**Sanctioned Violence in Early China** Mark Edward Lewis, 1989-08-15 This book provides new insight into the creation of the Chinese empire by examining the changing forms of permitted violence warfare hunting sacrifice punishments and vengeance It analyzes the interlinked evolution of these violent practices to reveal changes in the nature of political authority in the basic units of social organization and in the fundamental commitments of the ruling elite The work offers a new interpretation of the changes that underlay the transformation of the Chinese polity from a league of city states dominated by aristocratic lineages to a unified territorial state controlled by a supreme autocrat and his agents In addition it shows how a new pattern of violence was rationalized and how the Chinese of the period incorporated their ideas about violence into the myths and proto scientific theories that provided historical and natural prototypes for the imperial state

The Emergence of Civilizational Consciousness in Early China Uffe Bergeton, 2018-12-17 This book provides a conceptual history of the emergence of civilizational consciousness in early China Focusing on how words are used in pre Q n before 221 BCE texts to construct identities and negotiate relationships between a civilised self and uncivilised others it provides a re examination of the origins and development of these ideas By adopting a novel approach to determining when civilizational consciousness emerged in pre Q n China this book analyzes this question in ways that establish a fresh hermeneutical dialogue between Chinese and modern European understandings of civilization Whereas previous studies have used archaeological data to place its origin somewhere between 3000 BCE and 1000 BCE this book explores changes in word meanings in texts from the pre Q n period to reject this view Instead this book dates the emergence of civilizational consciousness in China to around 2 500 years ago In the process new chronologies of the coining of Old Chinese terms such as customs barbarians and the Great ones are proposed which challenge anachronistic assumptions about these terms in earlier studies Examining important Chinese classics such as the Analects the Mencius and the M zi as well as key historical periods and figures in the context of the concept of civilization this book will be useful to students and scholars of Chinese and Asian history

The Construction of Space in Early China Mark Edward Lewis, 2012-02-01 This book examines the formation of the Chinese empire through its reorganization and reinterpretation of its basic spatial units the human body the household the city the region and the world The central theme of the book is the way all these forms of ordered space were reshaped by the project of unification and how at the same time that unification was constrained and limited by the necessary survival of the units on which it was based Consequently as Mark Edward Lewis shows each level of spatial organization could achieve order and meaning only within an encompassing superior whole the body within the

household the household within the lineage and state the city within the region and the region within the world empire while each level still contained within itself the smaller units from which it was formed The unity that was the empire s highest goal avoided collapse back into the original chaos of nondistinction only by preserving within itself the very divisions on the basis of family or region that it claimed to transcend Medieval Chinese Warfare 300-900 David Graff,2003-09-02 Shortly after 300 AD barbarian invaders from Inner Asia toppled China s Western Jin dynasty leaving the country divided and at war for several centuries Despite this the empire gradually formed a unified imperial order Medieval Chinese Warfare 300 900 explores the military strategies institutions and wars that reconstructed the Chinese empire that has survived into modern times Drawing on classical Chinese sources and the best modern scholarship from China and Japan David A Graff connects military affairs with political and social developments to show how China s history was shaped by war **State Power in Ancient China and Rome** Walter Scheidel,2015 Two thousand years ago the Qin Han and Roman empires were the largest political entities of the ancient world developing simultaneously yet independently at opposite ends of Eurasia Although their territories constituted only a small percentage of the global land mass these two Eurasian polities controlled up to half of the world population and endured longer than most pre modern imperial states Similarly their eventual collapse occurred during the same time The parallel nature of the Qin Han and Roman empires has rarely been studied comparatively Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation This essential new volume builds on the foundation of Scheidel s Rome and China 2009 and opens up a comparative dialogue among distinguished scholars They provide unique insights into the complexities of imperial rule including the relationship between rulers and elite groups the funding of state agents the determinants of urban development and the rise of bureaucracies By bringing together experts in each civilization State Power in Ancient China and Rome provides a unique forum to explore social evolution helping us further understand government and power relations in the ancient world Early Chinese Religion: Part One: Shang Through Han (1250 BC-220 AD) (2 Vols) John Lagerwey,Marc Kalinowski,2008-12-24 Together and for the first time in any language the 24 essays gathered in these volumes provide a composite picture of the history of religion in ancient China from the emergence of writing ca 1250 BC to the collapse of the first major imperial dynasty in 220 AD It is a multi faceted tale of changing gods and rituals that includes the emergence of a form of secular humanism that doubts the existence of the gods and the efficacy of ritual and of an imperial orthodoxy that founds its legitimacy on a distinction between licit and illicit sacrifices Written by specialists in a variety of disciplines the essays cover such subjects as divination and cosmology exorcism and medicine ethics and self cultivation mythology taboos sacrifice shamanism burial practices iconography and political philosophy Produced under the aegis of the Centre de recherche sur les civilisations chinoise japonaise et tib taine UMR 8155 and the cole Pratique des Hautes tudes Paris Peace in the Ancient World Kurt A. Bremmer, 2007 The Strange World of Human Sacrifice is the first modern collection of studies on one of the most gruesome and intriguing aspects of religion The volume starts with a brief introduction which is followed by studies of Aztec human sacrifice and the literary motif of human sacrifice in medieval Irish literature Turning to ancient Greece three cases of human sacrifice are analysed a ritual example a mythical case and one in which myth and ritual are interrelated The early Christians were the victims of accusations of human sacrifice but in turn imputed the crime to heterodox Christians just as the Jews imputed the crime to their neighbours The ancient Egyptians rarely seem to have practised human sacrifice but buried the pharaoh s servants with him in order to serve him in the afterlife albeit only for a brief period at the very beginning of pharaonic civilization In ancient India we can follow the traditions of human sacrifice from the earliest texts up to modern times where especially in eastern India goddesses such as Kali were long worshipped with human victims In Japanese tales human sacrifice often takes the form of self sacrifice and there may well be a line from these early sacrifices to modern kamikaze The last study throws a surprising light on human sacrifice in China The volume is concluded with a
