**The New Security Agenda in the Asia-Pacific Region**, 1996 Maritime Security in Southeast Asia, **Japan's new security partnerships** Wilhelm Vosse, Paul Midford, 2018-08-17 After decades of solely relying on the United States for its national security needs over the last decade Japan has begun to actively develop and deepen its security ties with a growing number of countries and actors in the Asia Pacific region and Europe a development that has further intensified under the Shinzo Abe administration This is the first book that provides a comprehensive analysis of the motives and objectives from both the Japanese and the partner countries perspectives and asks what this might mean for the security architecture in the Asia Pacific region and what lessons can be learned for security cooperation more broadly This book is for those interested in Japan s security policy beyond the US Japan security alliance and non US centred bilateral and multilateral security cooperation It is an ideal textbook for undergraduate and graduate level courses on regional security cooperation and strategic partnerships and Japanese foreign and security policy

**Regional Organisations and Security** Stephen Aris, Andreas Wenger, 2013-10-30 This book aims to examine the conceptions and practices of security adopted by Regional Organisations ROs across the globe Since the end of the Cold War there has been an increased focus on regions as a relevant realm for security with actors within regional contexts identifying a significant degree of interdependency between one another As a consequence international security has taken on a distinct regionally institutionalised character as seen by the increase in calls for greater utilisation of Chapter VIII Regional Arrangements of the UN in order to create a devolved UN led system of global security management However the idea of a system of global security management is a remote prospect because divergence seems to be as important as commonality in terms of regional security In light of the above Regional Organisations and Security analyses the primary ROs that are active in Africa Asia Eurasia the Middle East and South America The findings of individual case studies are compiled to highlight disparities and similarities in how security is seen prioritised understood practised managed and implemented across regions On this basis the authors reach conclusions about whether we live in an increasingly globalised or regionally distinct world and go on to assess the prospects for a globalised system of security management and consider how this might be developed and organised This book will be of interest to students of comparative regionalism international organisations international security and IR

*Security and Sustainable Development in Myanmar* Helen James, 2006-09-27 Helen James considers security in Myanmar Burma She uses the ideas put forward in the United Nations Development Programme's 1994 report of human as opposed to state and security going on to argue that freedom from want and freedom from fear of the regime are in fact mutually supportive ideas and that the security of the people and the security of the state are in fact in a symbiotic relationship with each other Presenting new and significant information of the security concept of Myanmar Burma James original work considers economic development health education environmental issues the drugs trade human rights minority peoples and political social and economic reforms arguing that improved governance the development of civil society and economic development would both strengthen the state and ensure the security and well being of its citizens

**Critical security in the Asia-Pacific** Anthony Burke, Matt McDonald, 2021-06-15 In the wake of 9 11 the Asian crisis and the 2004 tsunami traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure or advance individual global or environmental security In the Asia Pacific the accepted wisdom of realism has meant that analyses rarely move beyond the statist militarist and exclusionary assumptions that underpin traditional realpolitik This innovative new book challenges these limitations and addresses the missing problems people and vulnerabilities of the Asia Pacific region It also turns a critical eye on traditional interstate strategic dynamics Critical security in the Asia Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses and a human centred policy approach that focuses on the security welfare and emancipation of individuals and communities

Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable *Philippine Security in the Age of Terror* Rommel Banlaoi, 2009-10-13 As the twelfth most populous nation the Philippines diverse religious and ethnic population makes it an ideal example of the changing tenet of what is deemed national security post 9 11 Issues previously considered social or public are now viewed as security issues Food production is now analyzed in the context of food security and environmenta

Hughes, 2013-01-11 Is Japan re emerging as a normal or even a great military power in regional and global security affairs This Adelphi Paper assesses the overall trajectory of Japan s security policy over the last decade and the impact of a changing Japanese military posture on the stability of East Asia The paper examines Japan s evolving security debate set against the background of a shifting international environment and domestic policymaking system the status of Japan s national military capabilities and constitutional prohibitions post Cold War developments in the US Japan alliance and Japan s role in multilateral regional security dialogue UN PKO and US led coalitions of the willing It concludes that Japan is undoubtedly moving along the trajectory of becoming a more assertive military power and that this trend has been accelerated post 9 11 Japan is unlikely though to channel its military power through greatly different frameworks than at present Japan will opt for the enhanced and probably inextricable integration of its military capabilities into the US Japan alliance rather than pursuing options for greater autonomy or multilateralism Japan s strengthened role as the defensive shield for the offensive sword of US power projection will only serve to bolster US military hegemony in East Asia and globally **Global Governance** Lisa Martin, 2017-03-02 As economic social and environmental connections among states have grown stronger and denser in the last decades new levels and types of governance have emerged The process of globalization while not entirely new has created new challenges for policymakers attempting to reap its benefits and manage its effects This volume pulls together work on global governance that examines these challenges and looks at the patterns of governance that emerge The work is organized into six sections The first introduces concepts crucial to the analysis of global governance including representation efficiency and hierarchy The next two sections turn to specific patterns of governance in two realms security and economic

affairs respectively The fourth section examines legal dimensions of governance The fifth section concentrates on the impact of global governance on domestic politics while the sixth looks at how concepts of norms and legitimacy structure our understanding of governance Overall this collection reveals a rich scholarly understanding of globalization governance and institutions that builds on deep theoretical roots while shedding light on major policy issues

**The Relationship between Human Security Discourse and International Law** Shireen Daft, 2017-12-01 The concept of human security has emerged in international relations and policy as an idea which not only seeks to relocate the focus of international society on the individual but also challenges the current priorities of the international community In particular it places emphasis on promoting and facilitating a nexus between security development and human rights It is potentially a paradigm in the making gaining considerable momentum within the UN international relations scholarship and regional bodies And yet by and large it continues to be unexplored by the international legal community despite the success of a number of international treaties being attributed to the discourse This book seeks to address this gap and establish the nature of the relationship between human security discourse and international law determining whether human security can meaningfully contribute to the international legal framework To determine this the book analyses the core principles of human security discourse and examines the degree to which they find parallels in the existing normative structure of international law The book examines the how the broad narrow debate that dominates human security discourse has played out in international law making It goes on to consider the processes for the creation of so called human security treaties in order to determine a blueprint for future development of international human security treaty law In concluding Shireen Daft sets out a structured principled approach through which international legal scholarship can engage with human security highlighting the ways in which engagement between the two fields can be sustained
