From the Ground Up Alison Sant,2022-01-11 For decades American cities have experimented with ways to remake themselves in response to climate change These efforts often driven by grassroots activism offer valuable lessons for transforming the places we live In From the Ground Up Local Efforts to Create Resilient Cities design expert Alison Sant focuses on the unique ways in which US cities are working to mitigate and adapt to climate change while creating equitable and livable communities She shows how from the ground up we are raising the bar to make cities places in which we don t just survive but where all people have the opportunity to thrive The efforts discussed in the book demonstrate how urban experimentation and community based development are informing long term solutions Sant shows how US cities are reclaiming their streets from cars restoring watersheds growing forests and adapting shorelines to improve people s lives while addressing our changing climate The best examples of this work bring together the energy of community activists the organization of advocacy groups the power of city government and the reach of federal environmental policy Sant presents 12 case studies drawn from research and over 90 interviews with people who are working in these communities to make a difference For example advocacy groups in Washington DC are expanding the urban tree canopy and offering job training in the growing sector of urban forestry In New York transit agencies are working to make streets safer for cyclists and pedestrians while shortening commutes In San Francisco community activists are creating shoreline parks while addressing historic environmental injustice From the Ground Up is a call to action When we make the places we live more climate resilient we need to acknowledge and address the history of social and racial injustice Advocates non profit organizations community based groups and government officials will find examples of how to build alliances to support and embolden this vision together Together we can build cities that will be resilient to the challenges ahead [An Urban Approach To Climate](#)

[Sensitive Design](#) Rohinton Emmanuel,2012-08-06 The need to respond to the rapidly changing city climate is particularly urgent in the tropics where the urban transition is currently at its peak While the need is clearly felt by the tropical urban dwellers texts that provide an overview of the problem and indicate possible design solutions are rare This comprehensive reference will be welcomed by student and practising architects as well as other built environment professionals engaged with the environmental effects of building in worldwide warm and humid climates **Exploring the Boundaries of**

Landscape Architecture Simon Bell,Ingrid Herlin,Richard Stiles,2011-02-20 What have cultural anthropologists historical geographers landscape ecologists and environmental artists got in common Along with eight other disciplines from domains

as diverse as planning and design the arts and humanities as well as the social and natural sciences they are all fields of importance to the theory and practice of landscape architecture In the context of the EU funded LE NOTRE Project carried out under the auspices of ECLAS the European Council of Landscape Architecture Schools international experts from a wide range of related fields were asked to reflect each from their own perspective on the interface between their discipline and landscape architecture The resulting insights presented in this book represent an important contribution to the development the discipline of landscape architecture as well as suggesting new ways in which future collaboration can help to create a greater interdisciplinary richness at a time when the awareness of the importance of the landscape is growing across a wide range of disciplines Exploring the Boundaries of Landscape Architecture is the first systematic attempt to explore the territory at the boundaries of landscape architecture It addresses academics professionals and students not just from landscape architecture but also from its neighbouring discipline all of whom will benefit from a better understanding their areas of shared interest and the chance to develop a common language with which to converse
