**Hegel's Century** Jon Stewart,2021-10-28 The remarkable lectures that Hegel gave in Berlin in the 1820s generated an exciting intellectual atmosphere which lasted for decades From the 1830s many students flocked to Berlin to study with people who had studied with Hegel and both his original students such as Feuerbach and Bauer and later arrivals including Kierkegaard Engels Bakunin and Marx evolved into leading nineteenth century thinkers Jon Stewart s panoramic study of Hegel s deep influence upon the nineteenth century in turn reveals what that century contributed to the wider history of philosophy It shows how Hegel s notions of alienation and recognition became the central motifs for the era s thinking how these concepts spilled over into other fields like religion politics literature and drama and how they created a cultural phenomenon so rich and pervasive that it can truly be called Hegel s century This book is required reading for historians of ideas as well as of philosophy      *The Antinomies of Classical Thought: Marx and Durkheim (Theoretical Logic in Sociology)* Jeffrey Alexander,2014-04-24 This volume challenges prevailing understanding of the two great founders of sociological thought In a detailed and systematic way the author demonstrates how Marx and Durkheim gradually developed the fundamental frameworks for sociological materialism and idealism While most recent interpreters of Marx have placed alienation and subjectivity at the centre of his work Professor Alexander suggests that it was the later Marx s very emphasis on alienation that allowed him to avoid conceptualizing subjectivity altogether In Durkheim s case by contrast the author argues that such objectivist theorizing informed the early work alone and he demonstrates that in his later writings Durkheim elaborated an idealist theory that used religious life as an analytical model for studying the institutions of secular society      Historicism and Its Problems Ernst Troeltsch,2024 In this volume Ernst Troeltsch embraces historical relativity while rejecting historical relativism and thereby provides a model for the philosophy of history The volume remains as relevant as it was in 1923      Ludwig Feuerbach Friedrich Engels,1934      **Karl Marx and Friedrich Engels (RLE Marxism)** Cecil L. Eubanks,2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books monographs articles chapters and doctoral dissertations together with the works of their interpreters The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels      Max Stirner on the Path of Doubt Lawrence S. Stepelevich,2020-12-02 Max Stirner on the Path of Doubt examines Stirner s incisive criticism of his contemporaries during the period from the death

of Hegel in 1831 to the 1848 German Revolution Stirner's work mainly the *Ego and His Own* considered each of the major figures within that German school known as The Young Hegelians Lawrence S. Stepelevich argues that for Stirner they were but pious atheists and their common revolutionary ideology concealed an ancient religious ground which Stirner set about to reveal The central doctrine of this school that Mankind was its own Savior was initiated in 1835 by the theologian David F. Strauss's in his *Life of Jesus* and it progressed with August von Cieszkowski's mystical recasting of history followed by Bruno Bauer's absolute atheism and Ludwig Feuerbach's statement that Man is God This soon found reflection in the *Sacred History of Mankind* declared by Moses Hess Within a decade the result was the secular reformulation of this theological ideology into the Scientific Socialism of Karl Marx and Frederick Engels Although linked to it Max Stirner was the most relentless and feared critic of this school His work never out of print but largely ignored by academics has inspired countless individualists set upon rejecting any form of religious or political causes and finding Stirner's assertion that he had set his cause upon nothing took this as their own cause

*The Structure of Political Thought* Charles N. R. McCoy, 2017-07-05 Originally published in 1963 this classic book is a rethinking of the history of Western political philosophy Charles N. R. McCoy contrasts classical medieval principles against the hypotheses at the root of modern liberalism and modern conservatism In Part I *The Classical Christian Tradition from Plato to Aquinas* the author lays the foundation for a philosophical structure capable of producing constitutional liberty Part II *The Modern Theory of Politics from Machiavelli to Marx* attempts to show beginning with Machiavelli the reversal and destruction of the pre modern structure postulated in Part I McCoy stresses the great contributions of Aristotle to political thought found in his more familiar *Ethics and Politics* but also includes key insights drawn from *Metaphysics* and *Physics* These contributions are developed and perfected McCoy argues by Augustine and Aquinas Two other important features include McCoy's epistemological insights into Plato's work that will be new to many readers and the author's juxtaposition of traditional natural law with the modernized theory of natural law The modern account of autonomous natural law in McCoy's view helps explain the totalitarian direction of key aspects of modern political thought This classic volume on the origins of modern philosophical thought remains a standard in the field

**Between Ideology and Utopia** A. Liebich, 2012-12-06 Nineteenth century European intellectual history has given rise to such varied and abundant research that one is surprised to find certain important problems long identified and yet still relatively unexplored Such is the case for certain aspects of the crucial transition from Hegel to Marx for minority tendencies among French socialists and for the Messianic phenomenon national and religious so central to the period particularly in Eastern Europe and so rarely studied in detail Certainly these lacunae are exemplified by the absence of any comprehensive work on August Cieszkowski whose overall contribution to the history of the period may be marginal but whose specific role in each of the areas mentioned is both significant in itself and illustrative of certain wider problems Cieszkowski first achieved recognition as the author of the *Pro legomena zur Historiosophie* in 1838 This short tract never

became popular among the Berlin Hegelians for whom it was intended but it affected a number of radical intellectuals outside their circle His next work *Gott und Palingenesie* was a defense of personal immortality against Hegelian revisionism The following year however he founded as a bulwark of the Hegelian school the Philosophische Gesellschaft against external critics and internal dissolution

**The Return of Nature** John Bellamy Foster, 2020-06-16 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster's *Marx's Ecology: Materialism and Nature* introduced a new understanding of Karl Marx's revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with *The Return of Nature: Socialism and Ecology* Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today's unprecedented planetary emergencies The *Return of Nature* begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs

Karl Marx and Friedrich Engels Cecil Eubanks, 2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books monographs articles chapters and doctoral dissertations together with the works of their interpreters The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels

*The Writings: v. 2: January 1956-December 1957* Zedong Mao, M.Y.M. Kau, Laifong Leung, 2019-07-23 This collection of the correspondence of Mao Zedong during the period 1956 to 1957 explores the question of legitimizing the leadership of the CCP the pace of the socialist transformation of China's economy and the issue of the divergence of ideological opinion over the strategy of revolution

Modern and Postmodern Crises of Symbolic Structures Peter Šajda, 2020-10-20 In debates about philosophical anthropology human beings have been defined in different ways In *Modern and Postmodern Crises of Symbolic Structures* the contributors view the human being primarily as animal symbolicum They examine how the human being creates interprets and changes symbolic structures as well as how he is affected and impacted by them The focus lies on the context of modernity and postmodernity which is characterized by a number of interrelated crises of symbolic structures These crises have affected the realms of science religion art politics and education and thus provoked crucial changes in the human being's relations to himself others and reality The crises are not

viewed merely as manifestations of dysfunctions but rather as complex processes of transformation that also provide new opportunities

**Evolution, Marxian Biology, and the Social Scene** Conway Zirkle, 2016-11-11 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas

*Classical and Contemporary Social Theory* Tim Delaney, 2016-01-08 Classical and Contemporary Social Theory Investigation and Application 1 e is the most comprehensive informative social theory book on the market The title covers multiple schools of thought and applies their ideas to society today Readers will learn the origins of social theory and understand the role of myriad social revolutions that shaped the course of societies around the world

*Philosophy and Political Economy in Some of Their Historical Relations* James Bonar, 1922

*The Concept of Nature in Classical German Philosophy* Luis Felipe Garcia, 2024-12-02 Classical German Philosophy has traditionally been understood as the period in the history of ideas in which the investigation of the human mind takes precedence over the investigation of the natural world This assessment has a twofold consequence On the one hand the philosophy of the period has been praised for its contributions to our understanding of multiple expressions of human rationality such as history art and religion On the other hand such a philosophy has been criticized for its obscure speculations alien to the standards of modern scientific cognition The philosophy of nature developed at the time has been accordingly dismissed as a piece of outdated metaphysics Challenging this view the contributions collected in this book argue for the historical and contemporary relevance of the approaches to nature formulated at the time
