Picturing Animals in Britain, 1750-1850 Diana Donald,2007-01-01 From fine art paintings by such artists as Stubbs and Landseer to zoological illustrations and popular prints a vast array of animal images was created in Britain during the century from 1750 to 1850 This highly original book investigates the rich meanings of these visual representations as well as the ways in which animals were actually used and abused What Diana Donald discovers in this fascinating study is a deep and unresolved ambivalence that lies at the heart of human attitudes toward animals The author brings to light dichotomies in human thinking about animals throughout this key period awestruck with the beauty and spirit of wild animals people nevertheless desired to capture and tame them the belief that other species are inferior was firmly held yet at the same time animals in stories and fables were given human attributes though laws against animal cruelty were introduced the overworking of horses and the allure of sport hunting persisted Animals are central in cultural history Donald concludes and compelling questions about them then and now remain unanswered *Luxury in Global Perspective* Karin Hofmeester,Bernd-Stefan Grewe,2016-11-28 Global history is predicated on connections and exchange how connections between far flung people places and objects are forged through a variety of exchanges As world history has matured as a field its practitioners have found the movement of commodities between peoples places and time a fruitful vehicle for research and teaching Studies of bulk items like salt spices coffee and other globally traded commodities abound but few scholars have examined the role of luxury goods from a global perspective This anthology charts the many different contexts in which luxury objects have been used across the globe ranging from the social practices linked to these objects to their

production exchange and consumption as well as how these practices varied over time and space and how different societies attributed diverse meanings to the same objects Using luxury goods as a conduit *Luxury in Global Perspective* enriches our understanding of global history **One Kingdom** Deborah Noyes, 2006 Photographer and former zookeeper Noyes delivers an artfully designed photo essay that examines the ways humans lives have overlapped with animals throughout history and embarks on a quest for understanding the other kingdom Photos *The Moral Lives of Animals* Dale Peterson, 2012-06-19 Examines the moral behavior observed in animals and argues that human beings are not the only species to live by the principles of cooperation kindness and empathy *The Great Mental Models, Volume 2* Shane Parrish, Rhiannon Beaubien, 2024-10-15 From the New York Times bestselling author of *Clear Thinking* and Farnam Street founder Shane Parrish The second book in the timeless *Great Mental Models* series Time and time again great thinkers such as Charlie Munger and Warren Buffett have credited their success to mental models representations of how something works that can scale onto other fields Mastering a small number of mental models enables you to rapidly grasp new information identify patterns others miss and avoid the common mistakes that hold people back Volume 2 of *The Great Mental Models* series provides a collection of over twenty important concepts from physics chemistry and biology in a clear and accessible style Not only will you better understand the hidden forces that influence the world around you you ll also learn how those forces can work to your advantage Some of the mental models covered in this book include Leverage When the application of a small force to one end results in a larger force at the other end Inertia An object or organization at rest will stay at rest unless acted upon by an external force Activation Energy The minimum amount of energy required to incite a chemical reaction Ecosystems A community of organisms that have complex relationships to each other The *Great Mental Models* series demystifies once elusive concepts and illuminates rich knowledge that traditional education overlooks This series is the most comprehensive and accessible guide on using mental models to better understand our world solve problems and gain an advantage **Jumbos and Jumping Devils** Nisha P.R., 2020-06-12 *Jumbos and Jumping Devils* is a pioneering exploration of the social history of circus in India over the last 150 years It presents a wide variety of amazing tales ranging from the blooming and evolution of circus acrobatics in early twentieth century Malabar to the sensational legal battles following the ban of wild animals and children from the circus ring in the twenty first century Alongside extensive fieldwork and interviews the author has used memorabilia including photographs notices posters letters diaries unpublished autobiographies private papers and recollections of the circus community to chronicle the hitherto untold story of the Indian circus The book paves the way for a new sociocultural analysis of performance genres and popular culture in the subcontinent against several overlapping contexts These include the remaking of caste and gender identities transformation of physical cultures and bodies interventions of the colonial and postcolonial states and emergence of new transregional and transnational spaces **Thirty-Three Ways of Looking at an Elephant** Dale Peterson, 2020-10-20 Elephants have

captivated the human imagination for as long as they have roamed the earth appearing in writings and cultures from thousands of years ago and still much discussed today In *Thirty Three Ways of Looking at an Elephant* veteran scientific writer Dale Peterson has collected thirty three essential writings about elephants from across history with geographical perspectives ranging from Africa and Southeast Asia to Europe and the United States An introductory headnote for each selection provides additional context and insights from Peterson s substantial knowledge of elephants and natural history The first section of the anthology *Cultural and Classical Elephants* explores the earliest mentions of elephants in African mythology Hindu theology and Aristotle and other ancient Greek texts *Colonial and Industrial Elephants* finds elephants in the crosshairs of colonial exploitation in accounts pulled from memoirs commoditizing African elephants as a source of ivory novel targets for bloodsport and occasional export for circuses and zoos *Working and Performing Elephants* gives firsthand accounts of the often cruel training methods and treatment inflicted on elephants to achieve submission and obedience As elephants became an object of scientific curiosity in the mid twentieth century wildlife biologists explored elephant families and kinship behaviors around sex and love language and self awareness and enhanced communications with sound and smell The pieces featured in *Scientific and Social Elephants* give readers a glimpse into major discoveries in elephant behaviors *Endangered Elephants* points to the future of the elephant whose numbers continue to be ravaged by ivory poachers Peterson concludes with a section on fictional and literary elephants and ends on a hopeful note with the 1967 essay *Dear Elephant Sir* which argues for the moral imperative to save elephants as an act of redemption for their systematic abuse and mistreatment at human hands Essential to understanding the history and experience of this beloved and misunderstood creature *Thirty Three Ways of Looking at an Elephant* is a must for any elephant lover or armchair environmentalist

Touching Space, Placing Touch Mark Paterson, Martin Dodge, 2016-02-24 Given that touch and touching is so central to everyday embodied existence why has it been largely ignored by social scientists for so long What is the place of touch in our mixed spaces of sociality work domesticity recreation creativity or care What conceptual resources and academic languages can we reach towards when approaching tactile activities and somatic experiences through the body How is this tactile landscape gendered How is touch becoming revisited and revalidated in late capitalism through animal encounters tourism massage beauty treatments professional medicine everyday spiritualities or the aseptic touch free spaces of automated toilets How is touch placed and valued within scholarly fieldwork and research itself integral as it is to the production of embodied epistemologies How is touch involved in such aesthetic experiences as shaping objects in sand or encountering fleshly bodies within a painting The goal of this edited collection Touching Space Placing Touch is twofold 1 To further advance theoretical and empirical understanding of touch in social science scholarship by focussing on the differential social and cultural meanings of touching and the places of touch 2 To develop a multi faceted and interdisciplinary explanations of touch in terms of individual and social life personal experiences and tasks and their related cultural contexts The twelve essays in this volume provide a rich combination of theoretical resources methodological approaches and empirical investigation Each chapter takes a distinct aspect of touch within a particular spatial context exploring this through a mixture of sustained empirical work critical theories of embodiment philosophical and psychoanalytic approaches to gendered touch and touching or the relationship between visual and non visual culture to articulate something of the variety and variability of touching experiences The contributors are a mixture of established and emerging researchers within a growing interdisciplinary field of scholarship yet the volume has a strong thematic identity and therefore represents the formative collection concerning the multiple senses of touch within social science scholarship at this time

Entertaining Elephants Susan Nance, 2013-03-27 How the lives and labors of nineteenth century circus elephants shaped the entertainment industry Consider the career of an enduring if controversial icon of American entertainment the genial circus elephant In *Entertaining Elephants* Susan Nance examines elephant behavior drawing on the scientific literature of animal cognition learning and communications to offer a study of

elephants as actors rather than objects in American circus entertainment between 1800 and 1940 By developing a deeper understanding of animal behavior Nance asserts we can more fully explain the common history of all species Entertaining Elephants is the first account that uses research on animal welfare health and cognition to interpret the historical record examining how both circus people and elephants struggled behind the scenes to meet the profit necessities of the entertainment business The book does not claim that elephants understood endorsed or resisted the world of show business as a human cultural or business practice but it does speak of elephants rejecting the conditions of their experience They lived in a kind of parallel reality in the circus one that was defined by their interactions with people other elephants horses bull hooks hay and the weather Nance s study informs and complicates contemporary debates over human interactions with animals in entertainment and beyond questioning the idea of human control over animals and people s claims to speak for them As sentient beings these elephants exercised agency but they had no way of understanding the human cultures that created their captivity and they obviously had no claim on human social and political power They often lived lives of apparent desperation
