*Race and Education in New Orleans* Walter Stern,2018-05-04 Surveying the two centuries that preceded Jim Crow s demise *Race and Education in New Orleans* traces the course of the city s education system from the colonial period to the start of school desegregation in 1960 This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century Walter C Stern begins his account with the mid eighteenth century kidnapping and enslavement of Marie Justine Sirnir who eventually secured her freedom and played a major role in the development of free black education in the Crescent City As Sirnir s story and legacy illustrate schools such as the one she envisioned were central to the black antebellum understanding of race citizenship and urban development Black communities fought tirelessly to gain better access to education which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo even as they conceded to demands from the black community for expanded educational opportunities The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth when conflicts over land and resources sharply intensified Stern argues that the post Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity segregated schools gave rise to segregated communities which in turn created structural inequality in housing that impeded desegregation s capacity to promote racial justice By taking a long view of the interplay between education race and urban change Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic though often improvisational process A vital and accessible history *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city s racial and urban landscapes

Andy Horowitz,2020-07-07 Winner of the Bancroft Prize Louisiana Endowment for the Humanities Book of the Year A Publishers Weekly Book of the Year The main thrust of Horowitz s account is to make us understand Katrina the civic calamity not the storm itself as a consequence of decades of bad decisions by humans not an unanticipated caprice of nature Nicholas Lemann New Yorker Hurricane Katrina made landfall in New Orleans on August 29 2005 but the decisions that caused the disaster can be traced back nearly a century After the city weathered a major hurricane in 1915 its Sewerage and Water Board believed that developers could safely build housing near the Mississippi on lowlands that relied on significant government subsidies to stay dry When the flawed levee system failed these were the neighborhoods that were devastated The flood line tells one important story about Katrina but it is not the only story that matters Andy Horowitz investigates the response to the flood when policymakers made it easier for white New Orleanians to return home than for African Americans He explores how the profits and liabilities created by Louisiana s oil industry have been distributed unevenly prompting dreams of abundance and a catastrophic land loss crisis that continues today Masterful Disasters have the power to reveal who we are what we value what we re willing and unwilling to protect New York Review of Books If you want to read only one book to better understand why people in positions of power in government and industry do so little to address climate change even with wildfires burning and ice caps melting and extinctions becoming a daily occurrence this is the one Los Angeles Review of Books      *Catalogue of Copyright Entries* ,1927      *Hearings* United States.
