The Oxford Handbook of Participation in Organizations Adrian Wilkinson, Paul J. Gollan, Mick Marchington, David Lewin, 2010-02-19 Employee participation encompasses the range of mechanisms used to involve the workforce in decisions at all levels of the organization whether direct or indirect conducted with employees or through their representatives In its various guises the topic of employee participation has been a recurring theme in industrial relations and human resource management One of the problems in trying to develop any analysis of participation is that there is potentially limited overlap between these different disciplinary traditions and scholars from diverse traditions may know relatively little of the research that has been done elsewhere Accordingly in this book a number of the more significant disciplinary areas are analysed in greater depth in order to ensure that readers gain a better appreciation of what participation means from these quite different contextual perspectives Not only is there a range of different traditions contributing to the research and literature on the subject there is also an extremely diverse sets of practices that congregate under the banner of participation The handbook discusses various arguments and schools of thought about employee participation analyzes the range of forms that participation can take in practice and examines the way in which it meets objectives that are set for it either by employers trade unions individual workers or indeed the state In doing so the Handbook brings together leading scholars from around the world who present and discuss fundamental theories and approaches to participation in organization as well as their connection to broader political forces These selections address the changing contexts of employee participation different cultural institutional models old new economy models shifting social and political patterns and the correspondence between industrial and political democracy and participation

New Forms of Worker Organization Immanuel Ness, 2014-07-01 Bureaucratic labor unions are under assault Most unions have surrendered the achievements of the mid twentieth century when the working class was a militant force for change throughout the world Now trade unions seem incapable of defending let alone advancing workers interests As unions implode and weaken workers are independently forming their own unions drawing on the tradition of syndicalism and autonomism a resurgence of self directed action that augurs a new period of class struggle throughout the world In Africa Asia the Americas and Europe workers are rejecting leaders and forming authentic class struggle unions rooted in sabotage direct action and striking to achieve concrete gains This is the first book to compile workers struggles on a global basis examining the formation and expansion of radical unions in the Global South and Global North The tangible evidence marshaled in this book serves as a handbook for understanding the formidable obstacles and concrete opportunities for workers challenging neoliberal capitalism even as the unions of the old decline and disappear Contributors include Au Loong Yu Bai Ruixue Shawn Hattingh Piotr Bizyukov Irina Olimpieva Genese M Sodikoff Aviva Chomsky Dario Bursztyn Gabriel Kuhn Erik Forman Steven Manicasteri Arup Kumar Sen Verity Burgmann Ray Jureidini Meredith Burgmann and Jack Kirkpatrick

Industrial Relations After Pinochet Indira Palacios-Valladares, 2011 In recent decades many countries have implemented neoliberal reforms that have had adverse consequences for unions In Chile this process was particularly sweeping having occurred under the right wing dictatorship of General Augusto Pinochet Despite the transition to democracy in 1990 the labor relations system created by the Pinochet regime is still largely in place Although a number of works have assessed the conditions of unionism in post dictatorship Chile little attention has been paid to the firm level which is where most of the collective bargaining now takes place This book takes a qualitative approach to examining the dynamics of collective bargaining at the firm level in democratic Chile by investigating the causes of variation in the bargaining outcomes of fifty three unions in four firms in the banking manufacturing retail and telecommunications sectors It seeks to explain both variation in individual union bargaining outcomes within firms and aggregate differences in

outcomes between firms The book also provides a systematic explanation of the decline of collective bargaining results among Chilean unions in general during the 1990s and early 2000s
