Santa In Space:

Perspectives on Public Space in Rome, from Antiquity to the Present Day Jan Gadeyne, 2016-04-22 This volume provides readers interested in urban history with a collection of essays on the evolution of public space in that paradigmatic western city which is Rome Scholars specialized in different historical periods contributed chapters in order to find common themes which weave their way through one of the most complex urban histories of western civilization Divided into five chronological sections Antiquity Middle Ages Renaissance Baroque Modern and Contemporary the volume opens with the issue of how public space was defined in classical Roman law and how ancient city managers organized the maintenance of these spaces before moving on to explore how this legacy was redefined and reinterpreted during the Middle Ages The third group of essays examines how the imposition of papal order on feuding families during the Renaissance helped introduce a new urban plan which could satisfy both functional and symbolic needs The fourth section shows how modern Rome continued to express strong interest in the control and management of public space the definition of which was necessarily selective in this vastly extensive city The collection ends with an essay on the contemporary debate for revitalizing Rome s eastern periphery Through this long term chronological approach the volume offers a truly unique insight into the urban development of one of Europe s most important cities and concludes with a discuss of the challenges public space faces today after having served for so many centuries as a driving force in urban history

Heritage of the Human Movement into Space** Beth Laura O'Leary, P. J. Capelotti, 2014-08-30 This volume addresses the
creation documentation preservation and study of the archaeology of lunar planetary and interstellar exploration It defines
the attributes of common human technological expressions within national and increasingly private exploration efforts and
explore the archaeology of both fixed and mobile artifacts in the solar system and the wider galaxy This book presents the
research of the foremost scholars in the field of space archaeology and heritage a recent discipline of the field of Space
Archaeology and Heritage It provides the emerging archaeological perspective on the history of the human exploration of
space Since humans have been creating a vast archaeological preserve in space and on other celestial bodies This
assemblage of heritage objects and sites attest to the human presence off the Earth and the study of these material remains
are best investigated by archaeologists and historic preservationists As space exploration has reached the half century mark
it is the appropriate time to reflect on the major events and technological development of this particular unique 20th century
arena of human history The authors encapsulate various ways of looking at the archaeology of both fixed and mobile human
artifacts in the solar system As missions continue into space and as private ventures gear up for public and tourist visits to
space and to the Moon and even Mars it is the appropriate time to address questions about the meaning and significance of
