Looking At Looking An Introduction To The Intelligence Of Vision:

Looking at looking Theodore E. Parks,Irvin Rock,2000-09-06 This volume brings together a selection of the most influential current thinkers in the area of visual perception We are often confused by our visual systems for example size distortions but there is an underlying intelligence to our visual system even in the face of what would seem to be short circuits within our sensory processing This book explores varying views of this intelligence **Looking at Looking**

Theodore E. Parks,2008-11 Many of the most captivating phenomena and ideas within the field of perception revolve around the question of the intelligence or not of vision Written by some of the field s top professionals Looking at Looking makes these readily available to new upper division students as a compelling answer to the question Why study perception

Sexing the Look in Popular Visual Culture Kathy Justice Gentile,2020-05-15 With dramatic advances in media technology the practice of sexing or erotically enhancing images has become an increasingly widespread phenomenon The eroticized look as both noun and verb the thing or image that draws our look and the look that we bestow on images that elicit our visual physiological and emotional attention is the focus of the essays in this volume Every day whether we are out in the world or in the workplace or in the privacy of our homes we enter visual fields that heighten and distort reality distortions that often emphasize sexuality and erotic promise The contributors for this collection look at the sexualization of visual culture from a range of disciplinary perspectives including literature film studies history philosophy art history and media studies with gender and sexuality studies providing the encompassing critical framework that binds these essays into a coherent analytical project The essays in this collection offer new theoretical conceptions of perception and representation as well as rigorous reconsiderations of the polarized feminist debates over pornographic images Essays on literature and film range from an interrogation of Baudrillard s theory of seduction that posits femininity as a strategy of illusion and subversion to Bridget Jones s challenge to the prevailing disciplinary regime that prescribes rigid standards for feminine beauty to a reevaluation of the subversive potential of sexy female robots Other contributors consider the history of nudist images in US periodicals the proliferation of eroticized images of girls in new digital technologies gentlemanly masculinity in men s fashion in late Victorian England and a rape prevention campaign s unintentional reinforcement of persistent heterosexist

Artificial Intelligence and Visualization: Advancing Visual Knowledge Discovery Boris Kovalerchuk, Kawa Nazemi, Răzvan Andonie, Nuno Datia, Ebad Banissi, 2024-04-24. This book continues a series of Springer publications devoted to the emerging field of Integrated Artificial Intelligence and Machine Learning with Visual Knowledge Discovery and Visual Analytics that combine advances in both fields. Artificial Intelligence and Machine Learning face long-standing challenges of explainability and interpretability that underpin trust. Such attributes are fundamental to both decision making and knowledge discovery. Models are approximations and at best interpretations of reality that are transposed to algorithmic form. A visual explanation paradigm is critically important to address such challenges as current studies demonstrate in salience analysis in deep learning for images and texts. Visualization means are generally effective for discovering and explaining high-dimensional patterns in all high-dimensional data while preserving data properties and relations in visualizations is challenging. Recent developments such as in General Line Coordinates open new opportunities to address such challenges. This book contains extended papers presented in 2021 and 2022 at the International Conference on Information Visualization IV on AI and Visual Analytics with 18 chapters from international collaborators. The book builds on the previous volume published in 2022 in the Studies in Computational Intelligence. The current book focuses on the following themes: knowledge discovery with lossless visualizations, AI/ML through visual knowledge discovery with visual analytics, case studies, application and visual knowledge discovery in text mining and natural language processing. The intended audience for this collection includes but is not limited to developers of emerging AI, machine learning, and visualization applications, scientists, practitioners, and research students. It has multiple examples of the current integration of AI, machine learning, and visualization for visual knowledge discovery, visual analytics, and text and natural language processing. The book provides case examples for future directions in this domain. New researchers find inspiration to join the profession of the field of AI, machine learning through a visualization lens.
