Understanding New Media Kim H. Veltman, 2006 This book outlines the development currently underway in the technology of new media and looks further to examine the unforeseen effects of this phenomenon on our culture our philosophies and our spiritual outlook

Software Theory Federica Frabetti, 2014-11-17 The cultural and philosophical study of software is crucial both within and outside of the university at an international level and across disciplines Software is increasingly considered the focus of digital media studies because of the perceived need to address the invisibility ubiquity and power of digital media Yet software remains quite obscure to students and scholars in media studies the social sciences and the humanities This unique book engages directly in close readings of technical texts and computer code in order to show how software works and in what sense it can be considered constitutive of culture and even of human thought Federica Frabetti combines this with an engagement with thinkers such as Bernard Steigler and Jacques Derrida to problematize the very nature of the conceptual system on which software is based and which has shaped its historical evolution The book argues for a radical demystification of software and digital technologies by addressing the mystery that surrounds its function and that affects our comprehension of its relationship between technology philosophy culture and society

Media in Mind Daniel Reynolds, 2019 Where do you end and where do media begin In *Media in Mind* author Daniel Reynolds draws upon naturalist philosophies of the mind from John Dewey through contemporary theories of embodied and extended cognition to make the case that the lines separating media from the minds of their users are not blurry or variable so much as they never existed to begin with Through analyses of films and video games from 1900 to the present *Media in Mind* shows how media forms and technologies challenge dominant models of perception and mental representation and how they complicate theoretical understanding of concepts like the platform and the interface In order to do justice to the profound and literally mind changing power of media Reynolds argues we need to think not so much about the relationship between media and the mind as about the roles that media play in our minds Through this crucial distinction *Media in Mind* surveys more than a century of media theory to illustrate the

ways that scholars of film and digital media have situated and reconsidered a series of divisions between media user and world and how these conceptual divisions have reflected and inflected their ways of understanding the mind

Design Strategies for Reimagining the City Linda Matthews, 2022-06-24 Design Strategies for Reimagining the City is situated between projective geometry optical science and architectural design It draws together seemingly unrelated fields in a series of new digital design tools and techniques underpinned by tested prototypes The book reveals how the relationship between architectural design and the ubiquitous urban camera can be used to question established structures of control and ownership inherent within the visual model of the Western canon Using key moments from the broad trajectory of historical and contemporary representational mechanisms and techniques it describes the image's impact on city form from the inception of linear perspective geometry to the digital turn The discussion draws upon combined fields of digital geometry the pictorial adaptation of human optical cues of colour brightness and shape and modern image capture technology webcams mobile phones and UAVs to demonstrate how the permeation of contemporary urban space by digital networks calls for new architectural design tools and techniques A series of speculative drawings and architectural interventions that apply the new design tools and techniques complete the book Aimed at researchers academics and upper level students in digital design and theory it makes a timely contribution to the ongoing and broadly debated relationship between representation and architecture

Google Earth: Outreach and Activism Catherine Summerhayes, 2016-08-25 In order to be able to communicate and engage with each other via new communicative spaces such as Google Earth we need to understand as much as possible about how they work as cultural texts how and why we make them and how we respond to them Launched in 2005 Google Earth is a virtual globe map and geographical information program mapping the Earth by the superimposition of images obtained from satellite imagery and aerial photography By addressing the sociopolitical issues at stake in society's use of social websites the author provides the first ever extended close reading of Google Earth as a powerful player in the communication realm of social media By grounding the context of its military pre history its construction its links to other similar world making sites such as Google Maps and how it is perceived critically by social scientists it is imperative to understand how social networking and information sites work in socio and geo political contexts if society is to use these sites effectively and for the public good

Affective Intensities and Evolving Horror Forms Adam Daniel, 2020-02-03 Horror cinema is a genre that is undergoing constant evolution from the sub genre of found footage to post cinematic new media forms such as Youtube horror horror video games and cinematic virtual reality horror By investigating how these new forms alter the dynamics of spectatorship this book charts how cinema's affective capacities have shifted in relation to these modifications in the forms of cinematic horror It applies a rich theoretical synthesis of phenomenological and Deleuzian approaches to a number of case studies including films like The Blair Witch Project Paranormal Activity and Creep as well as video games such as Alien Isolation and new media forms such as Youtube horror

and virtual reality horror The Interface Effect Alexander R. Galloway, 2013-05-20 Interfaces are back or perhaps they never left The familiar Socratic conceit from the Phaedrus of communication as the process of writing directly on the soul of the other has returned to center stage in today's discussions of culture and media Indeed Western thought has long construed media as a grand choice between two kinds of interfaces Following the optimistic path media seamlessly interface self and other in a transparent and immediate connection But following the pessimistic path media are the obstacles to direct communion disintegrating self and other into misunderstanding and contradiction In other words media interfaces are either clear or complicated either beautiful or deceptive either already known or endlessly interpretable Recognizing the limits of either path Galloway charts an alternative course by considering the interface as an autonomous zone of aesthetic activity guided by its own logic and its own ends the interface effect Rather than praising user friendly interfaces that work well or castigating those that work poorly this book considers the unworkable nature of all interfaces from windows and doors to screens and keyboards Considered allegorically such thresholds do not so much tell the story of their own operations but beckon outward into the realm of social and political life and in so doing ask a question to which the political interpretation of interfaces is the only coherent answer Grounded in philosophy and cultural theory and driven by close readings of video games software television painting and other images Galloway seeks to explain the logic of digital culture through an analysis of its most emblematic and ubiquitous manifestation the interface **T_Visionarium** Jill Bennett, 2008 This is a comprehensive analysis of the ground breaking T_Visionarium media art project It shows how this immersive interactive environment generates new insights into the workings and consumption of televisual media extending the boundaries of both art and media studies MediaWriting W. Richard Whitaker, Janet E. Ramsey, Ronald D. Smith, 2009-01-13 Designed for those preparing to write in the current multimedia environment MediaWriting explores the linkages between print broadcast and public relations styles outlines the nature of good writing synthesizes and integrates professional skills and concepts Complete with interesting real world examples and exercises this textbook gives students progressive writing activities amid an environment for developing research and interviewing skills Starting from a basis in writing news and features for print media it moves on to writing for broadcast news media then introduces students to public relations writing in print broadcast and digital media as well as for news media and advertising venues Rather than emphasizing the differences among the three writing styles this book synthesizes and integrates the three concepts weaving in basic principles of Internet writing and reporting This book provides beginning newswriting students with a primer for developing the skills needed for work in the media industry As such it is a hands on writing text for students preparing in all professional areas of communication journalism broadcasting media and public relations **Handbook of Research on Digital Media and Creative Technologies** Harrison, Dew, 2015-03-31 Emerging technologies enable a wide variety of creative expression from music and video to innovations in visual art These aesthetics when properly explored can enable enhanced communication between all

kinds of people and cultures The Handbook of Research on Digital Media and Creative Technologies considers the latest research in education communication and creative social expression using digital technologies By exploring advances in art and culture across national and sociological borders this handbook serves to provide artists theorists information communication specialists and researchers with the tools they need to effectively disseminate their ideas across the digital plane

Insect Media Jussi Parikka, 2010 Since the early nineteenth century when entomologists first popularized the unique biological and behavioral characteristics of insects technological innovators and theorists have proposed insects as templates for a wide range of technologies In *Insect Media* Jussi Parikka analyzes how insect forms of social organization swarms hives webs and distributed intelligence have been used to structure modern media technologies and the network society providing a radical new perspective on the interconnection of biology and technology Through close engagement with the pioneering work of insect ethologists including Jakob von Uexküll and Karl von Frisch posthumanist philosophers media theorists and contemporary filmmakers and artists Parikka develops an insect theory of media one that conceptualizes modern media as more than the products of individual human actors social interests or technological determinants They are rather profoundly nonhuman phenomena that both draw on and mimic the alien lifeworlds of insects Deftly moving from the life sciences to digital technology from popular culture to avant garde art and architecture and from philosophy to cybernetics and game theory Parikka provides innovative conceptual tools for exploring the phenomena of network society and culture Challenging anthropocentric approaches to contemporary science and culture *Insect Media* reveals the possibilities that insects and other nonhuman animals offer for rethinking media the conflation of biology and technology and our understanding of and interaction with contemporary digital culture

Bioart and the Vitality of Media Robert E. Mitchell, 2015-09-14 Bioart art that uses either living materials such as bacteria or transgenic organisms or more traditional materials to comment on or even transform biotechnological practice now receives enormous media attention Yet despite this attention bioart is frequently misunderstood Bioart and the Vitality of Media is the first comprehensive theoretical account of the art form situating it in the contexts of art history laboratory practice and media theory Mitchell begins by sketching a brief history of bioart in the twentieth and twenty first centuries describing the artistic scientific and social preconditions that made it conceptually and technologically possible He illustrates how bioartists employ technologies and practices from the medical and life sciences in an effort to transform relationships among science medicine corporate interests and the public By illustrating the ways in which bioart links a biological understanding of media that is media understood as the elements of an environment that facilitate the growth and development of living entities with communicational media Bioart and the Vitality of Media demonstrates how art and biotechnology together change our conceptions and practices of mediation Reading bioart through a range of resources from Immanuel Kant's discussion of disgust to Gilles Deleuze's theory of affect to Gilbert Simondon's concept of individuation provides readers with a new theoretical approach for understanding

bioart and its relationships to both new media and scientific institutions *Routledge Handbook of Media Geographies* Paul C Adams, Barney Warf, 2021-10-27 This Handbook offers a comprehensive overview of media geography focusing on a range of different media viewed through the lenses of human geography and media theory It addresses the spatial practices and processes associated with both old and new media considering media not just as technologies and infrastructures but also as networks systems and assemblages of things that come together to enable communication in the real world With contributions from academics specializing in geography and media studies the Routledge Handbook of Media Geographies summarizes the recent developments in the field and explores key questions and challenges affecting various groups such as women minorities and persons with visual impairment It considers geographical aspects of disruptive media uses such as hacking fake news and racism Written in an approachable style chapters consider geographies of users norms rules laws values attitudes routines customs markets and power relations They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility space perception and placemaking Structured in four distinct sections centered around control and access to digital media mass media mobile media and surveillance and media and the politics of knowledge the Handbook explores digital divides and other manifestations of the uneven geographies of power It also includes an overview of the alternative social media universe created by the Chinese government Media geography is a burgeoning field of study that lies at the intersections of various social sciences including human geography political science sociology anthropology communication media studies urban studies and women and gender studies Academics and students across these fields will greatly benefit from this Handbook Spatial Turns Jaimey Fisher, Barbara Caroline Mennel, 2010 The phrase spatial turns signals the growing importance of space as an analytical as well as representational category for culture The volume addresses such emerging modes of inquiry by bringing together for the first time essays that engage with spatial turns spatiality and the theoretical implications of both in the context of German culture history and theory Migrating from fields like geography urban studies and architecture the new centrality of space has transformed social science fields as diverse as sociology philosophy and psychology In cultural studies productive analyses of space increasingly cut across the studies of literature film popular culture and the visual arts Spatial Turns brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin The volume is organized in four sections Mapping Spaces addresses cartography in all forms and in its intersection with culture Spaces of the Urban takes up one of the key sites of spatial studies the city Spaces of Encounter considers how Germany has become a contact zone for multiple ethnicities and Visualized Spaces concerns the theorization of space in film and new media studies Mobile Interface Theory Jason Farman, 2013-06-17 In this updated second edition Jason Farman offers a ground breaking look at how location aware mobile technologies are radically shifting our sense of identity community and place making practices Mobile

Interface Theory is a foundational book in mobile media studies with the first edition winning the Book of the Year Award from the Association of Internet Researchers It explores a range of mobile media practices from interface design to maps AR VR mobile games performances that use mobile devices and mobile storytelling projects Throughout Farman provides readers with a rich theoretical framework to understand the ever transforming landscape of mobile media and how they shape our bodily practices in the spaces we move through This fully updated second edition features updated examples throughout reflecting the shifts in mobile technology This is the ideal text for those studying mobile media social media digital media and mobile storytelling
