White,1914 **The Puzzle King** Sid Pickard,1996 THE PUZZLE KING has 710 chess problems and 34 math puzzles All are composed by American s greatest puzzle maker Sam Loyd An exciting and rewarding way to hone your chess skills and more importantly have fun Everyone loves a puzzle and this page turner sharpens your chess visions and stretches your imagination **More Mathematical Puzzles of Sam Loyd** Sam Loyd,Martin Gardner,1960-01-01 Second collection of amusing thought provoking problems and puzzles from the Cyclopedia Arithmetic algebra speed and distance problems game theory counter and sliding block problems similar topics 166 problems 150 original drawings diagrams **Classic Chess Problems by Pioneer Composers** Kenneth Samuel Howard,1970-01-01 155 problems solutions Loyd White Klett Shinkman Havel other lesser known but brilliant composers

The Tragic Life and Short Chess Career of James A. Leonard, 1841-1862 John S. Hilbert,2014-04-24 The Civil War affected the entire American landscape in ways not always fully considered It determined the political future of a nation but also its scientific and cultural development The war cost America many of its best and brightest in every realm James A Leonard was one such loss a brilliant up and coming chess player in 1861 62 before he made the decision to serve his country during wartime Born November 6 1841 Leonard was the son of a poor Irish immigrant but even a poor child could play the game of kings He grew up in a time when interest in chess was experiencing a revival and contemporaries such as Paul Morphy Eugene Delmar and Leonard s mentor Philip Richardson captured much interest Leonard defeated a number of the country s best players and was widely viewed as the New Morphy This biography discusses what is known of Leonard s life but concentrates primarily on his talent and his sadly shortened career Game scores and diagrams from 96 games are included with details of place date and opponents [100 Headachingly Hard Mate in Two Chess Puzzles Composed by Sam Loyd](#) Martin B Justesen,2021-06-04 What do you get 100 really hard mate in two puzzles by one of the best chess composers to have lived organized neatly Sam Loyd was born January 30 1841 in Philadelphia Pennsylvania U S and died April 10 1911 in New York He is probably one of the greatest American puzzle creators ever Not only did he create amazing chess puzzles but Sam Loyd also made puzzle games and math puzzles Loyd studied engineering and took a license as a steam and mechanical engineer but he managed to create a career out of creating puzzles When Loyd was 14 years old he started creating his first chess problems As a 19 year old he was problem editor for the magazine Chess Monthly edited by no other than Paul Morphy As a chess player he peaked at no 15 in the world around 1868 1869 It must therefore be clear that you are up against an excellent puzzle master when you are going to solve the 100 mate in two problems in this book all composed by Sam Loyd Loyd said the following about the art of making mate in two problems I have often expressed the opinion that it is no easy task to compose a good two move problem It should have a decided point a well defined theme with

a sparkle to it and the difficulty should consist in the surprise of the trick and not in the mere trouble of selecting the correct key move You might ask why I should solve mate in two puzzles Former world no 3 and renown chess trainer Arthur Yusupov writes in his book *Boost Your Chess* that mate in two puzzles are very useful for training in the calculation of variations One is often forced to take into account a lot of candidate moves in order to reach the solution It is very important to consider all possible replies for your opponent This develops your skill in calculating short variations I hope this short intro will keep you motivated to solve these challenging chess puzzles The problems are presented in a semi random order to make different themes be presented evenly throughout the book The solutions are mostly presented with the different variations but in some only the first correct move is given This is the move I have found in the sources databases so I have judged that Loyd wanted it to be presented like this It also gives you an extra challenge to go visualize all the different variations of the solution [36 Chess Problems](#) Eugene Beauharnais Cook, Julius Adam Kaiser, 1915 *American Chess Bulletin* Hartwig Cassell, Hermann Helms, 1921 **Sam Loyd** Sam Loyd, 1995 [Monthly Bulletin. Urcan, 2014-04-18 Adolf Albin a Romanian born chess master of German origins was renowned for his originality and his eccentric and dashing playing style aggressiveness and edgy character Through previously unpublished data tournament reports newspaper articles and consultation games this work covers Albin's brief but highly significant period spent in New York 1893 1895 with details on his life and chess career [W.H.K. Pollock](#) Olimpiu G. Urcan, John S. Hilbert, 2017-06-09 During his first years in America William Henry Krause Pollock participated in some of the most important American chess events of the 19th century Pollock played matches against strong players like Charles Moehle John L. McCutcheon Jackson W. Showalter and Eugene Delmar This biography analyzes in great detail Pollock's chess play as well as his career and life in England Ireland and America His American years unveil even more about the American chess landscape during the first half of the 1890s one of the most interesting periods in American chess history Offered here are an unprecedented collection of annotated games played by Pollock around 500 historical photographs and line drawings Sources include historical chess journals and magazines with chess columns from America the United Kingdom and Canada **The British Chess Magazine**, 1910 *Alphabetical Finding List* Princeton University. Library, 1921 **Hexaflexagons and Other Mathematical Diversions** Martin Gardner, 2020-10-05 Martin Gardner's Mathematical Games columns in *Scientific American* inspired and entertained several generations of mathematicians and scientists Gardner in his crystal clear prose illuminated corners of mathematics especially recreational mathematics that most people had no idea existed His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him These columns were both a revelation and a gift when he wrote them no one before Gardner had written about mathematics like this They continue to be a marvel This volume

originally published in 1959 contains the first sixteen columns published in the magazine from 1956 1958 They were reviewed and briefly updated by Gardner for this 1988 edition **Annual of the University Club** University Club (New York, N.Y.),1918
