International Relations and World Politics Kahlil Newton, 2019-09-01

The world in which we are living in is passing through a great period of transition. The human history is undergoing new experiences and experiments. It is also to be noted in the study of international relations and world politics. While one must duly recognise the uniqueness of certain events and developments, we are more concerned with the processes and patterns of behaviour found in the world politics. The importance of the study of international relations is more significant and urgent because the world is getting increasingly interdependent. Relations among states have an ever-widening and deepening impact on the economic, intellectual and social conditions of our existence. The study of international relations as an academic discipline would solve all over internal and international problems. You can analyse and explain contemporary international phenomena including identifying and assessing the positions and interests of key international subjects.

Introduction to Social Work Lisa E. Cox, Carolyn J. Tice, Dennis D. Long, 2015-01-21

This text presents a framework for understanding the historical development of social work, the key figures influencing social work history, the various practice settings and the type of work performed.

Foundations of Mixed Methods Research Charles Teddlie, Abbas Tashakkori, 2008-09-18

Foundations of Mixed Methods Research is the first comprehensive textbook on using mixed methods in the social sciences, written by two leading names in the field. Mixed methodology, combining quantitative and qualitative approaches, has become an increasingly popular way of both researching and teaching methodology across the social sciences, and students across these fields are expected to be proficient in both quantitative and qualitative techniques. This text begins with an introduction to and overview of the development of mixed methodology and then takes students through all aspects of working with mixed methods, from research design and data collection through to analysis and conclusions.
