Who are the Real Chosen People? Reuven Firestone,2008 Explores the idea of covenant and the expressions of supersessionism as articulated through the scriptures of the three major monotheistic religions Judaism Christianity and Islam **Morality, Violence, and Ritual Circumcision** Na'ama Carlin,2022-11-30 This book uses the Jewish ritual of circumcision to consider how violent acts are embedded within entrenched moral discourses and offers a new perspective for thinking about violence Intervening in contemporary debates on the Jewish ritual of circumcision it departs from both the ordinary secular defences of circumcision for medical reasons and the criticisms that consider it an unethical violation of bodies that cannot consent An examination of the intersection of violence and morality this book rejects the binary logic on which popular debates on circumcision hinge arguing that in some instances violence can be a productive experience and can thus be considered beyond good and bad Engaging with the works of Jacques Derrida the author puts forward a framework of violence of ontology which is characterised as a violence that is related to existence the violence of being which resists definition through binary oppositions In so doing the author contends that circumcision is in fact a form of generative violence that is leveraged for cultural purposes and inherent in the making of bodies As such this volume offers a compelling framework that investigates the relationship between bodies identities ethics and violence and will therefore appeal to scholars of sociology social theory and religion with interests in the sociology of the body ritual and cultural studies

Irenaeus of Lyons and the Mosaic of Christ James G. Bushur,2017-04-21 Whereas many works interpret Irenaeus only as he relates to certain gnostic teachings this book recognizes the broader context of the second century society in which he writes It shows that Irenaeus is interested not simply in expounding the original intent of individual texts but in demonstrating how individual texts fit into the one catholic narrative of salvation As such this is vital reading for scholars of the early Church as well as those with interests in patristics and the development of Christian exegesis *Burning Desire* Paul Linke,2020-08-19 The book provides some of the information everyone is unconsciously looking for It mentions subjects only a philosopher would know about and more It provides an idea to change the age old belief that there is not enough to go around and therefore we war about the most fundamental resources we can find on Earth The book explains to the best of my knowledge that the universe is a giving entity and all we have to do is learn how this is possible This giving entity is fundamentally two particles in union which is a self contained unit at every scale This union is a dynamic entity which looks

like a Torus that generates everything Ancient arts like sacred geometry and others are testimony that there is a fundamental geometric structure in all things and the book highlights this sacred structure known as the Metatrons Cube which is governed by a conscious mind that generates all physical things we are so familiar with It also mentions motion which relates to the golden ratio and how algorithmic functions can explain some of the infinite possibilities we are confronted with
