New Skepticism Inquiry And Reliable Knowledge:

The New Skepticism Paul Kurtz, 1992 Kurtz argues that there are objective standards for judging truth claims in science ethics and philosophy Of special interest is the application of the new skepticism to paranormal claims such as reincarnation and faith healing and to religious beliefs ethics and politics *Skepticism and Humanism* Paul Kurtz, 2023-05-31 As we begin the third millennium there is cause for cautious optimism regarding the human prospect Democratic revolutions and the doctrine of universal human rights have captured the imagination of large sectors of humanity while major advances in science and technology continue to conquer disease and extend life contributing to rising standards of living affluence and cultural freedom on a worldwide basis Paradoxically at the same time ancient authoritarian fundamentalist religions have grown in vitriolic intensity along with bizarre New Age media driven paranormal belief systems Also surprising is the resurgence of primitive tribal and ethnic loyalties unleashing wars of intolerance and bitterness In *Skepticism and Humanism* Paul Kurtz locates these threatening developments within a long standing and largely unchallenged theological worldview He proposes as an alternative to religion a new cultural paradigm rooted in scientific naturalism rationalism and a humanistic outlook An estimated 60 percent of scientists are atheists or agnostics However the skeptical world view has been given little currency even in advanced societies because of a cultural prohibition against the criticism of religion At the same time science has become increasingly narrow and specialized so that few people can draw on its broader intellectual and cultural implications *Skepticism and Humanism* attempts to meet this need It defends skepticism as a method for developing reliable knowledge by using scientific inquiry and reason to test all claims to truth It also defends scientific naturalism an evolutionary view of nature life and the human species Kurtz sees the dominant religious doctrines as drawn from an agricultural nomadic past and emphasizes the need for a new outlook applicable to the postindustrial information age At the same time he rejects postmodernism for abandoning science and embracing a form of nihilism There can be no doubt that as a new global civilization emerges scientific naturalism rationalism and secular humanism have something significant to say about the meaning of life *Skepticism and Humanism* shows how they can to foster democratic values and social prosperity The book will be important for philosophers scientists and all those concerned with contemporary issues *The New Encyclopedia of Unbelief* Tom Flynn, 2007-04-30 Successor to the highly acclaimed *Encyclopedia of Unbelief* 1985 edited by the late Gordon Stein the *New Encyclopedia of Unbelief* is a comprehensive reference work on the history beliefs and thinking of America's fastest growing minority those who live without religion All new articles by the field's foremost scholars describe and explain every aspect of atheism agnosticism secular humanism secularism and religious skepticism Topics include morality without religion unbelief in the historicity of Jesus critiques of intelligent design theory unbelief and sexual values and summaries of the state of unbelief around the world In addition to covering developments since the publication of the original edition the *New Encyclopedia of Unbelief* includes a larger number of biographical entries and much expanded

coverage of the linkages between unbelief and social reform movements of the 19th and 20th centuries including the labor movement woman suffrage anarchism sex radicalism and second wave feminism More than 130 respected scholars and activists worldwide served on the editorial board and over 100 authoritative contributors have written in excess of 500 entries The distinguished advisors and contributors philosophers scientists scholars and Nobel Prize laureates include Joe Barnhart David Berman Sir Hermann Bondi Vern L Bullough Daniel Dennett Taner Edis the late Paul Edwards Antony Flew Annie Laurie Gaylor Peter Hare Van Harvey R Joseph Hoffmann Susan Jacoby Paul Kurtz Gerd L demann Michael Martin Kai Nielsen Robert M Price Peter Singer Victor Stenger Ibn Warraq George A Wells David Tribe Sherwin Wine and many others With a foreword by evolutionary biologist and best selling author Richard Dawkins this unparalleled reference work provides comprehensive knowledge about unbelief in its many varieties and manifestations *Meaning and Value in a Secular Age* Paul Kurtz, 2012-06-26 The secular age has confronted human beings with a fundamental challenge While the naturalistic worldview rooted in science has persuasively shown that traditional religious conceptions of the universe are unsustainable it has so far offered no compelling secular narratives to replace the religious narratives so entrenched in civilization In the absence of religion how do thoughtful contemporary individuals find meaning in a secular world In this book philosopher Paul Kurtz argues for a new approach that he calls eupraxsophy Kurtz first coined the term in 1988 to characterize a secular orientation to life that stands in contrast to religion Derived from three ancient Greek roots eupraxsophy literally means good practice and wisdom Drawing upon philosophy science and ethics eupraxsophy provides a thoroughly secular moral vision which respects the place of human values in the context of the natural world and presents an empirically responsible yet hopeful picture of the human situation and the cosmos in which we abide Editor Nathan Bupp has conveniently gathered together Kurtz s key writings about the theory and practice of eupraxsophy for the first time in this volume Written with eloquence and scope these incisive essays show how Kurtz s brand of humanism moves above and beyond the current new atheism Eupraxsophy successfully bridges the cultural divide between science and value and provides a genuine and constructive alternative to religion Bupp s informative introduction places the concept of eupraxsophy in historical perspective and shows why it is critically important and relevant today **Parapsychology** Jane Henry, 2005 Beginning with an introduction to the methodology this book provides the reader with a sympathetic yet critical overview of current research into unexplained phenomena including visions telepathy psychokinesis and out of body experiences **The Demon-Haunted World** Carl Sagan, 2011-07-06 NEW YORK TIMES BESTSELLER From the renowned astronomer and author of *Cosmos* comes a powerful and stirring defense of informed rationality The Washington Post Book World in a world where fake news stories and Internet conspiracy theories play to a disaffected American populace LOS ANGELES TIMES BOOK PRIZE WINNER Glorious A spirited defense of science From the first page to the last this book is a manifesto for clear thought Los Angeles Times How can we make intelligent decisions about our increasingly technology driven lives if we don t

understand the difference between the myths of pseudoscience New Age thinking and fundamentalist zealotry and the testable hypotheses of science Casting a wide net through history and culture Pulitzer Prize winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well being of our democratic institutions He examines and authoritatively debunks such celebrated fallacies as witchcraft faith healings demons and UFOs And yet disturbingly in today s so called information age pseudoscience is burgeoning with stories of alien abduction channeling past lives and communal hallucinations commanding growing attention and respect As Sagan demonstrates with lucid eloquence the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms American Pragmatism and Communication Research David K. Perry,2001 This volume examines the past present and potential relationships between pragmatism and communication research For scholars and students in communication study **Consulting Spirits** Joel Bjorling,1998-04-30 Throughout history people have been intrigued with spirits angels or devas as sources of wisdom and guidance They are not only interesting as those who possess an insight into events and circumstances but also as proof of life after death In this clear and useful reference guide Bjorling presents a listing of the literature on the various ways in which people of different cultures have consulted spirits through shamans and oracles magic mediums Voodoo and psychics Each chapter contains a general introduction to the respective topic as well as a listing of pertinent books articles and dissertations His survey also includes early spirit contacts in Africa Latin America and Asia **Evangelism Made Slightly Less Difficult** Nick Pollard,1997-12-09 Nick Pollard explains why people don t want to hear about Jesus and shows how to get them interested

The Courage to Become Paul Kurtz,1997-06-30 Does life have meaning if one rejects belief in God This book responds affirmatively to that question Paul Kurtz America s leading secular humanist provides a powerful defense of the humanist alternative rejecting both religious spirituality and nihilism In this inspirational book Kurtz outlines the basic virtues of the secular humanist outlook These virtues include courage not simply to be or to survive but to overcome and become that is to fulfill our highest aspirations and ideals in the face of obstacles The two other virtues Kurtz identifies are cognition reason and science in establishing truth and moral caring compassion and benevolence in our relationships with others Kurtz offers an optimistic appraisal of the human prospect and outlines a philosophy both for the individual and the global community

Overcoming Law Richard A. Posner,1995 Legal theory must become more factual and empirical and less conceptual and polemical Richard Posner argues in this wide ranging new book The topics covered include the structure and behavior of the legal profession constitutional theory gender sex and race theories interdisciplinary approaches to law the nature of legal reasoning and legal pragmatism Posner analyzes in witty and passionate prose schools of thought as different as social constructionism and institutional economics and scholars and judges as different as Bruce Ackerman Robert Bork Ronald Dworkin Catharine MacKinnon Richard Rorty and Patricia Williams He also engages challenging issues in legal theory that

range from the motivations and behavior of judges and the role of rhetoric and analogy in law to the rationale for privacy and blackmail law and the regulation of employment contracts Although written by a sitting judge the book does not avoid controversy it contains frank appraisals of radical feminist and race theories the behavior of the German and British judiciaries in wartime and the excesses of social constructionist theories of sexual behavior Throughout the book is unified by Posner's distinctive stance which is pragmatist in philosophy economic in methodology and liberal in the sense of John Stuart Mill's liberalism in politics Brilliantly written eschewing jargon and technicalities it will make a major contribution to the debate about the role of law in our society Challenges to the Enlightenment Academy of Humanism, Academy of

Humanism Staff, 2010-10-05 The Enlightenment was an intellectual movement which began in seventeenth century Europe and espoused an optimistic project an end to human ignorance and the slavish adherence to ancient texts and dogma the application of scientific principles to solving the world's problems the elimination of inequality between the sexes and the advocacy of political rights for all citizens Modern western society with its democratic institutions and its reliance on science as the basis of technology and industry is largely an outgrowth of Enlightenment ideals Yet today the entire Enlightenment agenda is being challenged not only by members of the religious orthodoxy but also by a group of academics loosely described under the label of postmodernism Whereas the Enlightenment project has always been at odds with religious orthodoxy which has traditionally been suspicious of efforts to achieve human progress without supernatural support today it must deal with a very different type of attack from postmodernist intellectuals Critics of this school question the very ability of human reason to grasp objective reality and they raise serious objections to the reliability and efficiency of the scientific method and the tyranny of democratic elites Is the Enlightenment project still worth pursuing The distinguished members of the Academy of Humanism who have contributed to this important collection of essays are united in their conviction that the ideals of the Enlightenment must be preserved Editors Paul Kurtz and Timothy J Madigan have grouped the diverse perspectives represented in this volume into three major sections dealing with philosophical issues scientific issues and social issues These cogently argued and vigorous responses to traditional and postmodernist criticisms of the Enlightenment make it clear that reason science and the political and social ideals of the Enlightenment are indispensable for the welfare and future of our planet **Dictionary Of Atheism Skepticism & Humanism** Bill Cooke, 2009-12-30 In the tradition of

Voltaire's Philosophical Dictionary Ambrose Bierce's Devil's Dictionary and Joseph McCabe's Rationalist Encyclopedia this accessible dictionary addresses the contemporary need for a reference book that succinctly summarizes the key concepts current terminology and major contributions of influential thinkers broadly associated with atheism skepticism and humanism In the preface author Bill Cooke notes that his work is intended for freethinkers in the broadest sense of the word people who like to think for themselves and not according to the preplanned routes set by others This dictionary will serve as a guide for all those people striving to lead fulfilling morally responsible lives without religious belief Readers are offered a

wide range of concepts from ancient well known notions such as God free will and evil to new concepts such as eupraxsophy Also included are current buzzwords that have some bearing on the freethought worldview such as metrosexual The names of many people whose lives or work reflect freethought principles form a major portion of the entries Finally a humanist calendar is included on which events of interest to freethinkers are noted This unique accessible and highly informative work will be a welcome addition to the libraries of open minded people of all philosophic persuasions

Rethinking the Knowledge Controversy in Organization Studies Walter R. Nord, Ann F. Connell, 2012-03-29 Recently the field of organization studies has been plagued by intense disruptive controversy about what counts as knowledge This book written by the major researchers and voices in the field of organization studies attempts to respond to this controversy by offering the topic of generative uncertainty as the primary vehicle for rethinking about this issue The authors prefer admitting uncertainty to making unwarranted assumptions The ideas about questioning the possibility of knowledge that is certain goes back to before the time of Socrates This unique historical look at the study of organization studies will be of interest to all students and scholars of this field

Multi-Secularism Paul Kurtz, 2017-07-12 The contemporary world is witness to an intense controversy about secularism This controversy has intensified due to the presence of fundamentalism which challenges secular society and the secularization of philosophical ideas and ethical values Secularists maintain that the state should not impose a religious creed upon citizens and should respect freedom of conscience the right to believe or disbelieve in the prevailing orthodoxy This right is guaranteed by the First Amendment to the US Constitution and the Rights of Man enunciated in the French Revolution Yet many powerful religious institutions do not accept this principle Paul Kurtz argues that secularism needs to be allied to the emergence of democratic institutions that respect individual freedom and the pluralistic society He argues that a defense of secularism entails a defense of the civic virtues of democracy which include the toleration of dissent and alternative lifestyles and the willingness to negotiate differences Consequently secularism will take different forms in different societies the term multi secularism best describes that Many people believe that it is impossible to maintain a moral order without the support of religion Kurtz vigorously denies that and this volume attempts to explicate the values and principles of secular morality which he sees as the cornerstone of the open democratic society Kurtz was involved in the campaign for secularism throughout his career as a philosopher This book reflects his participation in this battle and extends his thinking to new areas

Adventure in Human Knowledges and Beliefs Andrew Ralls Woodward, 2014-07-10 What are scientific theories Do they provide knowledge of reality What does it mean to call ourselves atheist theist or agnostic Do these words describe the complexity of belief In Adventure in Human Knowledges and Beliefs readers are adjudicators who measure the acceptability of knowledges and beliefs Andrew Ralls Woodward leads readers through an adventure which includes the philosophy of science religious studies and theology Chapters are concise but thorough including introductions to the works of pertinent scholars Woodward presents readers with philosophical and

theological tools used to create a mental knowledge bar a measuring bar for knowledge as well as a science and religion compatibility system between knowledge and belief communities The conflict of science and religion is approached in a neutral fashion from the outside making *Adventure in Human Knowledges and Beliefs* a valuable resource for teenagers adults and working professionals from diverse ages and career backgrounds *Toward a New Enlightenment* Paul Kurtz, 2018-04-17 Paul Kurtz has been the dominant voice of secular humanism over the past thirty years This compilation of his work reveals the scope of his thinking on the basic topics of our time and his many and varied contributions to the cause of free thought It focuses on the central issues that have concerned Kurtz throughout his career ethics politics education religion science and pseudoscience The chapters are linked by a common theme the need for a new enlightenment one committed to the use of rationality and skepticism but also devoted to realizing the highest values of humanist culture Many writings included here were first published in magazines and journals long unavailable Some of the essays have never before been published They now appear as a coherent whole for the first time Also included is an extensive bibliography of Kurtz s writings *Toward a New Enlightenment* is essential for those who know and admire Paul Kurtz s work It will also be an important resource for students of philosophy political science ethics and religion Among the chapters are *Humanist Ethics* *Eating the Forbidden Fruit* *Relevance of Science to Ethics* *Democracy without Theology* *Misuses of Civil Disobedience* *The Limits of Tolerance* *Skepticism about the Paranormal* *Legitimate and Illegitimate Militant Atheism vs Freedom of Conscience* *Promethean Love Unbound* *The Case for Euthanasia* and *The New Inquisition in the Schools* **Theory and Research in Mass Communication** David K. Perry, 2001-11-01 This updated edition presents a civic journalism treatment of the field of mass communication research The sine qua non of the civic journalism movement seems to center around an implicit assumption that the human mind is an evolved part in the natural world not a detached spectator as much traditional philosophy assumes Thus it has attempted to encourage journalists and members of their audiences to participate actively in civic life Applying the same idea to mass communication academics this book focuses on the empirical consequences of their work especially its possible impact on human life It argues that researchers need to connect with the broader communities in which they live and considers the impact of media research on society Features of the second edition include detailed update of research evidence concerning the media violence issue additional material concerning media ownership structures and their possible relationship to media content and effects new material focusing on the impact of tobacco and alcohol advertising updated and expanded section concerning the history of media studies and an expanded discussion of philosophical issues pertaining to theory construction This book is intended for graduate and advanced undergraduate students studying mass communication theory and related subjects such as communication theory media effects media literacy and media and society *A Rebel to His Last Breath* Bill Cooke, 2010-06-28 This is the first biography of Joseph McCabe 1867 1955 a former Catholic priest who became one of the best known champions and a prolific popularizer of

freethought and rationalism in the first half of the 20th century McCabe's encyclopedic curiosity rigorous scholarship and above all his unswerving intellectual honesty led him through a tumultuous career of public lecturing and debating and an incredible output of over 200 books He tackled the most controversial issues of the modern era evolution biblical errancy belief in God immorality spiritualism capitalism vs socialism women's rights and many other topics Much of his writing was published in the form of the Little Blue Books by E Haldeman Julius who declared McCabe to be the world's greatest scholar Today in our postmodern period where Enlightenment values are being questioned and irrationalism in many guises has become fashionable McCabe's gift for rational inquiry respect for scientific evidence and lucid no nonsense prose are both relevant and welcome
