Albrecht Classen,2012-05-29 Older research on the premodern world limited its focus on the Church the court and more
recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical
readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world
the current volume combines a large number of specialized studies that investigate how the natural environment and the
appearance of members of the rural population interacted with the world of the court and of the city The experience in rural
space was important already for writers and artists in the premodern era as the large variety of scholarly approaches
indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of
the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even
discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element
already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society
was tremendous if not catastrophic **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl** Avery
