Sanctity Of Life And Human Dignity:

Sanctity of Life and Human Dignity K. Bayertz, 2012-12-06 Sanctity of life and human dignity are two bioethical concepts that play an important role in bioethical discussions Despite their separate history and content they have similar functions in these discussions In many cases they are used to bring a difficult or controversial debate to an end They serve as unquestionable cornerstones of morality as rocks able to weather the storms of moral pluralism This book provides the reader with analyses of these two concepts from different philosophical professional and cultural points of view Sanctity of Life and Human Dignity presents a comparative analysis of both concepts The Sacredness of Human Life David P. Gushee, 2013-01-14 A comprehensive examination of the sacredness of human life encompassing biblical roots theological elaborations historical cases and contemporary ethical perspectives Gushee argues that viewing human life as sacred is one of the most precious legacies of biblical faith albeit one that the church has too often failed to uphold *A Time to Be Born and a Time to Die* Barry S. Kogan, This volume brings together original essays by many of the best and most prominent figures in the emerging field of biomedical ethics and presents them in a dialogue that significantly updates their earlier work Focusing on the moral dilemmas that recent medical advances have created at both ends of the life course the contributors discuss such issues as patient autonomy hospital policies of risk management new developments in the abortion debate genetic counseling and perinatal care euthanasia and physician assisted suicide testing and treatment policies for HIV infection and fairness in allocating health care and donated organs *Literature and Human Rights* Ian Ward, 2015-03-10 The idea of human rights is not new But the importance of taking rights seriously has never been more urgent The eighteen essays which comprise Literature and Human Rights are written as a contribution to this vital debate Each moreover is written in the spirit of interdisciplinarity reaching across the myriad constitutive disciplines of law literature and the humanities in order to present an array of alternative perspectives on the nature and meaning of human rights in the modern world The taking of human rights seriously it will be suggested depends just as much on taking seriously the idea of the human as it does the idea of rights *Assisted Suicide in the United States* United States. Congress. House. Committee on the Judiciary. Subcommittee on the Constitution, 1996 Encyclopedia of Applied Ethics , 2012-01-10 The Encyclopedia of Applied Ethics Second Edition Four Volume Set addresses both the physiological and the psychological aspects of human behavior Carefully crafted well written and thoroughly indexed the encyclopedia helps users whether they are students just beginning formal study of the broad field or specialists in a branch of psychology understand the field and how and why humans behave as we do The work is an all encompassing reference providing a comprehensive and definitive review of the field A broad and inclusive table of contents ensures detailed investigation of historical and theoretical material as well as in depth analysis of current issues Several disciplines may be involved in applied ethics one branch of applied ethics for example bioethics is commonly explicated in terms of ethical legal social and philosophical issues Editor in Chief Ruth

May,2013-07-26 In this revision of his already classic text William May shows us once again the wisdom of the Catholic Church's moral tradition in its application to contemporary bioethics. Illuminating and engaging and with the attention to nuance that marks all of May's writing. Edward J. Furton, M.A., Ph.D., Ethicist and Director of Publications, The National Catholic Bioethics Center. Since it was first published, Dr. May's text *Catholic Bioethics and the Gift of Human Life* has served an irreplaceable role in Catholic moral education. His new revision adds clear systematic treatments of several additional issues of pressing moral concern to the Church and society. Catholic educators everywhere will welcome this excellent revision. I welcome it. E. Christian Brugger, Associate Professor of Moral Theology, Institute for the Psychological Sciences. With so much bioethical thinking supporting the culture of death, I can think of no better champion of a culture of life than Professor William E. May. Professor May has given us a book which is useful not only for its masterful summary of the moral magisterium on bioethics but also for its treatment of such issues as contraception, artificial reproduction, the care of the dying, human experimentation, and the definition of death and organ transplants. Dr. Mark S. Latkovic, Associate Professor of Moral Theology, Sacred Heart Major Seminary. What the Church teaches and why on issues of euthanasia, in vitro fertilization, genetic counseling, assisted suicide, living wills, persistent vegetative state, organ transplants, and more. **Personal Identity as a Principle of Biomedical Ethics** Michael Quante, 2017-05-24. This book brings together the debate concerning personal identity in metaphysics and central topics in biomedical ethics: conception of birth and death, autonomy, living wills, and paternalism. Based on a metaphysical account of personal identity in the sense of persistence and conditions for human beings, conceptions for beginning of life and death are developed. Based on a biographical account of personality, normative questions concerning autonomy, euthanasia, living wills, and medical paternalism are dealt with. By these means, the book shows that personal identity has different meanings which have to be distinguished so that human persistence and personality can be used to deal with central questions in biomedical ethics. *Jewish Insights on Death and Mourning* Jack Riemer, 2012-11-28. Forward by Sherwin B. Nuland. As Jack Riemer demonstrates in this collection of Jewish resources for mourning and healing, the Jewish tradition has much to offer those who seek its help in time of need. Here are personal as well as practical writings by contemporary authors about the Shiva period, Kaddish, Yizkor, Yahrzeit, and less familiar practices to honor the dead and comfort the living. Some writers describe new rituals that were created to fill special needs. Others raise questions about the tradition: Do Jews believe in an afterlife? How do we mourn the stillborn child? Should we always strive to prolong life? Reflections on these and other issues related to death and dying make this an indispensable resource for coping with some of life's most difficult and sacred moments. The Embryo Shraga Blazer, Etan Z. Zimmer, 2005. Sophisticated imaging devices and new biological technologies have greatly enhanced our ability to detect an ever-increasing number of fetal malformations during pregnancy. Elucidation of the human genetic code and exact molecular definition of various diseases, together with enhanced capabilities for repairing genetic defects, have opened possibilities for

diagnosis and treatment which less than a decade ago could only have been dreamed of. However many clinical topics related to the embryo and human genetics as well as the issues of cloning and the use of human embryonic stem cells have outpaced our ability to keep up appropriate public discourse of ethical, religious and legal issues. This book is designed to bridge the gap between scientific innovation treating clinicians and parents in whose unborn child a malformation was detected and who face a difficult and confusing decision making process. All chapters were written by leading authorities and reflect the state of the art as well as the authors' personal experiences, unique perspectives and predictions for developments in their fields in the near future. Specialists in obstetrics, gynecology and reproductive medicine, pediatrics and neonatology, genetics, molecular biology, philosophy, ethics and law will benefit from this book written by international experts in their fields.

Bioethics of Nonexistence Leonard Tumaini Chuwa, 2020-08-03. The greatest violence and violation of human life is legalization of its disposability and annihilation based on its condition. Such killing, whether of self or another, depicts absolute contradiction and betrayal of the very hypothesis of humanity. It manifests absolute failure to provide due care and that is inhuman. Human life is who we are. It is the basis of any argument for human rights. There cannot be a right to terminate the existence of the rights bearer. Such a right contradicts the possibility of its own existence. There cannot be dignity in terminating the one in whom dignity resides. There can only be indignity in killing a person. The paradox of legalization of euthanasia and assisted suicide represents humanity turned on itself. It is endorsement of existential nihilism and objectification of human life. It is the beginning of the end of humanhood. This book is a critical ethical exploration of mind sets around euthanasia and assisted suicide to provide clarity, sobriety and objectivity. The book is really about ontology of human life. Dr. Leonard Tumaini Chuwa is a Catholic priest and scholar working for Ascension as director of spiritual care for the state of Florida. Dr. Chuwa is certified by the National Association of Catholic Chaplains (NACC). Chuwa has bachelor of arts degrees in philosophy and theology, master of arts degree in theology and religious studies from John Carroll Jesuit University in Cleveland, Ohio, and a doctor of philosophy degree in bioethics and health care ethics from Duquesne University in Pittsburgh, Pennsylvania. Chuwa is a distinguished public speaker on different bioethical issues. His first book, titled *African Indigenous Ethics in Global Bioethics: Interpretation of Ubuntu*, was published by Springer Academic Publishing as the first book in a new global bioethics series. Father Chuwa also authored *Bioethical False Truths: Egotistic and Relativistic Autonomy vs Christian and Ubuntu Relational Autonomy*. **Kidney for Sale by Owner** Mark J. Cherry, 2015-12-28. If most Americans accept the notion that the market is the most efficient means to distribute resources, why should body parts be excluded? Each year thousands of people die waiting for organ transplants. Many of these deaths could have been prevented were it not for the almost universal moral hand wringing over the concept of selling human organs. *Kidney for Sale by Owner* now with a new preface boldly deconstructs the roadblocks that are standing in the way of restoring health to thousands of people. Author and bioethicist Mark Cherry reasserts the case that health care could be improved and lives saved by introducing a

regulated transplant organs market rather than by well meant but misguided prohibitions **The Human Life Review**, 2004 **Law's Meaning of Life** Ngaire Naffine, 2009-01-06

The perennial question posed by the philosophically inclined lawyer is What is law or perhaps What is the nature of law This book poses an associated but no less fundamental question about law which has received much less attention in the legal literature It is Who is law for Whenever people go to law they are judged for their suitability as legal persons They are given or refused rights and duties on the basis of ideas about who matters These ideas are basic to legal decision making they form the intellectual and moral underpinning of legal thought They help to determine whether law is essentially for rational human beings or whether it also speaks to and for human infants adults with impaired reasoning the comotose foetuses and even animals Are these the right kind of beings to enter legal relationships and so become legal persons Are they for example sufficiently rational or sacred or simply human Is law meant for them This book reveals and evaluates the type of thinking that goes into these fundamental legal and metaphysical determinations about who should be capable of bearing legal rights and duties It identifies and analyses four influential ways of thinking about law s person each with its own metaphysical suppositions One approach derives from rationalist philosophy a second from religion a third from evolutionary biology while the fourth is strictly legalistic and so endeavours to eschew metaphysics altogether The book offers a clear coherent and critical account of these complex moral and intellectual processes entailed in the making of legal persons *Assisted Suicide and the European Convention on Human Rights* Stevie Martin, 2021-04-12 Locating assisted suicide within the broader medical end of life context and drawing on the empirical data available from the increasing number of permissive jurisdictions this book provides a novel examination of the human rights implications of the prohibition on assisted suicide in England and Wales and beyond Assisted suicide is a contentious topic and one which has been the subject of judicial and academic debate internationally The central objective of the book is to approach the question of the ban s compatibility with the European Convention on Human Rights afresh freed from the constraints of the existing case law and its erroneous approach to the legal issues and selective reliance on empirical data The book also examines the compatibility of the ban on assisted suicide with rights which have either been erroneously disregarded or not considered by either the domestic courts or the European Court of Human Rights Having regard to human rights jurisprudence more broadly including in the context of abortion the research and analysis undertaken here demonstrates that the ban on assisted suicide violates the rights of a significant number of individuals to life to freedom from torture or inhuman or degrading treatment and to private life Such analysis does not depend on a strained or contrived approach to the rights at issue Rather the conclusions flow naturally from a coherent logical application of the established principles governing those rights While the focus of the book is the Suicide Act 1961 the conclusions reached have implications beyond England and Wales including for the other devolved jurisdictions and international jurisdictions Beyond courts and legislators it will be a valuable resource for students of human rights and medical law as well as medical and legal

practitioners and academics working in human rights and end of life care **Israel Yearbook on Human Rights, Volume 29 (1999)** Yoram Dinstein, Fania Domb, 2021-10-11 The Israel Yearbook on Human Rights an annual published under the auspices of the Faculty of Law of Tel Aviv University since 1971 is devoted to publishing studies by distinguished scholars in Israel and other countries on human rights in peace and war with particular emphasis on problems relevant to the State of Israel and the Jewish people The Yearbook also incorporates documentary materials relating to Israel and the Administered Areas which are not otherwise available in English including summaries of judicial decisions compilations of legislative enactments and military proclamations Volume 29 contains amongst others articles on Sanctity of Life Death with Dignity and Patient Autonomy Medical Ethos Ambivalence and Discretion **Palliative Care - Current Practice and Future Perspectives** Georg Bollig, Erika Zelko, 2024-06-19 The need for Palliative Care is increasing around the world due to demographic change the extension of the lifespan in general and the advances of medical and oncological treatment In Palliative Care quality of life and family centred care are paramount The book entitled Palliative Care Current Practice and Future Perspectives offers an insightful introduction to different concepts and approaches presenting a multidisciplinary perspective and diverse ways of insights provided by a team of authors from various disciplines and regions across Europe Asia and Africa The different chapters divided into five sections provide an insight into current practices from different fields and countries It highlights current knowledge and experiences and discusses ideas for the future development of Palliative Care
