E-Enabled Operations Management Jean-Pierre Briffaut, 2015-06-29 Although the theory of operations management has been presented in many textbooks published in the last two decades, the subject of e-enabled operations management is rather short of easily accessible literature. The approach to operations management described in this book is unusual with respect to what is found in standard textbooks. Information and Communication Technologies (ICT) impact the ways firms are organised and managed, and as a consequence, change the practical means used to conduct business operations. The features of this book are threefold: System approach to business modelling, Business activities, controlling functions, and associated information systems are described within a coherent analytical system framework, allowing a clear understanding of the various current control and costing concepts. Operations costing is not usually included in textbooks as part of operations management, but it should be. Cost targeting has become an integral part of good practice of business management. Validity of models: Apparently simple models are analyzed in depth. Students must be fully aware of the

assumptions made when models are formulated and of their conditions of validity Applying a model implies automatically that assumptions of a sort are taken for granted Logistics procurement and quality management These three business functions are critical key success factors for managing e enabled supply chains from suppliers to customers That is why their main tools are introduced in this document

Entrepreneurship: New Perspectives in a Global Age Ann Dupuis, 2018-05-08 This title was first published in 2003 This book provides an innovative fresh approach to entrepreneurship It puts forward a flexible expansive conceptualization of the continuum of entrepreneurial behaviour and integrates context culture social networks and entrepreneurship as an embedded activity Motivated by a desire to bridge traditional academic boundaries the editors craft a heterodox perspective which interweaves strands from feminist and new institutional economics sociology management finance marketing and social policy Contemporary themes of major significance highlighted include the importance of new technology ethics culture and identity and entrepreneurship for indigenous younger and older people as distinct groups

Contemporary Strategic Marketing Ross Brennan, Paul Baines, Paul Garneau, 2007-10-12 An extremely fluent and effective text designed to be a complete resource for single semester modules this new edition has a unique combination of text case studies The emphasis is on practicality and the text encourages the student to engage with the debate itself and not just the theory Also available is a companion website with extra features to accompany the text please take a look by clicking below <http://www.palgrave.com/business/brennan>

New Insights on Trust in Business-to-Business Relationships Houcine Akrou, Karine Raies, Arch G. Woodside, 2019-08-15 New Insights on Trust in Business to Business Relationships provides readers with advanced original insights on trust antecedents processes and consequences within the B2B marketing context and offers practical tools alongside suggestions for future research

The Experience Logic as a New Perspective for Marketing Management Tonino Pencarelli, Fabio Forlani, 2018-04-13 This book provides stimulating insights into the ways in which the adoption of experience logic can revitalize marketing perspectives and stimulate novel approaches to the creation and delivery of value The first part of the book which has a theoretical focus reviews the international literature and offers conceptual observations on the experiential perspective Suggestions are made on how experience logic can act as a new driver for the management of marketing processes in firms within the context of the experience economy In the second part of the book attention turns to the applications of experience logic in different sectors including tourism commerce culture

and trade shows Company specific examples of benefits of the experiential approach are also explored in case studies on gift box providers marketing of traditional local products and the cosmetics industry The book will be of particular interest for marketing specialists but will additionally be of value for managers in private companies and public bodies who wish to enhance their marketing methods
