of thought and will in a coming age where minds can be manipulated with great precision *The Lyric in the Age of the Brain* Nikki Skillman,2016-06-06 Science has transformed understandings of the mind supplying physiological explanations for what once seemed transcendental Nikki Skillman shows how lyric poets caught between a reductive scientific view and naive literary metaphors struggled to articulate a vision of consciousness that was both scientifically informed and poetically truthful **The Age of Heretics** Art Kleiner,2008-07-28 In this second edition of his bestselling book author Art Kleiner explores the nature of effective leadership in times of change and defines its importance to the corporation of the future He describes a heretic as a visionary who creates change in large scale companies balancing the contrary truths they can't deny against their loyalty to their organizations The Age of Heretics reveals how managers can get stuck in counterproductive ways of doing things and shows why it takes a heretical point of view to get past the deadlock and move forward The Second Brain Michael D. Gershon,2024-04-16 Persuasive impassioned hopeful news for those suffering from functional bowel disease New York Times Book Review Dr Michael Gershon's groundbreaking book fills the gap between what you need to know and what your doctor has time to tell you Dr Michael Gershon has devoted his career to understanding the human bowel the stomach esophagus small intestine and colon His thirty years of research have led to an extraordinary rediscovery nerve cells in the gut that act as a brain This second brain can control our gut all by itself Our two brains the one in our head and the one in our bowel must cooperate If they do not then there is chaos in the gut and misery in the head everything from butterflies to cramps from diarrhea to constipation Dr Gershon's work has led to radical new understandings about a wide range of gastrointestinal problems including gastroenteritis nervous stomach and irritable bowel syndrome The Second Brain represents a quantum leap in medical knowledge and is already benefiting patients whose symptoms were previously dismissed as neurotic or it's all in your head *The Rise and Fall of the Age of Psychopharmacology* Edward Shorter,2021 In *The Rise and Fall of the Age of Psychopharmacology* esteemed historian Edward Shorter proposes that the recent history of psychiatry is that of a failed scientific discipline of medicine Medicine generally is about the story of progress but psychiatry's story is that of failure in diagnosis in therapeutics and in the ability to deliver science based care to suffering individuals **Education and Mind in the Knowledge Age** Carl Bereiter,2005-04-11 In this book Carl Bereiter a distinguished and well known cognitive educational psychologist presents what he calls a new way of thinking about knowledge and the mind He argues that in today's Knowledge Age education's conceptual tools are inadequate to address the pressing educational challenges and opportunities of the times Two things are required first to replace the mind as container metaphor with one that envisions a mind capable of sustaining knowledgeable intelligent behavior without actually containing stored beliefs second to recognize a fundamental difference between knowledge building and learning both of which are essential parts of education for the knowledge age Connectionism in cognitive science addresses the first need certain developments in post positivist epistemology address the second The author explores both the theoretical bases and

the practical educational implications of this radical change in viewpoint The book draws on current new ways of thinking about knowledge and mind including information processing cognitive psychology situated cognition constructivism social constructivism and connectionism but does not adhere strictly to any camp Above all the author is concerned with developing a way of thinking about the mind that can usher education into the knowledge age This book is intended as a starting point
