and useful part of mainstream research practice

Ethics and Children's Literature Claudia Mills, 2016-05-13 Exploring the ethical questions posed by in and about children's literature this collection examines the way texts intended for children raise questions of value depict the moral development of their characters and call into attention shared moral presuppositions The essays in Part I look at various past attempts at conveying moral messages to children and interrogate their underlying assumptions What visions of childhood were conveyed by explicit attempts to cultivate specific virtues in children What unstated cultural assumptions were expressed by growing resistance to didacticism How should we prepare children to respond to racism in their books and in their society Part II takes up the ethical orientations of various classic and contemporary texts including prosaic ethics in the Hundred Acre Wood moral discernment in Narnia ethical recognition in the distant worlds traversed by L. Engle and virtuous transgression in recent Anglo American children's literature and in the emerging children's literature of 1960s Taiwan Part III's essays engage in ethical criticism of arguably problematic messages about our relationship to nonhuman animals about war and about prejudice The final section considers how we respond to children's literature with ethically focused essays exploring a range of ways in which child readers and adult authorities react to children's literature Even as children's literature has evolved in opposition to its origins in didactic Sunday school tracts and moralizing fables authors parents librarians and scholars remain sensitive to the values conveyed to children through the texts they choose to share with them

individual's search for the ultimate meaning of life on earth *Evolution Equals Genesis* Dr. Guillermo Escamilla, 2022-11-03

I imagine that from the moment humans were able to communicate they have contemplated their place in Creation in this universe. Stories handed down from parents to children, elders to tribes, teachers to pupils, and civilization to civilization about the story of Creation. Countless versions throughout human history all try to explain our place in existence. Two such versions are in Genesis and the Theory of Evolution. These have been the most hotly debated versions in recent history. It is the purpose of this book to show the reader how the seven days of Creation written in the book of Genesis can be matched to the sequence of events in evolution. It is my hope that a new debate can be born of this. The debate of how Genesis and evolution are more similar than they are different. Similarly, it is my wish to create a sense of wonderment and curiosity to things spiritual and science.
