Silicon Valley Sally Richards, 2000      *Cities of Knowledge* Margaret O'Mara, 2005 What is the magic formula for turning a place into a high tech capital How can a city or region become a high tech powerhouse like Silicon Valley For over half a century through boom times and bust business leaders and politicians have tried to become the next Silicon Valley but few have succeeded This book examines why high tech development became so economically important late in the twentieth century and why its magic formula of people jobs capital and institutions has been so difficult to replicate Margaret O Mara shows that high tech regions are not simply accidental market creations but cities of knowledge planned communities of scientific production that were shaped and subsidized by the original venture capitalist the Cold War defense complex At the heart of the story is the American research university an institution enriched by Cold War spending and actively engaged in economic development The story of the city of knowledge broadens our understanding of postwar urban history and of the relationship between civil society and the state in late twentieth century America It leads us to further redefine the American suburb as being much more than formless sprawl and shows how it is in fact the ultimate post industrial city Understanding this history and geography is essential to planning for the future of the high tech economy and this book is must reading for anyone interested in building the next Silicon Valley      *Secrets of Silicon Valley* Deborah Perry Piscione, 2013-04-02 While the global economy languishes one place just keeps growing despite failing banks uncertain markets and high unemployment Silicon Valley In the last two years more than 100 incubators have popped up there and the number of angel investors has skyrocketed Today 40 percent of all venture capital investments in the United States come from Silicon Valley firms compared to 10 percent from New York In *Secrets of Silicon Valley* entrepreneur and media commentator Deborah Perry Piscione takes us inside this vibrant ecosystem where meritocracy rules the day She explores Silicon Valley's exceptionally risk tolerant culture and why it thrives despite the many laws that make California one of the worst states in the union for business Drawing on interviews with investors entrepreneurs and community leaders as well as a host of case studies from Google to Paypal Piscione argues that Silicon Valley's unique culture is the best hope for the future of American prosperity and the global business community and offers lessons from the Valley to inspire reform in other communities and industries from Washington DC to Wall Street      *Silicon Valley Millennium* Ted Unarce, 2017-05-15 *Silicon Valley Millennium* reveals the magic of Silicon Valley while exploring the lives of the extraordinary people who have made the southern end of San Francisco Bay into the world's leading center of technical innovation It explores the origins of the Valley's success featuring archival material of the early pioneers from the 1940 and 1950's the nurturing influence of Stanford University and the entrepreneurs scientists and venture capitalists who are leading the Valley and the world into an increasingly high tech interconnected future Ted Unarce Executive Producer of GTC Films conducted on camera interviews with leaders from different Silicon Valley industries leading Venture Capital firms and with ambitious young entrepreneurs most of whom will

never make it to the top This film taps into the vibrant energy of the dreamers who make Silicon Valley s culture so unique By interviewing several rising entrepreneurs Unarce takes the pulse of the Valley s culture today while providing a window into technologies of the future The interviews also explore how new ventures are financed and the effort it takes to attract investors The film also shines a light on the Valley s many challenges including the misuse of technology by both private and public institutions the invasions of privacy that technology makes possible and the implications for culture as our children increasingly spend their time in front of a screen rather than engaging with friends or family Has the success of Silicon Valley sowed the seeds of its decline This film concludes with an overview of the numerous tech hubs that have emerged in the wake of the Valley s success From New York City to Bangalore from Boston to Tel Aviv the Valley has inspired competition The film explores whether Silicon Valley has what it takes to stay on top
