Bryson, 2015-10-09 Socialism Origins Expansion Decline and Attempted Revival in the United States This book is an attempt to address all the important economic aspects of socialism the concepts and theories the historical attempts to implement socialist economic systems and the endeavor to establish socialism in the United States Part I reviews the origins and ideas of socialism which reflect an aspiration radically to transform the market system the great advantages of which were explained by Adam Smith Part II reviews the establishment of Marxist Leninist economic systems in the USSR and the East European countries The movement featured central economic planning which survived from the 1920s until about 1990 its failure was the attempt of statist organization to crush the market system and replace it with Stalinist command planning Central planning was meticulously copied in the bloc countries of East Europe in China in India and elsewhere The national replications of central economic planning always produced the same disappointing usually disastrous results Efforts to reform the system always failed Meanwhile the democratic countries of Western Europe established socialist parties and policies but in less than a century after Marx the great hopes of socialism to achieve successful and productive nationalization of industries on the basis of a national economic plan had been recognized as unproductive and undesirable Part III reviews the failed attempt to establish a viable socialist party in the United States The real thrust toward socialism originally launched by the New Deal of Roosevelt came when Barak Obama a thoroughly indoctrinated and dedicated socialist ascended to the US presidency This socialism is an attempt to expand income redistribution and social welfare policies and to pursue massive industrial regulation and unconstitutional interventions in the private sector The implications of these policies are discussed together with the associated loss of market freedoms and personal liberties **The Contradictions of "Real Socialism": The Conductor and the Conducted** Michael Lebowitz, 2012 In this concise volume noted scholar and economist Michael A Lebowitz considers the legacy of twentieth century socialist societies or what some

have termed real socialism While these societies were able to claim major achievements in areas from health care to education to popular culture they nonetheless met limited success in eroding what Marx called the opposition of the worker as direct producer and the proprietor of the means of production That this opposition between workers and managers continued to exist in one form or another under real socialism means that according to L Swedish Economists in the 1930s Debate on Economic Planning Benny Carlson,2018-12-06 The 1930s characterised by repercussions from World War I and the Great Depression was an era of populism nationalism protectionism government intervention and attempts to create planned economies The perceived need for economic planning emerged in Sweden in part due to the increasing political strength of the Social Democrats and their evolution from a party hampered by Marxist fatalism to a pragmatic mass movement The Swedish debate continued beyond World War II and is still relevant to today s economic crises which have resulted in a demand for action coming from below populism and above elitism Carlson surveys the arguments for and against economic planning as they were put forward by leading Swedish economists in the 1930s with a focus on the thoughts of Gustav Cassel Eli Heckscher G sta Bagge Gunnar Myrdal and Bertil Ohlin among others In so doing he provides a timely exploration of the debate on the necessary and desirable extent of state intervention in market economies Reader's Guide to the Social Sciences Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense

Markets William A. Jackson,2019-04-18 Defining markets has never been an easy task Despite their importance for economic theory and practice they are hard to pin down as a concept and economists have tended to adopt simplified axiomatic models or rely on piecemeal case studies This book argues that an extended range of theory social as well as economic can provide a better foundation for the portrayal of markets The book first looks at the definition of markets their inadequate treatment in orthodox economic theory and their historical background in the pre capitalist and capitalist eras It then assesses various alternatives to orthodox theory categorised as social cultural structural functional and ethical approaches Among the alternatives considered are institutionalist accounts Marxian views network models performativity arguments field theories Austrian views and ethical notions of fair trade A key finding of the book is that these diverse approaches valuable as they are could present a more effective challenge to orthodoxy if they were less disparate Possibilities are investigated for a more unified theoretical alternative to orthodoxy Unlike most studies of markets this book adopts a fully interdisciplinary viewpoint expressed in accessible non technical language Ideas are brought together from heterodox economics social theory critical realism as well as other social sciences such as sociology anthropology and geography Anybody seeking a broad critical survey of the theoretical analysis of markets will find this book useful and it will

be of great interest to economists social scientists students and policy makers *Dynamic International Oil Markets* C. van der Linde,2013-03-14 Writing this book would have been impossible without the help of certain institutions and persons For a gas producing and oil processing country like the Netherlands there was surprisingly very little publicly available research material Public libraries collections contained with a certain degree of inconsistency little of the more specialised sources I would therefore like to express my gratitude towards Royal Dutch Shell and especially the library staff in The Hague for allowing me to use the company s library thanking them for their assistance in finding and supplying the required data I am also grateful for the financial assistance of the Nederlandse organisatie voor wetenschappelijk onderzoek NWO and the Faculty of Law of the University of Leiden They provided the financial means to work a crucial month in the very well equipped library of the Oxford Institute for Energy Studies I am indebted to the staff of the Oxford Institute for Energy Studies and particularly to Robert Mabro and Jeremy Turk for their comments support and friendship After I spent a month in the Institute in July 1989 I was able to return for two five month periods in 1990 and 1991 For both periods the Oxford Institute and the Leiden Law Faculty provided me with the necessary means I would also like to express special gratitude to some people who have been a great support and supplied me with valuable comments at various stages of the study

Crises and Cycles in Economic Dictionaries and Encyclopaedias Daniele Besomi,2013-03-01 This book aims at investigating from the perspective of the major economic dictionaries the notions of economic crisis and cycle The project consists in giving an extensive summary of a number of significant entries on this subject with an introductory essay to each entry placing them and the dictionary to which they belong in their context giving some details on the author of the dictionary entry and assessing the entry s and its author s contribution The broad picture including the history of these encyclopedic tools will be examined in the introductory essays *The Dialectics of Ecology* John Bellamy Foster,2024-04-01 Explores ecological socialism s potential against capitalist environmental degradation Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other The product of contemporary ecosocialist debates *The Dialectics of Ecology* builds on earlier works by Foster including *Marx s Ecology* and *The Return of Nature* aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development **Cumulative Bibliography of Victorian Studies** ,1970

Intersectional Socialism Charles Masquelier, 2025-02-11 In the context of sustained economic and environmental crises marked by extreme inequalities of wealth rising xenophobia racism and precarity never has the need for a radical change of system been so pressing This book is an invitation to think the world otherwise The author breathes new life into socialist thought through the deployment of an intersectional lens bringing diverse struggles for emancipation both within and outside the Global North into dialogue with one another In doing so he offers the kind of bold and holistic thinking the present situation calls for

Problems of Economic Transition Tibor Vasko, 1992 Problems of Economic Transition consists of papers presented at a colloquium held in April 1991 by experts in various aspects of regional development from 10 countries of Europe Eastern and Western USA and Canada These papers present an overview of problems at national regional and local levels and possible solutions

Transition Economies Aleksandr V. Gevorkyan, 2018-04-17 This interdisciplinary study offers a comprehensive analysis of the transition economies of Central and Eastern Europe and the former Soviet Union Providing full historical context and drawing on a wide range of literature this book explores the continuous economic and social transformation of the post socialist world While the future is yet to be determined understanding the present phase of transformation is critical The book's core exploration evolves along three pivots of competitive economic structure institutional change and social welfare The main elements include analysis of the emergence of the socialist economic model its adaptations through the twentieth century discussion of the 1990s market transition reforms post 2008 crisis development and the social and economic diversity in the region today With an appreciation for country specifics the book also considers the urgent problems of social policy poverty income inequality and labor migration Transition Economies will aid students researchers and policy makers working on the problems of comparative economics economic development economic history economic systems transition international political economy as well as specialists in post Soviet and Central and Eastern European regional studies

Information Space (RLE: Organizations) Max Boisot, 2013-06-26 In this book the author lays the foundations for a new political economy of information The information space or I Space is the conceptual framework in which organizations institutions and cultures are being transformed by new information and communication technologies In the penultimate chapter the I Space's usefulness as an explanatory framework is illustrated with an application a case study of China's modernization Information Space proposes a radical shift in the way that we approach the emerging information age and the implications it holds for societies organizations and individuals

Routledge Library Editions: Organizations (31 vols) Various, 2021-12-02 Re-issuing volumes originally published between 1949 and 1995 this 31 volume set examines the theory and behaviour of organizations Topics covered include the sociology of work leadership and organizations politics at work theory and practice of company organization patterns of business organization company strategy and organizational design

The capitalist mode of destruction Costas Panayotakis, 2021-02-09 The capitalist mode of destruction traces contemporary capitalism's economic ecological and democratic crises Combining insights from a range

of disciplines including psychology sociology and political economy Panayotakis interprets these crises as manifestations of a previously unrecognized contradiction over time the benefits of capitalism s technological dynamism tend to decline even as its threats to humanity and the planet continue to mount To explain this contradiction the book analyzes the production and distribution of surplus in capitalist societies and rethinks the concept of surplus itself Identifying the public sector and households as sites of production no less important than the workplace this book attributes capitalism s contradictions to working people s lack of control over the surplus they produce This lack of control is undemocratic and threatens the planet Only a classless society in which working people democratically determine the size and use of the surplus they produce can effectively respond to our current predicament Recognizing such a democratic classless society as the essence of the communist ideal the book argues that far from becoming obsolete this ideal is ever more indispensable But since the necessity of this ideal does not guarantee its realization the book also investigates the conditions necessary for the formation of an anti capitalist alliance for social justice democracy and ecological sustainability

Remaking Scarcity Costas Panayotakis, 2011-09-12 The dominant schools of neoclassical and neoliberal economics tell us that material scarcity is an inevitable product of an insatiable human nature Against this Costas Panayotakis argues that scarcity is in fact a result of the social and economic processes of the capitalist system The overriding importance of the logic of capital accumulation accounts for the fact that capitalism is not able to make a rational use of scarce resources and the productive potential at the disposal of human society Instead capitalism produces grotesque inequalities and unnecessary human suffering a toxic consumerist culture that fails to satisfy and a deepening ecological crisis Remaking Scarcity is a powerful challenge to the current economic orthodoxy It asserts the core principle of economic democracy that all human beings should have an equal say over the priorities of the economic system as the ultimate solution to scarcity and ecological crisis

The Economics of Transition Marie Lavigne, 1999-02-15 Substantially revised and updated the second edition of this highly acclaimed text is both a vital guide and a valuable critical analysis The book provides a contemporary comparative approach to the process of transformation of the economies of Eastern Europe and Russia Supplying a large amount of factual and statistical information it also includes consideration of recent progress in the areas of macro economic stabilisation micro economic restructuring and integration into the world economy
