Secrets In Families And Family Therapy:

Secrets in Families and Family Therapy Evan Imber-Black, 1993-01-01 Secret keeping is a seemingly unavoidable part of human interaction from governments to married couples Unlike privacy which in the West is considered a healthy characteristic of the autonomous adult secrets are often troublesome creating distorted perceptions and strained relationships Secrets moreover are complex They differ in significance a surprise party versus hidden incest in the ways they shape family relationships who knows what about whom in their location between family members or between the family and society and in their effects on individual functioning Does the secret affect only one relationship or the overall way the individual responds to others Because of this complexity secrets are resistant to simple rules Therapy must comprise more than opening up the secret or addressing only the context and not the content or vice versa Therapists are confronted with the difficult task of examining their own values regarding secrecy while at the same time providing an effective therapeutic environment Practical issues of individual safety the meaning of the secret for the family the therapist's attitude towards secrets in general and the family's secret in particular all must be considered in order for treatment to be effective Here Imber Black and her contributors offer a vast array of approaches to helping families deal with secrets involving sexuality race violence parentage substance abuse illness and death The contributors explore the therapeutic social and political issues of secrets while always keeping families firmly in mind Through the many case examples they show us how families at first constricted by the need to maintain secrecy can gain strength through greater openness Part I sets the stage by defining secrets and their often shame bound origins Part II examines secrets throughout the family life cycle in couples between parents and children and with loss Part III shows how addictions such as drug abuse and eating disorders are often symptoms of unhealthy secrets In Part IV secrets of violence and abuse are discussed Part V offers a comprehensive look at social secrets involving sexism heterosexism and taboos Part VI discusses two very charged topics secret keeping involving race and racism and with AIDS Part VII concludes the book by offering a pattern for teaching and handling secrets in therapist training This diverse cast of talented therapists provides an elastic model for treating family secrets while compelling us to reevaluate our own thinking about secrets

The Secret Life of Families Evan Imber-Black, 1999-09-01 Secrets come in all shapes and sizes And for families as well as individuals they are built on a complex web of shifting motives and emotions But today when personal revelations are posted on the Internet or sensationalized on afternoon talk shows we risk losing touch with how important secrets are how they are used and abused their power to harm and heal In this important work Evan Imber Black explores the nature of secrets helping us understand The distinction between healthy privacy and toxic secrecy What to tell and not to tell young children How to safely confront a family zone of silence Why adolescents need to have some secrets and where to draw the line The effect of official secrets like sealed adoption records and medical testing What to consider before revealing an important secret And much more Filled with moving first person
