interpretation of these events using a Classical

Keynesian theoretical approach derived from the work of Keynes and Sraffa The approach moves from the distributive conflicts among economic and social groups presuming that they influence the legislation shaping the organisation of the markets and the policy of the authorities It argues that the degrees of liquidity of assets which reflect the individual perceptions of their future prices ultimately depend on the organisation of the markets and policy decisions The development of his work persuaded Keynes that it was necessary to revolutionise the scientific foundations of economic discipline to effectively interpret events and recommend policies He consequently introduced in 1932 a monetary theory of production Following these lines Sraffa proposed in *Production of Commodities* to take the rate of interest as an independent variable in the theory of distribution Using the Classical Keynesian approach the book shows how the changes in legislation and policies since the abandonment of the Bretton Woods agreements have caused the outgrowth of finance and how these alterations have raised financial instability It identifies various competitive mechanisms through which financial events can affect income distribution and growth describing how they have triggered the recent tendencies towards inequality and stagnation This book is essential reading for researchers studying the interactions among financial markets distribution and growth

Neuroeconomics Paul E. Phillips, Jeansok J. Kim, Daeyeol Lee, The brain is the organ of decision making and evolved to maximize the outcomes desirable for the survival and reproduction of the species Compared to the sensory and motor functions of the brain however the process of decision making is less accessible to direct experimental manipulations and hence requires more careful theoretical analyses Indeed the principle of optimality and frequent departures of human behaviors from those predicted for optimal rational decision makers have long been studied experimentally as well as theoretically However it is only recently that neurobiological studies of decision making started exploiting the framework previously developed in economics and psychology systematically This cross disciplinary research program known as neuroeconomics has already been enormously successful Increasingly neuroscientists benefit from the studies of utility theory game theory prospect theory and reinforcement learning theory and contribute to the refinement of such theories by providing more relevant empirical data This Research Topic will showcase the recent advances in neuroeconomics that combine economic and behavioral analyses in neurobiological studies of value based decision making

standards and scientific research practice journals qualities Being international and inter disciplinary in scope GBMR seeks to provide a platform for debate among diverse academic and practitioner communities who address a broad area of business and management issues across the globe This peer reviewed journal is currently indexed in EBSCO and Gale *Economic Dynamics with Memory* Vasily E. Tarasov,Valentina V. Tarasova,2021-01-18 This book presents the applications of fractional calculus fractional operators of non integer orders and fractional differential equations in describing economic dynamics with long memory Generalizations of basic economic concepts notions and methods for the economic processes with memory are suggested New micro and macroeconomic models with continuous time are proposed to describe the fractional economic dynamics with long memory as well The Mathematics of Arbitrage Freddy Delbaen,Walter Schachermayer,2006-02-14 Proof of the Fundamental Theorem of Asset Pricing in its general form by Delbaen and Schachermayer was a milestone in the history of modern mathematical finance and now forms the cornerstone of this book Puts into book format a series of major results due mostly to the authors of this book Embeds highest level research results into a treatment amenable to graduate students with introductory explanatory background Awaited in the quantitative finance community The Encyclopedia of Public Choice Charles Rowley,Friedrich Schneider,2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War **Networks, Markets & People** Francesco Calabrò,Livia Madureira,Francesco Carlo Morabito,María José Piñeira Mantiñán,2024-11-25 This book aims to address the issue of the effects that the contemporary environmental technological social and economic global challenges produce on settlement systems communities institutions and enterprises It presents a multi disciplinary scientific debate on the new frontiers of strategic and spatial planning decision support tools and ecological design within the urban rural areas networks and the metropolitan cities of the Mediterranean basin The book

focuses on five topics Cultural Heritage as driver of development for territories and tourism destinations Ecosystems people nature cohesion and urban rural relationships Decision Support Systems for urban regeneration Policies and practices of cohesion and social innovation for inclusive cities Green buildings and sustainable solutions for ecological transition In addition the book hosts the papers of a special session intercluster promoted by Italian Society of Architectural Technology SITdA The book benefits all researchers practitioners and policymakers interested in the issue applied to metropolitan cities and marginal areas

Randomized Control Trials in the Field of Development Florent Bédécarrats, Isabelle Guérin, François Roubaud, 2020-09-17 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations In October 2019 Abhijit Banerjee Esther Duflo and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty But what is the exact scope of their experimental method known as randomized control trials RCTs Which sorts of questions are RCTs able to address and which do they fail to answer The first of its kind Randomized Control Trials in the Field of Development A Critical Perspective provides answers to these questions explaining how RCTs work what they can achieve why they sometimes fail how they can be improved and why other methods are both useful and necessary Bringing together leading specialists in the field from a range of backgrounds and disciplines economics econometrics mathematics statistics political economy socioeconomics anthropology philosophy global health epidemiology and medicine it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development Looking beyond the epistemological political and ethical differences underlying many of the disagreements surrounding RCTs it explores the implementation of RCTs on the ground outside of their ideal theoretical conditions and reveals some unsuspected uses and effects their disruptive potential but also their political uses The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method's narrow scope and its success while also proposing improvements and alternatives Without disputing the contribution of RCTs to scientific knowledge Randomized Control Trials in the Field of Development warns against the potential dangers of their excessive use arguing that the best use for RCTs is not necessarily that which immediately springs to mind Written in plain language this book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development

Markets, Unemployment and Economic Policy Philip Arestis, Gabriel Palma, Malcolm Sawyer, 2005-10-19 In this volume more than 40 leading economists pay tribute to and critically evaluate Geoff Harcourt's work Contributors include Tony Atkinson Tony Lawson Edward Nell and Ian Steedman

Monetary Policy Peter Bofinger, Julian Reischle, Andrea Schächter, 2001 This book provides an in depth description and analysis of monetary policy in Europe and the United States Unusually for a volume in the field it focuses on actual monetary policy targets institutions strategies and instruments but traditional and contemporary

theoretical approaches to monetary policy form the basis for each chapter Concentrating specifically on the European Central Bank Monetary Policy offers one of the first comprehensive guides to understanding the targets strategy and instruments of the ECB In the past many books have presented mere descriptions of the institutional framework without providing a theoretical framework while others have dealt mainly with theoretical aspects thus neglecting the policy implications of their analysis By combining a theoretical with a policy oriented approach Peter Bofinger succeeds in closing this gap in the monetary policy literature As a result his book will appeal to a broad readership including investment bankers and other professional investors central bankers and scholars working in the field **Market as a Weapon** Anton

Oleinik,2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power Changes were initiated and implemented by people vested with power Power convention and trust can all support coordination However in the Russian institutional context power tends not only to supplement the alternative coordination mechanisms but also to substitute them Power can be used to solve problems related to social action by merging two or several centers of decision making into one The actor vested with power decides exactly how coordination and adjustment can be achieved This path breaking volume shows how power turns into a unique coordination mechanism and what are consequences of such transformation for everyday life and businesses Market as a Weapon focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies Particular emphasis is put on domination by virtue of a constellation interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies Instead of being a liberating force the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book Both qualitative and quantitative data including more than one hundred in depth interviews with experts state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book **Hellenic Roots of**

Justice and Inequality and a Jewish Ideological Alternative in Economic Science David Vázquez-Guzmán,2023-05-12 This book explores the philosophical foundations of what we today understand as justice Here we understand the present tendency in the world to see everything as a class struggle yet the lack of effectiveness of that view in social arrangements and for that a renewed Jewish perspective is offered instead The book argues that the classical understanding of equality as justice is tainted by an anti Semitic portrayal of richness which is completely rejected here From an economic methodology perspective it discusses how our present Hellenic view of equality does not do much to help those in need and proposes a new mechanism of poverty alleviation based on generalized responsibility to help vulnerable neighbors such as orphans widows aliens the elderly the sick and the oppressed then putting the ordinary citizen at the center of social responsibility

Alternative Institutional Structures Sandra Batie, Nicholas Mercurio, 2008-06-16 This book is the outcome of a workshop at Michigan State University on the career of A Allan Schmid offering a collection of original essays that explore several approaches to understanding the impact of alternative legal economic institutions **Leading Contemporary Economists** Steven Pressman, 2008-10 This collection of essays offers an extensive critical review of the major contributions of key figures in contemporary heterodox economics including comprehensive bibliographies of their writings and lists of vital secondary material
