Wahl, Scott A. Myers, 2012-08-09 We are in the communication age No matter who you are or how you communicate from baby boomers to millennials born digital or getting there we are all members of a society who connect through the internet not just to it From face to face to Facebook this book invites you to join the conversation about today's issues and have your voice heard This contemporary and engaging text is built from the ground up to bridge the gap and unite our diverse community It shows

Masculinities, Violence and Culture Suzanne E. Hatty, 2000-05-11 This exciting and unique new book offers a post modern analysis linking the contemporary social crisis of masculine subjectivity and the law and order crisis over escalating violence In doing so it examines the major biological psychological sociological and anthropological theoretical models of masculinity and violence and formulates an integrated theoretical approach to the relationship between violence and masculinity In essence the book focuses on violence as a gendered activity specifically a masculine activity Early chapters define and theorize both violence and masculinity and

subsequent chapters focus on representations of violence and masculinity in popular culture. Familiar but insightful examples from cartoons, fiction, television, and the movies are used to illustrate the construction of masculinity in popular culture, as well as the range of images of violence that dominate our senses. Drawing from diverse literatures and traditions, this engaging book is directed to advanced undergraduate and graduate students as well as professionals in Criminology, Legal Studies, Psychology, Sociology, Gender Studies, and Cultural Studies. Key Concepts in Media and Communications Paul Jones, David Holmes, 2011-11-10 A sprightly, critical, and intelligent guided tour around the mansion of media and communications. Cultural research enormously useful for students and researchers. James Curran, Goldsmiths University of London. A highly comprehensive guide to core concepts in media theory and criticism. Andrew Goodwin, University of San Francisco. A great resource for new undergrads and something I urge my students to buy and use as a handy first port of call throughout their studies. Paul Smith, De Montfort University. This book covers the key concepts central to understanding recent developments in media and communications studies. Wide-ranging in scope and accessible in style, it sets out a useful, clear map of the important theories, methods, and debates. The entries critically explore the limits of a key concept as much as the traditions that define it. They include clear definitions, are introduced within the wider context of the field, and each one is fully cross-referenced, is appropriately illustrated with examples, tables, and diagrams, provides a guide to further reading. This book is an essential resource for students of media and communications across sociology, cultural studies, creative industries, and of course media and communications courses.
