Searching the Law, 3d Edition Frank Bae, Edward Bander, Francis Doyle, Joel Fishman, Paul Richert, 2021-12-13
Corrections Michael Welch, 2013-10-14
Corrections: A Critical Approach, 3rd edition confronts mass imprisonment in the United States, a nation boasting the highest incarceration rate in the world. This statistic is all the more troubling considering that its correctional population is overrepresented by the poor, African Americans, and Latinos. Not only throwing crucial light on matters involving race and social class, this book also identifies and examines the key social forces shaping penal practice in the US: politics, economics, morality, and technology. By attending closely to historical and theoretical development, the narrative takes into account both instrumental, goal-oriented and expressive cultural explanations to sharpen our understanding of punishment and the growing reliance on incarceration. Covering five main areas of inquiry: penal context, penal populations, penal violence, penal process, and penal state, this book is essential reading for both undergraduate and graduate students interested in undertaking a critical analysis of penology.

Routledge Handbook of Evidence-Based Criminal Justice Practices Edelyn Verona, Bryanna Fox, 2023-10-31 Now more than ever the criminal justice system and the programs policies and practices within it are subject to increased public scrutiny due to well founded concerns over effectiveness fairness and potential unintended consequences One of the best means to address these concerns is to draw upon evidence based approaches demonstrated to be effective through empirical research rather than through anecdote standard practice or professional experience alone National Institute of Justice 2011 The goal of this book is to describe the most useful actionable and evidence based solutions to many of the most pressing questions in the criminal justice system today Specifically this edited volume contains brief and accessible summaries of the best available research alongside detailed descriptions of evidence based practices across different areas of the criminal justice system It is written so that practitioners and researchers alike can use the text as reference tool in their work and in training the new generation of individuals working to improve the system Researchers and practitioners in many areas of criminal justice crime prevention policing courts prosecution defendants judges corrections sanctions and sentencing can reference specific chapters in this book to guide their policy and practice decisions Although theory is a guide for the practices described the chapters will address practical issues in implementation and action This book overcomes the limitations of previous criminal justice practice books in that it is written as a practice resource and reference guide and spans practices and policies across different sectors of the criminal justice system from prevention to policing to sanctions and corrections Each chapter contains a list of action items based upon the best available scientific research that can be implemented in practice to address key issues and long standing challenges in the criminal justice system

Congress. Senate. Committee on the Judiciary. Subcommittee on the Constitution, 1977 Fundamental Rights and Legal Consequences of Criminal Conviction Sonja Meijer, Harry Annison, Ailbhe O'Loughlin, 2019-06-27 The legal position of convicted offenders is complex as are the social consequences that can result from a criminal conviction After they have served their sentences custodial or not convicted offenders often continue to be subject to numerous restrictions in many cases indefinitely due to their criminal conviction In short criminal convictions can have adverse legal consequences that may affect convicted offenders in several aspects of their lives In turn these legal consequences can have broader social consequences Legal consequences are often not formally part of the criminal law but are regulated by different areas of law such as administrative law constitutional law labour law civil law and immigration law For this reason they are often obscured from judges as well as from defendants and their legal representatives in the courtroom The breadth severity and longevity and often hidden nature of these restrictions raises the question of whether offenders fundamental rights are sufficiently protected This book explores the nature and extent of the legal consequences of criminal convictions in Europe Australia and the USA It addresses the following questions What legal consequences can a criminal conviction have How do these consequences affect convicted offenders And how can and should these consequences be limited by law Women and Children as Victims and Offenders: Background, Prevention, Reintegration Helmut Kury, Sławomir Redo, Evelyn Shea, 2016-06-20 This work compiles experiences and lessons learned in meeting the unique needs of women and children regarding crime prevention and criminal justice in particular the treatment and social reintegration of offenders and serves as a cross disciplinary work for academic and policy making analyses and follow up in developing and developed countries Furthermore it argues for a more humane and effective approach to countering delinquency and crime among future generations In a world where development positively depends on the rule of law and the related investment security two global trends may chart the course of development urbanization and education Urbanization will globalize the concepts of justice and fairness education will be dominated by the urban mindset and digital service economy just as a culture of lawfulness will This work looks at crime prevention education as an investment in the sustainable quality of life of succeeding generations and at those who pursue such crime prevention as the providers of much needed skills in the educational portfolio Adopting a reformist approach this work collects articles with findings and recommendations that may be relevant

to domestic and international policymaking including the United Nations Studies and their educational value for the welfare of coming generations The books address the relevant United Nations ideas by combining them with academic approaches Guided by the Editors respective fields of expertise and in full recognition of academic freedom and organized scepticism it includes contributions by lawyers criminologists sociologists and other eminent experts seeking to bridge the gap between academic and policy perspectives as appropriate against the international background including the United Nations developments The second volume opens with Part IV which presents articles on different kinds of crime prevention The effectiveness of punishment and in particular imprisonment is examined by contrasting it with alternative sanctions and the following questions are raised Does harsh punishment have a crime preventive effect What are the side effects of imprisonment on the offenders and their families Are alternatives such as restorative justice or mediation more effective and cheaper Part V outlines proactive strategies of crime prevention e g for potential sex offenders or in the domain of internet crime Part VI envisions a more peaceful and inclusive society which would be realized by improving the protection of women and children in their everyday life and easing the reintegration of those who have become offenders The importance of the role played by the UN in formulating these goals is underlined The volume concludes with an epilogue of the 70th President of the United Nations Economic and Social Council Martin Sajdik and a post scriptum of the editors p

State Court Organization ,1998 Incapacitation Dr Marijke Malsch,Dr Marius Duker,2013-01-28 In many criminal justice systems a new trend towards incapacitation can be witnessed A ubiquitous want for control seems to have emerged as a consequence of perceived safety risks This can be seen not only in the mass incarceration of offenders but also in the disqualification of offenders from jobs in chemical castration in cases of sexual crimes the increased use of electronic monitoring and in the life long monitoring of individuals who pose certain risks Trends towards incapacitation are now even spreading to public administration and the employment sector in the refusal of licenses and the rejection of employees with past criminal records This book discusses the topic of incapacitation from various angles and perspectives It explores how theories of punishment are affected by the more recent emphasis on incapacitation and how criminal justice practice is changing as a consequence of this new emphasis Many contributors express criticisms with this trend towards incapacitation They argue for a better calibration of measures to the severity of the misconduct In addressing an increasingly important development in criminal justice the book will be an essential resource for students researchers and policy makers working in the areas of criminal law sentencing probation and crime prevention
