Samuel Johnson And The New Science:

Samuel Johnson and the New Science Richard B. Schwartz, 1971 *Samuel Johnson and the new science* Richard B. Schwartz, 1971 *Johnson in Japan* Kimiyo Ogawa, Mika Suzuki, 2020-10-16 The study and reception of Samuel Johnson's work has long been embedded in Japanese literary culture The essays in this collection reflect that history and influence underscoring the richness of Johnson scholarship in Japan while exploring broader conditions in Japanese academia today In examining Johnson's works such as the Rambler 1750-52 Rasselas 1759 Lives of the Most Eminent English Poets 1779-81 and Journey to the Western Islands of Scotland 1775 the contributors all members of the half century old Johnson Society of Japan also engage with the work of other important English writers namely Shakespeare Mary Shelley Jane Austen and Matthew Arnold and later Japanese writers including Natsume Soseki 1867-1916 If the state of Johnson studies in Japan is unfamiliar to Western academics this volume offers a unique opportunity to appreciate Johnson's centrality to Japanese education and intellectual life and to reassess how he may be perceived in a different cultural context Published by Bucknell University Press Distributed worldwide by Rutgers University Press **Creational Theology and the History of Physical Science: The Creationist Tradition from Basil to Bohr** Christopher B. Kaiser, 2021-12-06 This volume documents the role of creational theology in discussions of natural philosophy medicine and technology from the Hellenistic period to the early twentieth century Four principal themes are the comprehensibility of the world the unity of heaven and earth the relative autonomy of nature and the ministry of healing Successive chapters focus on Greco-Roman science medieval Aristotelianism early modern science the heritage of Isaac Newton and post-Newtonian mechanics The volume will interest historians of science and historians of the idea of creation It simultaneously details the persistence of tradition and the emergence of modernity and provides the historical background for later discussions of creation and evolution **Samuel Johnson** Samuel Johnson, 1984 Johnson, Rasselas, and the Choice of Criticism Edward Tomarken, 2021-10-21 Although Rasselas has received more critical commentary than almost any other work by Samuel Johnson Edward Tomarken's book is the first full length study to focus on his tale of the Prince of Abyssinia This anomaly arises as Tomarken shows because Rasselas has remained resistant to the customary critical approaches of the eighteenth nineteenth and twentieth centuries consistently eliciting new kinds of insights and raising new sorts of problems Tomarken's contribution is a new methodology to explain this phenomenon He sees Johnson's early writings London and Irene as instances of the writer trying with only partial success to achieve what he first realized in The Vanity of Human Wishes a means of permitting literary form to refer to conduct Later works such as The Journey to the Western Islands of Scotland are viewed as further developments of this method which achieved its fullest expression in Rasselas and the Life of Pope Such a reading of Johnson develops an aesthetic that operates on the margins between the literary and the extra-literary Although Johnson's own critical view was unable to accommodate such a position Tomarken shows that in practice he moved toward it by a process of trial and error

manifest in his poetry and narratives When raised to the level of critical method this approach goes beyond the assumptions not only of Johnson's day but also of our own Tomarken's theoretical coda demonstrates how the choices of current critical theory like those in the marriage debate in *Rasselas* can be understood to interact with one another Specifically he proposes a dialectical relationship for two approaches hermeneutics and structuralism usually seen as opposed to one another This innovative study will interest not only Johnson scholars but all those concerned with critical theory

Boswell's Life of Johnson John A. Vance, 2009-01-01 When it first appeared in 1985 Boswell's *Life of Johnson* brought together the most recent and most lively assessments of the literary merit and historical accuracy of Boswell's biography In an invigorating exchange placed at the center of the collection Donald Greene's description of the *Life* as a fictionalized biography that screens the real complex Johnson from view is challenged by Frederick Pottle's defense of Boswell's biographical method of his sturdy compilation of detail that presents the factual rather than the fictional Johnson Other essays explore the effect of Johnson's humor on the shaping of his image in the *Life* the recent developments in literary criticism and the effect they have had on eighteenth century studies and the continuing interest of Boswell's *Life* as a showcase for members of Johnson's famous circle The volume concludes with an assessment of the Boswellian problem of the difficulties the *Life* presents to readers scholars and teachers

Brewing Science, Technology and Print, 1700-1880 James Sumner, 2015-07-28 How did the brewing of beer become a scientific process Sumner explores this question by charting the theory and practice of the trade in Britain and Ireland during the eighteenth and nineteenth centuries

Discovering the Human Ralf Haekel, Sabine Blackmore, 2013 English Summary *Discovering the Human* investigates the emergence of the modern human sciences and their impact on literature art and other media in the 18th and the 19th centuries Up until the 1830s science and culture were part of a joint endeavour to discover and explore the secret of life The question What is life unites science and the arts during the Ages of Enlightenment and Romanticism and at the end of the Romantic period a shift of focus from the human as an organic whole to the specialized disciplines signals the dawning of modernity The emphasis of the edited collection is threefold the first part sheds light on the human in art and science in the Age of Enlightenment the second part is concerned with the transitions taking place at the turn of the 19th century The chapters forming the third part investigate the impact of different media on the concept of the human in science literature and film

The Last Frontier Karl S. Guthke, 2019-05-15 The existence of intelligent extraterrestrial life has been a subject of debate since the dawn of recorded history The Last Frontier originally published in German in 1983 and now available in Helen Atkins's sensitive English translation traces the development of the idea that Earth is not the only planet inhabited by intelligent beings but that there might be a plurality or even an infinity of worlds with human or humanoid life Focusing on the seventeenth to the twentieth century and taking into account theological philosophical scientific popular and literary writings from American British French and German sources Karl S Guthke demonstrates the continuing importance of this question to the process of human self definition

How Pleasure Works: The New Science of Why We Like What We Like Paul Bloom, 2010-06-14 Engaging evocative Bloom is a supple clear writer and his parade of counterintuitive claims about pleasure is beguiling NPR Why is an artistic masterpiece worth millions more than a convincing forgery Pleasure works in mysterious ways as Paul Bloom reveals in this investigation of what we desire and why Drawing on a wealth of surprising studies Bloom investigates pleasures noble and seamy lofty and mundane to reveal that our enjoyment of a given thing is determined not by what we can see and touch but by our beliefs about that thing's history origin and deeper nature

Theology and the Enlightenment Paul Avis, 2022-11-17 Challenging the common assumption that the Enlightenment of the late seventeenth and the eighteenth centuries was an essentially secular irreligious and atheistic movement this book critiques this standard interpretation as based on a narrow view of Enlightenment sources Building on the work of revisionist historians this volume takes the argument squarely into the theological domain whether Anglican Dissenting Lutheran or deistic whilst also noting that the Enlightenment deeply affected Roman Catholic and Jewish theologies It challenges the stereotype of Enlightenment rationalism and the penultimate chapter brings out the biblical and ecclesial roots of the image of enlightenment and reclaims it for Christian faith

From Madman to Crime Fighter Roslynn D. Haynes, 2017-08-31 A study of the scientist in Western culture from medieval images of alchemists to present day depictions of cyberpunks and genetic engineers They were mad of course Or evil Or godless amoral arrogant impersonal and inhuman At best they were well intentioned but blind to the dangers of forces they barely controlled They were Faust Frankenstein Jekyll Moreau Caligari Strangelove the scientists of film and fiction cultural archetypes that reflected ancient fears of tampering with the unknown or unleashing the little understood powers of nature In From Madman to Crime Fighter Roslynn D Haynes analyzes stereotypical characters including the mad scientist the cold blooded pursuer of knowledge the intrepid pathbreaker and the bumbling fool that from medieval times to the present day have been used to depict the scientist in Western literature and film She also describes more realistically drawn scientists characters who are conscious of

their public responsibility to expose dangers from pollution and climate change yet fearful of being accused of lacking evidence Drawing on examples from Britain America Germany France Russia and elsewhere Haynes explores the persistent folklore of mad doctors of science and its relation to popular fears of a depersonalized male dominated and socially irresponsible pursuit of knowledge for its own sake She concludes that today s public response to science and scientists much of it negative is best understood by recognizing the importance of such cultural archetypes and their significance as myth From *Madman to Crime Fighter* is the most comprehensive study of the image of the scientist in Western literature and film

The Philosophical Biographer Martin Maner, 2009-01-01 The *Philosophical Biographer* shows how a shift in philosophical outlook in the seventeenth and eighteenth centuries from an understanding of human knowledge rooted in deductive certainties to one resting on inductive probability influenced the development of biographical narrative in general and in particular the way Johnson dealt with biographical evidence in his *Lives of the Poets* Examining the psychological and philosophical doubt that lay at the heart of Johnson s character and intellect Martin Maner reveals in the biographical studies of Savage Swift Milton and Pope an ingrained pattern of dialectical argument and a skeptical attitude toward evidence a method that involves the reader in judgments about the poets as it conveys Johnson s own understanding of truth In the *Life of Savage* Johnson moves from thesis to antithesis generating out of opposing emotional responses irony and sympathy ridicule and pathos an understanding of the man Dialectically undercutting the conclusions of previous biographers of Swift and Milton Johnson fashions a new somewhat acidic estimation of Swift and a portrait of Milton that engages contemporary questions of the probable and the marvelous The *Life of Pope* Johnson s greatest dialectical achievement alternates between blame and praise public and private realms weaving tone context and analogy into great contrasting patterns of inquiry and judgment Establishing the centrality of a dialectical method in the *Lives of the Poets* Martin Maner links the rise of biography as well as Johnson s interest in the form to the shift in epistemology brought about by empiricism In the new patterns of thought of the seventeenth and eighteenth centuries biography the estimation of a life through sifting of historical events and evidence was the most philosophical of endeavors and Johnson its greatest practitioner

Encyclopedia of Literature and Science Pamela Gossin, 2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they re different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and

the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading The Idea of Progress in Eighteenth-century Britain David Spadafora,James Spada,1990-01-01 The idea of progress stood at the very center of the intellectual world of eighteenth century Britain closely linked to every major facet of the British Enlightenment as well as to the economic revolutions of the period Drawing on hundreds of eighteenth century books and pamphlets David Spadafora here provides the most extensive discussion ever written of this prevailing sense of historical optimism
