The Secret Lives of Color Kassia St. Clair, 2017-10-24. One of USA Today's 100 Books to Read While Stuck at Home During the Coronavirus Crisis. A dazzling gift, the unforgettable unknown history of colors and the vivid stories behind them in a beautiful multi-colored volume. Beautifully written. Full of anecdotes and fascinating research, this elegant compendium has all the answers. NPR Best Books of 2017. *The Secret Lives of Color* tells the unusual stories of seventy-five fascinating shades, dyes, and hues. From blonde to ginger, the brown that changed the way battles were fought to the white that protected against the plague, Picasso's blue period to the charcoal on the cave walls at Lascaux, acid yellow to Kelly green, and from scarlet women to imperial purple, these surprising stories run like a bright thread throughout history. In this book, Kassia St. Clair has turned her lifelong obsession with colors and where they come from, whether Van Gogh's chrome yellow sunflowers or punk's fluorescent pink, into a unique study of human civilization. Across fashion and politics, art and war, the secret lives of color tell the vivid story of our culture. This passionate and majestic compendium will leave you bathed in the gorgeous optics of light.

The Secret of Our Success Joseph Henrich, 2017-10-17. How our collective intelligence has helped us to evolve and prosper. Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe more than any other species while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence but in our collective brains, in the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and

altered our physiology anatomy and psychology in crucial ways Later on some collective brains generated and recombined powerful concepts such as the lever wheel screw and writing while also creating the institutions that continue to alter our motivations and perceptions Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution and how culture gene interactions launched our species on an extraordinary evolutionary trajectory Tracking clues from our ancient past to the present *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species immense success and the origins of human uniqueness
