

SAMENESS AND SUBSTANCE RENEWED

In this book, which thoroughly revises and greatly expands his classic work *Sameness and Substance* (1980), David Wiggins retrieves and refurbishes in the light of twentieth-century logic and logical theory certain conceptions of identity, of substance and of persistence through change that philosophy inherits from its past. In this new version, he vindicates the absoluteness, necessity, determinateness and all or nothing character of identity against rival conceptions. He defends a form of essentialism that he calls individuating essentialism, and then a form of realism that he calls conceptualist realism, a position he seeks to place in relation to one surviving insight of idealism. In a final chapter, he advocates a human being based conception of the identity and individuation of persons, arguing that any satisfactory account of personal memory must enforce and follow through all the normative requirements that flow from its logically inalienable aspiration to furnish direct knowledge of the rememberer's own past. This important book will appeal to a wide range of readers in metaphysics, philosophical logic, and analytic philosophy.

DAVID WIGGINS is Wykeham Professor of Logic Emeritus in the University of Oxford, Fellow of the British Academy, and Foreign Honorary Member of the American Academy of Arts and Sciences. His publications include *Needs, Values, Truth: Essays in the Philosophy of Value* (1987) and many journal articles.

The Structure of Objects Kathrin Koslicki, 2008-04-17 Kathrin Koslicki offers an analysis of ordinary materials objects those material objects to which we take ourselves to be committed in ordinary scientifically informed discourse She focuses particularly on the question of how the parts of such objects are related to the wholes which they compose Many philosophers today find themselves in the grip of an exceedingly deflationary conception of what it means to be an object According to this conception any plurality of objects no matter how disparate or gerrymandered itself composes an object even if the objects in question fail to exhibit interesting similarities internal unity cohesion or causal interaction amongst each other This commitment to initially counterintuitive objects follows from the belief that no principled set of criteria is available by means of which to distinguish intuitively gerrymandered objects from commonsensical ones the project of this book is to persuade the reader that systematic principles can be found by means of

which composition can be restricted and hence that we need not embrace this deflationary approach to the question of what it means to be an object To this end a more full blooded neo Aristotelian account of parthood and composition is developed according to which objects are structured wholes it is integral to the existence and identity of an object on this conception that its parts exhibit a certain manner of arrangement This structure based conception of parthood and composition is explored in detail along with some of its historical precursors as well as some of its contemporary competitors A *Companion to Metaphysics* Jaekwon Kim, Ernest Sosa, Gary S. Rosenkrantz, 2009-04-13 Fully extended and revised A *Companion to Metaphysics* 2nd Edition includes a section of detailed review essays from renowned metaphysicians and the addition of more than 30 new encyclopedic entries taking the number of entries to over 300 Includes revisions to existing encyclopedic entries Features more than 30 all new A to Z entries Offers a section of in depth essays from renowned metaphysicians Provides the most complete and up to date reference guide for students and professionals alike

Organisms and Personal Identity A.M. Ferner, 2016-04-14 Over his philosophical career David Wiggins has produced a body of work that though varied and wide ranging stands as a coherent and carefully integrated whole In this book Ferner examines Wiggins conceptualist realism his sortal theory D and his human being theory in order to assess how far these elements of his systematic metaphysics connect In addition to rectifying misinterpretations and analysing the relations between Wiggins works Ferner reveals the importance of the philosophy of biology to Wiggins approach This book elucidates the biological anti reductionism present in Wiggins work and highlights how this stance stands as a productive alternative to emergentism With an analysis of Wiggins construal of substances specifically organisms the book goes on to discuss how Wiggins brings together the concept of a person with the concept of a natural substance or human being An extensive introduction to the work of David Wiggins as well as a contribution to the dialogue between personal identity theorists and philosophers of biology this book will appeal to students and scholars working in the areas of philosophy biology and the history of Anglophone metaphysics

The Early Modern Subject Udo Thiel, 2011-09-29 Udo Thiel presents a critical evaluation of the understanding of self consciousness and personal identity in early modern philosophy He explores over a century of European philosophical debate from Descartes to Hume and argues that our interest in human subjectivity remains strongly influenced by the conceptual framework of early modern thought

Natural Kinds and Genesis Stewart Umphrey, 2016-08-22 In *Natural Kinds and Genesis* The Classification of Material Entities Stewart Umphrey raises and answers two questions What is it to be a natural kind And are there in fact any natural kinds First using the everyday understanding of things he argues that natural kinds may be understood as classes or as types and that the members or tokens of such kinds are individual continuants A continuant is essentially a being in becoming a material thing which changes and yet remains the same in virtue of its nature or essence as long as it exists In the primary sense of the term then a natural kind is a class whose members closely resemble one another substantially in virtue of their essences Alternatively it

is a type whose tokens exemplify it in virtue of their essences To answer the second question one must make use of relevant scientific theories as well Umphrey agrees with scientific essentialists that there are natural kinds but he argues that most of the chemical physical and biological kinds posited in current theories are not natural kinds in the primary sense of the term The natural kinds realism he affirms is thus quite restricted it requires the existence of enduring things which closely resemble one another in virtue of their essences and such things exist apparently only if they have come into being or emerged in the course of symmetry breaking events Natural Kinds and Genesis will be of interest to philosophers of science and to those interested in the metaphysics of natural kinds and their members **Discipline Filosofiche (2018-1)**

Bredin,2005-08-01 No Marketing Blurb **Controversies and the Metaphysics of Mind** Yaron M. Senderowicz,2010-07-21 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of

dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the understanding of the issues under discussion **Locke on**

Persons and Personal Identity Ruth Boeker,2021-03-01 Ruth Boeker offers a new perspective on Locke s account of persons and personal identity by considering it within the context of his broader philosophical project and the philosophical debates of his day Emphasizing the importance of the moral and religious dimensions of his view Boeker argues that to take seriously Locke s general approach to questions of identity we should consider his account of personhood separately from his account of personal identity over time On this basis she argues that Locke endorses a moral account of personhood according to which persons are subjects of accountability and that his particular thinking about moral accountability explains why he regards sameness of consciousness as necessary for personal identity over time In contrast to some neo Lockean views about personal identity Boeker argues that Locke s account of personal identity is not psychological per se but rather his underlying moral religious metaphysical and epistemic background beliefs are relevant for understanding why he argues for a consciousness based account of personal identity Taking his underlying background beliefs into considerations not only sheds light on why many of his early critics do not adopt Locke s view but also shows why his view cannot be as easily dismissed as some of his critics assume *More Kinds of Being* E. J. Lowe,2015-02-23 Taking into account significant

developments in the metaphysical thinking of E J Lowe over the past 20 years *More Kinds of Being A Further Study of Individuation Identity and the Logic of Sortal Terms* presents a thorough reworking and expansion of the 1989 edition of *Kinds of Being* Brings many of the original ideas and arguments put forth in *Kinds of Being* thoroughly up to date in light of new developments Features a thorough reworking and expansion of the earlier work rather than just a new edition Reflects the author s conversion to what he calls the four category ontology a metaphysical system that takes its inspiration from Aristotle Provides a unified discussion of individuation and identity that should prove to be essential reading for philosophers working in metaphysics Biological Identity Anne Sophie Meincke,John Dupré,2020-08-25 Analytic metaphysics has

recently discovered biology as a means of grounding metaphysical theories This has resulted in long standing metaphysical puzzles such as the problems of personal identity and material constitution being increasingly addressed by appeal to a biological understanding of identity This development within metaphysics is in significant tension with the growing tendency amongst philosophers of biology to regard biological identity as a deep puzzle in its own right especially following recent

advances in our understanding of symbiosis the evolution of multi cellular organisms and the inherently dynamical character of living systems Moreover and building on these biological insights the broadly substance ontological framework of metaphysical theories of biological identity appears problematic to a growing number of philosophers of biology who invoke process ontology instead This volume addresses this tension exploring to what extent it can be dissolved For this purpose the volume presents the first selection of essays exclusively focused on biological identity and written by experts in metaphysics the philosophy of biology and biology The resulting cross disciplinary dialogue paves the way for a convincing account of biological identity that is both metaphysically constructive and scientifically informed and will be of interest to metaphysicians philosophers of biology and theoretical biologists
