Second Hand:

Secondhand Man Erkut Demirel, Starting with my childhood and throughout my entire life Istanbul provided me with a rich and broad understanding of storytelling witnessed skyscrapers being raised to the skies around the glorious historical areas yet ironically I also watched those skyscrapers being surrounded by jerry built tenements I sadly watched the spectacular fabric of this city getting more and more polluted over time including its green hills also pillaged and destroyed its beautiful woodlands in a blink of an eye I don't believe any other populace in any other place has been as inattentive or negligent as Istanbul I wrote over hundred stories by using a plain natural and in straightforward narrative style Objectively to the best of my abilities I tried portraying the people of Istanbul who are neither urban nor are rustic folks but a mixture of both in their truest forms

Second hand smoke and COPD: lessons from animal studies Adelheid Kratzer, Laima

Taraseviciene-Stewart, Michael Borchers, 2015-05-07 Cigarette smoke exposure is the key initiator of chronic inflammation alveolar destruction and the loss of alveolar blood vessels that lead to the development of chronic obstructive pulmonary disease COPD which is comprised of emphysema and chronic bronchitis Exposure to secondhand smoke SHS is the major risk factor for non smokers to develop emphysema While the first hand smoke is directly inhaled by smokers passive smoking occurs when non smokers are involuntarily exposed to environmental tobacco smoke also known as second hand smoke SHS SHS is a mixture of 2 forms of smoke that come from burning tobacco side stream smoke smoke that comes from the end of a lit cigarette pipe or cigar and mainstream smoke smoke that is exhaled by a smoker These two types of smoke have basically the same composition however in SHS many toxic components are more concentrated than in first hand smoke therefore more hazardous for people's health Several pathological events have been implicated in the development of SHS induced COPD but many aspects of this pathology remain poorly understood halting the development of new advanced treatments for this detrimental disease In this respect we have welcomed leading investigators in the field to share their research findings and provide their thoughts regarding the mechanisms of the SHS exposure induced immune responses and inflammatory mechanisms of lung destruction in SHS induced COPD and related comorbidities

Price Schedules United States. Office of Price Administration, International Trade of Secondhand Goods Michikazu Kojima, Shozo Sakata, 2021-09-28 This book demonstrates the flow of the international trade of secondhand goods and examines the socio economic background and mechanisms of the trade It highlights the

actors involved in the trade of secondhand goods and how traditionally secondhand goods have largely been traded through social or ethnic networks in order to effectively transfer quality and market information. The development of information technology and emergence of new information platforms have changed these business models. The policies and regulations relating to the trade of secondhand goods are explored alongside the negative impact of these trades and the growing awareness of the circular economy. This book illustrates how importing countries as well as international institutions have developed regulations in order to balance these two issues. It will be relevant to students and economists interested in development economics and economic geography.

Negotiating Social Space Patrick O. Alila, Poul O. Pedersen, 2001

Small and micro enterprises have been an important theme in development thinking since the 1950s yet for a variety of reasons East African governments and administrations have been sceptical about their role in their own countries' development. While many constraints have been lifted by the more liberal policies of the 1990s many micro entrepreneurs and their labourers, primarily women, are still fighting for an enlarged social space. The papers in this book describe these strategies of negotiation between rural micro enterprises and the new liberalised rural economy.

The Nordic Council

of Ministers Green Growth Initiative highlighted the need for comprehensive collection reuse and recycling of used textiles as part of a circular economy Over 100 000 tonnes of used textiles are already collected each year in Nordic countries This is for the most part carried out by charities to fund their charitable activities Around three quarters of these textiles are sold on global markets Does the export of used textiles support the circular economy through reuse and recycling or are we simply exporting waste to countries that don t have the facilities to deal with it And does the export have a negative effect on textile industries in receiving countries This report answers these questions by tracking flows of exports to their final destinations and by estimating the socio economic and environmental impacts arising from their subsequent treatment **New**
