**San Miguel** Raymond Wilkie,1971 Agricultural Economics Research ,1970 The Peasant Betrayed John H. Powelson,Richard Stock,1990-07-01 After studying land reform in 16 countries and offering illustrative examples from 11 more Powelson and Stock conclude that government land reforms generally harm the rural poor more than help them Detailing case after case in which government intervention has impoverished the peasant the authors find only a few cases in which the government has made the peasant better off In contrast they show that in Third World countries where the state has left farming to the farmer agricultural output has soared famine has been overcome and the welfare of the peasant has vastly improved **Troubled Harvest** Joseph Cotter,2003-09-30 During the 20th century two revolutions swept rural Mexico the Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico s urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of the State s efforts to assist peasant farmers Peasant Cooperation and Capitalist Expansion in Central Peru Norman Long,Bryan R. Roberts,2014-11-06 This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists The area studied the Mantaro Valley of central Peru is one of the most densely populated and economically differentiated of highland zones it is also notable for its community based forms of cooperation and its high level of peasant political activity The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development The case studies cover a range of political and economic topics from peasant movements to the achievements and shortcomings of government sponsored agricultural and manufacturing cooperatives The concluding chapter by the editors explores the theoretical implications of

these studies      **The Roots of Conservatism in Mexico** Benjamin T. Smith, 2012-11-15 The Roots of Conservatism is the first attempt to ask why over the past two centuries so many Mexican peasants have opted to ally with conservative groups rather than their radical counterparts Blending socioeconomic history cultural analysis and political narrative Smith's study begins with the late Bourbon period and moves through the early republic the mid nineteenth century Reforma the Porfiriato and the Revolution when the Mixtecs rejected Zapatista offers of land distribution ending with the armed religious uprising known as the last Cristiada a desperate Cold War bid to rid the region of impious communist governance In recounting this long tradition of regional conservatism Smith emphasizes the influence of religious belief church ritual and lay clerical relations both on social relations and on political affiliation He posits that many Mexican peasants embraced provincial conservatism a variant of elite or metropolitan conservatism which not only comprised ideas on property hierarchy and the state but also the overwhelming import of the church to maintaining this system      **Agrarian Revolt in a Mexican Village** Paul Friedrich, 2014-12-10 Agrarian Revolt in a Mexican Village deals with a Tarascan Indian village in southwestern Mexico which between 1920 and 1926 played a precedent setting role in agrarian reform As he describes forty years in the history of this small pueblo Paul Friedrich raises general questions about local politics and agrarian reform that are basic to our understanding of radical change in peasant societies around the world Of particular interest is his detailed study of the colorful violent and psychologically complex leader Primo Tapia whose biography bears on the theoretical issues of the political middleman and the relation between individual motivation and socioeconomic change Friedrich's evidence includes massive interviewing personal letters observations as an anthropological participant e.g. in fiesta ritual analysis of the politics and other village culture during 1955-56 comparison with other Tarascan villages historical and prehistoric background materials and research in legal and government agrarian archives      Anthropological Perspectives on Rural Mexico Cynthia Hewitt de Alcántara, 2017-07-06 In this title first published in 1984 the author examines the social and political forces surrounding the practice of anthropology at different periods in the history of Mexico since 1917 She does this by analysing and tracing the development of competing anthropological perspectives from ethnographic particularism and functionalism through indigenismo cultural ecology Marxism and the dependency paradigm to the historical structuralism of the 1970s This book provides the basis for a systematic analysis of peasant studies in Mexico and discusses in stimulating terms the theoretical and empirical difficulties of the profession of anthropology itself      Enhancing the Contribution of Land Reform to Mexican Agricultural Development John Richard Heath, 1990 Radical change in the land reform program is not in order in Mexico but certain institutional changes would improve agricultural growth on farmlands governed by land reform      Middle America Mary W. **Population Growth and Urbanization in Latin America** John Melton Hunter, Robert N. Thomas, Scott Whiteford, 1983

Conference papers case studies of population growth rural migration and urbanization in the Caribbean and Latin America discusses the impact of social change includes projections to 2000 studies agrarian reform and farming development project in Mexico internal migration and rural development in Honduras population dynamics in Peru and St Vincent and the Grenadines regional development in Brazil the Lebanese Arab community immigration in Colombia ends with a philosophical note on development policy Graphs maps organigram references statistical tables     Family Farms: Survival and Prospect Harold Brookfield, Helen Parsons, 2007-11-08 Marx Lenin and Kautsky all regarded family farming as doomed to be split into capitalist farms and proletarian labour Most modern economists regard family farming as an archaic form of production organization destined to give way to agribusiness Family Farms refutes these notions and analyses the manner in which family farmers have been able to operate with success in both developed and developing countries using examples wherever these are illuminating This book begins by reviewing theoretical arguments about agricultural structures and defines family farming This is followed by five vignettes about farming in the first half of the twentieth century The authors analyse the conditions of access to land and water labour livestock tools and seed and review marketing arrangements and how they have changed since 1900 A three chapter review of evolving policies in the North Atlantic countries in the communist states and in the developing countries leads to a discussion of the impact of neo liberalism New issues of the farmer as steward of the environment are explored as well as modern ideas about de agrarianization and a discussion of land reform tracing the experience of Mexico and Brazil In two final chapters the more positive approach of pluriactivity is discussed and followed by a review of organic farming as a principal modern innovation New political organizations representing family farming are described and their demands are discussed with empathy but in a sceptical manner Family farming is an adaptable and resilient form of production organization and these qualities have allowed it to survive The future will be no easier than the past yet family farming continues to flourish in most contexts This book will be useful for researchers students and lecturers interested in Development Studies Rural Studies and Geography and Anthropology as well as general readers who have an interest in farming     Watering the Revolution Mikael D. Wolfe, 2017-06-22 In Watering the Revolution Mikael D Wolfe transforms our understanding of Mexican agrarian reform through an environmental and technological history of water management in the emblematic Laguna region Drawing on extensive archival research in Mexico and the United States Wolfe shows how during the long Mexican Revolution 1910 1940 engineers distribution of water paradoxically undermined land distribution In so doing he highlights the intrinsic tension engineers faced between the urgent need for water conservation and the imperative for development during the contentious modernization of the Laguna s existing flood irrigation method into one regulated by high dams concrete lined canals and motorized groundwater pumps This tension generally resolved in favor of development which unintentionally diminished and contaminated the water supply while

deepening existing rural social inequalities by dividing people into water haves and have nots regardless of their access to land By uncovering the varied motivations behind the Mexican government's decision to use invasive and damaging technologies despite knowing they were ecologically unsustainable Wolfe tells a cautionary tale of the long term consequences of short sighted development policies *All or None* Alison Sánchez Hall,2018-08-17 At once a social history and anthropological study of the world's oldest voluntary collective farms All or None is a story of how landless laborers joined together in Ravenna Italy to acquire land sometimes by occupying private land in what they called a strike in reverse and how they developed sophisticated land use plans based not only on the goal of profit but on the human value of providing work where none was available It addresses the question of the viability of cooperative enterprise as a potential solution for displaced workers and as a more humane alternative to capitalist agribusiness *Mexico*,1975 **The Developing World** E. S. Simpson,2014-09-19 Addresses the issues faced by developing nations in attempting to secure sustainable economic development **Feeding Mexico** Enrique C. Ochoa,2001-09-01 Winner of the 1998 Michael C Meyer Manuscript Prize Feeding Mexico The Political Uses of Food since 1910 traces the Mexican government's intervention in the regulation production and distribution of food from the days of Cardenas to the recent privatization inspired by NAFTA Professor Ochoa argues that the real goals of the government's food subsidies were political driven by presidential desires to court urban labor Many of the agencies and policies were hastily set in place in response to short term political or economic crises Since the goals were not to alleviate poverty but to provide modest subsidies to urban consumers the policies did not eliminate destitution or malnutrition in the country Despite the minimal achievements of these interventionist policies the State Food Agency provided a symbol of the state's concern for the workers The elimination of the Agency in the 1990s prompted social protest and unrest Feeding Mexico is the first study to examine the creation of networks to deliver food products the relationship of these channels of distribution to the food crisis and the role of the state in trying to ameliorate the problem Based on exhaustive research of new archival material and richly documented with statistical tables this book exposes the dynamics and outcome of social policy in twentieth century Mexico *Area Handbook for Mexico* Thomas E. Weil,1975
