International Guide to Student Achievement John Hattie, Eric M. Anderman, 2013-01-17 The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today There are many often competing claims about how to enhance student achievement raising the questions of What works and What works best World renowned bestselling authors John Hattie and Eric M. Liem, Dennis M. McInerney, 2018-04-01 Students school motivation and engagement are key contributors to the quality of their academic learning and performance as well as

growth in other important areas of life social emotional and physical health Fostering motivation and engagement is thus a meaningful educational purpose both in and of itself and as a pathway to holistic student development However motivation and engagement do not develop in a vacuum and effort seeking to facilitate them cannot be effectively pursued without understanding their underpinning sociocultural influences In the first edition of this volume *Big Theories Revisited* McInerney Van Etten 2004 authors of major models of school motivation and engagement were challenged to look into their theoretical work through a sociocultural lens The volume has been well received as objectively reflected in the number of citations of its chapters Significant progress has since been made in the theorizing and research of big theories of school motivation and engagement In this volume we invited a group of internationally renowned scholars to re examine their theoretical and conceptual work by highlighting the what factors and how processes of sociocultural influences in association with the key motivation and or engagement constructs of their expertise We made it clear to our contributors that we solicited new chapters rather than chapters with merely rehashed materials As a result this volume *Big Theories Revisited 2* Liem McInerney 2018 contains chapters that critically discuss sociocultural influences on school motivation and engagement constructs as viewed from focal theories including self determination theory achievement goal theory personal investment theory expectancy value theory self efficacy theory self and co regulated learning models and many others Whereas some of the chapter topics covered in the initial edition are also part of this edition some are new and provide fresh sociocultural angles on achievement relevant processes and outcomes Likewise whereas some of the authors contributed to the earlier edition of the Volume many of them are different What appears to be the same across the two editions is the scholarly distinction of the authors and the substantive rigor of the chapters in advancing our current understanding of this field of enquiry Readers will learn much from and be inspired by stimulating ideas presented in this volume
