Mars, A Cosmic Stepping Stone Kevin Nolan, 2008-08-05 The questions of our origin and cosmic abundance of life are among the most compelling facing humanity We have determined much about the nature and origin of the Universe and our place in it but with virtually all evidence of our origin long since gone from our world and an unimaginably vast Universe still to explore defining answers are difficult to obtain For all of the difficulties facing us however the planet Mars may act as a cosmic stepping stone in uncovering some of the answers Although different today the origin and early history of both Earth and Mars may have been similar enough to consider an origin to life on both But because Mars planetary processes collapsed over three billion years ago just as life was beginning to flourish on Earth a significant and unique record of activity from that era perhaps relevant to the origin of life still resides there today In recognition of this both the US and Europe are currently engaged in one of the most ambitious programs of exploration ever undertaken Built on our legacy of Mars exploration from the Viking era and before a far reaching phased program of robotic exploration now and over the coming decades aims at obtaining definitive answers about the origin and nature of the red planet and what it has to say about the origin and cosmic abundance of life This book examines these issues in one of the most comprehensive treatments ever written about the planet

Mars and our legacy of engagement with it in language suitable for non expert and expert alike Opening chapters consider the question of life in the Universe and the origin of life on Earth and what challenges face us in uncovering defining answers With a realization of its importance in this the next section examines the legacy of our engagement with Mars From Kepler s work on its orbit Schiaparelli s efforts to resolve its surface features and NASA s Mariner and Viking programs attempting to determine whether life resides upon the surface Mars has remained elusive yet always prodding and extending our capabilities in exploration and our perception of our place in the Universe Subsequent chapters consider our current understanding of the planet and the recently devised comprehensive program for scientific exploration All recent current and upcoming missions and the latest findings are discussed in detail providing our best understanding yet of a vast and ancient landscape indeed characterized by significant activity relevant to our quest and which also points to a planet far from dead today Late chapters consider NASA and ESA plans for Mars over the next thirty years increasingly shaped by the scientific successes to date unprecedented public interest and by issues of planetary protection And with mounting political interest our program for Mars may culminate in a human mission to Mars perhaps sometime around 2040 The greatest discovery however remains to be made If even one microbe is found on Mars it will reveal a cosmic context for life with Earth as one place among many harboring life confirming our cosmic origins and destiny

Literacy Play for the Early Years Book 1

Collette Drifte,2013-07-04 This series of books uses fiction non fiction and poetry texts as well as phonics as a basis to help young children in the Early Years develop their literacy skills It brings together the early learning goals of the foundation stage and the national literacy strategy objectives using structured play games and fun activities to put across the relevant teaching points in an enjoyable way while simultaneously nurturing a love of literature Each book presents structured activities based around suggested focus texts To help practitioners save time in planning and organizing the materials needed and the preparation required for each session are described in detail The activities have been designed to cater to different achievement levels and can be adapted or added to according to the needs of individual children and settings Follow up activities are also suggested to bring in wider aspects of the Early Learning Goals and the NLS objectives Elements of this book include exploring well loved traditional stories and quality familiar modern stories by established authors using the texts as a basis to focus on specific literacy goals and objectives using the texts as a stimulus for games and play activities that help to teach literacy skills planning and preparation for each literacy session including materials needed and scripted sessions ideas for working and playing with the whole group and smaller groups to consolidate the literacy skill and extension ideas and activities

Yachting ,1996-02 [What Is this Childhood?](#) Carol Toole,2023-10-24 This book succinctly explores the consciousness of the young child through a weaving of journal entries made as a teacher a young mother and later a grandmother observations and musings as well as practical activities from my parenting workshops It is a journey through the child s world trails marked by their own words Their speech as it naturally unfolds leads the child to self

consciousness and critical thinking But not too fast Stay to savor soft grass brushing bare feet the skid of sneakers on hot sidewalks even the gentleness of a mosquito as she bites Find a partner to try out the practices and a quiet moment to journal I hope this book will serve as invitation to look through a child s eyes and to hear with heart it s no mistake that the word heart has ear inside introduction What Is This Childhood explores the consciousness of the young child through language development often in their own words The child s early utterances reveal a unity of word and experience and of experience and meaning Children live more fully in perception than conception Yet speech as it unfolds eventually leads the child to abstraction self consciousness and critical thinking This journey into childhood will deepen the quality of our attention and presence in each moment enlivening our speech and interactions and thereby preserving our children s sense of wonder and spiritual connection
