

# Sampling

- “Real” sound and visual data are continuous, constantly changing
- Sampling means to take rapid snapshots
- Video: 30 images a second is good enough for our eyes
- Real sound is in the form of a wave (p. 43)
- Sampling sound means finding points along the curve.
  - Music CD: take a reading 44,100 times a second, and store as a 16-bit number... How much data is captured in 1 hour?
  - MIDI (= Musical Instrument Digital Interface) uses far less space, though does not sound like an actual recording.
