*Product Markets* Adriaan H. Dierx, F. Ilzkovitz, Khalid Sekkat, 2004-01-01 Europe's achievements in economic integration have attracted worldwide interest and are seen as an example for other regions to follow. Ten years after the completion of the Single Market Programme this book is able to utilize empirical data not available to previous studies also building on research by reputed academic experts and staff at the European Commission. The book reveals that European product market integration has a significant impact on the conditions of competition, the strategies of companies and the structure of industry. It adds a quarter of a percentage to annual GDP growth rates and has not led to an increased exposure of the EU to asymmetric shocks. However, the book argues that further improvements in the functioning of European product markets are needed in order to improve the EU's growth performance over the next decade. Invaluable, the book provides not only current information about Europe's achievements in economic integration but also methodology to assess the outcome of economic integration in other regions of the World such as NAFTA, MERCOSUR and ASEAN.

*Understanding Sponsored Search* Jim Jansen, 2011-07-25 This book addresses the underlying foundational elements both theoretical and methodological of sponsored search. As such, the contents are less affected by the ever-changing implementation aspects of technology. Rather than focusing on the how, this book examines what causes the how. Why do certain keywords work while others do not? Why does that ad work well when others that are similar do not? Why does a key phrase cost a given amount? Why do we measure what we do in keyword advertising? This book speaks to that curiosity to understand why we do what we do in sponsored search. The content flows through the major components of any sponsored search effort regardless of the underlying technology or client or product. The book addresses keywords, ads, consumers, pricing, competitors, analytics, branding, marketing, and advertising, integrating these separate components into an incorporated whole. The focus is on the critical elements with ample illustrations and with enough detail to lead the interested reader to further inquiry.
