many cases one of the book's more than 1000 colour photographs of living animals. The book also includes 130 simple to use dichotomous keys accompanied by hundreds of explanatory drawings that in most cases allow a specimen in hand to be identified. In addition it has a comprehensive list of scientific references for those wishing to conduct more in depth research, an extensive glossary and basic guides to the collection, preservation and captive care of specimens. This classic work was originally published in 1975. The updated seventh edition contains a new Appendix that discusses recent changes and lists over 80 new or resurrected species and genera that have been added to the Australian frog and reptile fauna since the 2014 edition.

Under Southern Seas Neil Andrew, 1999. Most Australians live in the southern half of their vast continent and within striking distance of the coast. While great recreational and commercial use is made of the reefs that fringe this enormous coastline, our understanding of the reefs is only fragmentary. In this full colour guide to our reefs, leading marine biologists look at our current understanding of the ecology of subtidal reefs and their fisheries.
