*Supranationalism in the New World Order* Paul Close,Emiko Ohki-Close,1999-03-25 Supranationalism in the New World Order argues that in the post Cold War distribution of global power and configuration of global players the European Union is just one among a growing number of regional regimes that are acquiring prominent roles in the process of global governance to some extent through the operation of differentiated zones of geo political management The EU is currently the most advanced and influential example of a regional regime by virtue of having the novel European Community at its core the EC uniquely being constructed around supranational institutions decision making and laws But the EU s uniqueness is unlikely to last The evident competitive advantages of supranational regional regimes in conjunction with the realism generally adopted by the various global players is conducive to the consolidation and proliferation of SRRs in a manner consistent with the neo functionalist perspective on the progress of the EU Other prospective SRRs include the Association of Southeast Asian Nations the East Asian Economic Caucus the South Asian Society for Regional Cooperation the North

American Free Trade Area and the Andean Community It is argued that the emerging character of the global system will increasingly depend on SRRs the relationships among such organizations and accordingly the doctrine of supranationalism The book offers a distinctive way of representing the global system global processes and global developments with the help of a set of freshly articulated concepts The result is a novel but highly contentious treatise Subject Catalog Library of Congress,1965

**The Legacy of Supranationalism** P. Close,2000-08-22 The doctrine of supranationalism has been most evident in Europe but has become increasingly a global tour de force Supranationalism is the ideological driving force behind the process of European integration and so the European Union the first supranational regional regime SRR But the same doctrine has bequeathed other gifts to the world and to posterity The EU is evolving as a prominent global player and as a result appears to have become an inspiration and model for the proliferation of other SRRs and proto SRRs However as SRRs acquire greater power relative to traditional global players such as nation states a further state of development has ensued entailing the creation of supranational global regimes SGRs signalled by the progress of the United Nations and the

World Trade Organisation      **Asia Pacific and Human Rights** Paul Close, David Askew, 2017-03-02 Human rights are acquiring an increasingly prominent role on the world stage Interest in concern about and action on human rights are widespread and rising albeit in a far from globally even uniform and untroubled fashion Human rights have generated a booming global industry while having become not unconnectedly highly controversial and deeply contested Human rights matters have emerged as a major source of disagreement dispute and discord at and between the local regional and global levels of social cultural political and economic life These developments are addressed in the book by an examination of the links between the evolving global human rights regime GHRR and the character and course of human rights in the world s most dynamic complex and problematic region that of the Asia Pacific The authors argue that although the Asia Pacific and human rights nexus is influenced by cultural clashes it is largely shaped by power distributions and struggles rooted in the global political economy GPE The prevailing GHRR reflects the way in which globalization processes have been Western led but its future is far from certain given the current shift in the balance of GPE power towards the Asia Pacific and especially East Asia
