Reconstructions : New Perspectives on Postbellum America Institute for Southern Studies and Associate Professor of History University of South Carolina Thomas J. Brown Associate Director, 2006-10-16 The pivotal era of Reconstruction has inspired an outstanding historical literature In the half century after W E B DuBois published *Black Reconstruction in America* 1935 a host of thoughtful and energetic authors helped to dismantle racist stereotypes about the aftermath of emancipation and Union victory in the Civil War The resolution of long running interpretive debates shifted the issues at stake in Reconstruction scholarship but the topic has remained a vital venue for original exploration of the American past In *Reconstructions New Perspectives on the Postbellum United States* eight rising historians survey the latest generation of work and point to promising directions for future research They show that the field is opening out to address a wider range of adjustments to the experiences and effects of Civil War Increased interest in cultural history now enriches understandings traditionally centered on social and political history Attention to gender has joined a focus on labor as a powerful strategy for analyzing negotiations over private and public authority The contributors suggest that Reconstruction historiography might further thrive by strengthening connections to such subjects as western history legal history and diplomatic history and by redefining the chronological boundaries of the postwar period The essays provide more than a variety of attractive vantage points for fresh examination of a major phase of American history By identifying the most exciting recent approaches to a theme previously studied so ably the collection illuminates the creative process in scholarly historical literature **New**

unwarranted apologies found in much of the literature on contractual communities The central notion is that cases in which coercive action by a public agency was deemed indispensable have been unjustly overstated while the potential benefits of voluntary self organising processes have been seriously understated The authors propose a revised notion of the state role that allows ample leeway for contractual communities of all forms Public Health Nursing Greta Thornbory,2009-08-17 Public Health Nursing is an essential resource for all health visiting students school nursing students and occupational health nursing students that reflects the current key changes in community public health nursing It is a key textbook for specialist practitioner programmes and those new to the public health arena Written by relevant experts in the field this practical textbook uniquely explores the three main specialties of Public Health Nursing Health Visiting School Nursing and Occupational Health Nursing A particular strength of the book is the way it shows the diversity of each discipline and how they each address Public Health in vastly different ways according to the needs of their relevant population This will be essential reading for all students on the Specialist Community Public Health Nursing SCPHN programmes offered across the UK Key features Focuses on the specialist community public health nursing part of the NMC register Multidisciplinary with contributors from all three specialisms Concerned with improving the health of the population rather than treating the diseases of individual patients Focuses on practice and competencies *The Community in Urban Society* Larry Lyon,Robyn Driskell,2011-12-16 The community is more than an abstract object of theoretical inquiry It is also a place where people live It is difficult to determine where community research and theory merge because the community is a unique place where theory and the real world come together Local conditions change and new research techniques emerge In the second edition of *The Community in Urban Society* the authors solve this problem by distilling the historic and foundational theories of community applying traditional approaches typology ecology systems theory and conflict theory to current conditions and exploring new and relevant theories that impact today's communities The latest edition also examines recent and emerging technologies that facilitate examination and evaluation of the modern community condition Updated coverage includes topics such as New Urbanism modern network analysis methods the urban political economy approach to community the growth machine approach GIS mapping recent holistic studies cyberspace communities and up to date discussions of community indicator studies quality of life community power and regime politics **Asian American History** Huping Ling,2023-08-11 A comprehensive survey *Asian American History* places Asian immigration to America in international and domestic contexts and explores the significant elements that define Asian America imperialism and global capitalist expansion labor and capital race and ethnicity immigration and exclusion family and work community and gender roles assimilation and multiculturalism panethnicity and identity transnationalism and globalization and new challenges and opportunities It is an up to date and easily accessible resource for high school and college students as well as anyone who is interested in Asian American history *Asian American History* Covers the major and minor Asian American ethnic groups It presents the myriad and poignant
